

7 Guests Receive Lecture on Second Coming and True Parents Life

Ermir Hoxha - March 14, 2012

Dear brothers and sisters !

I wish you are all fine and had a nice week!

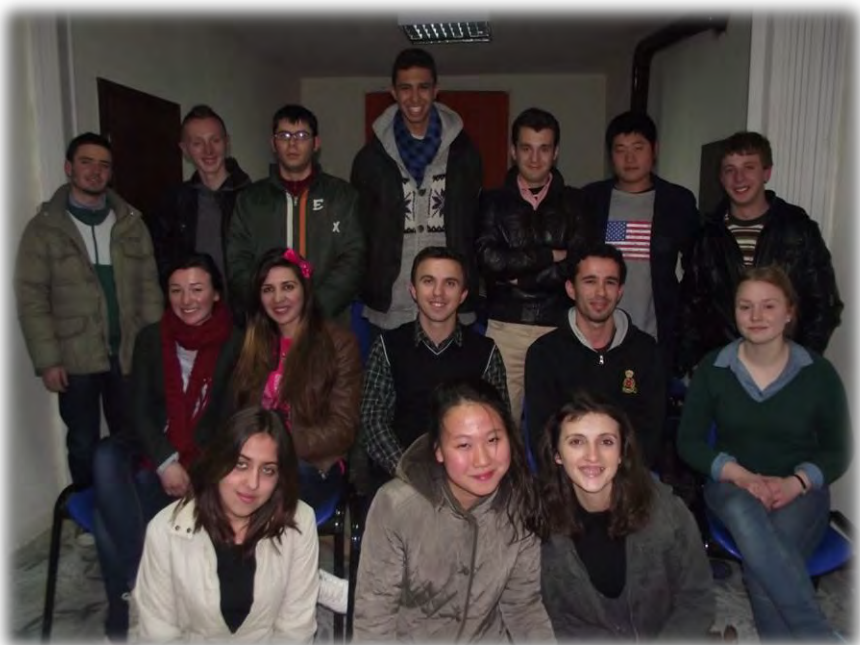

We had a very busy week regarding the witnessing and giving DP lectures for our new guests who were very curious and desired to know the truth. Very soon it came the final moment for them to get the final lectures and we thought to organize well this moment for them. On Sunday, 11th of march 5 of them who were very prepared and had a lot of information got these last lectures on Second Coming and True Parents life. Also on Wednesday, 14th of march 2 more guests got these last lectures given from the City leader Ermir Hoxha, and Lubin Argjir.

We would like to mention that from 10 guests who could get these lecturers, only 7 could attend, 3 of them are very active Christians in different churches. For the Christian ones it was difficult to accept naturally True Parents, as they are very attached to Bible, but they were surprised and got this great news very positively.

It was very nice to see the guests taking to each other during the break on their experiences after getting the truth. Many more things were clarified to them during True Parents Life course, where actually touched all of us present there.

We hope that they will connect more deeply to True Parents.

Some of their reflections:

Everything very interesting. Everything logical. It just remains to accept Rev. Moon as Messiah! He is a very unique, because a simple person wouldn't have so many followers. And also, he could change many peoples lives.

Taulant Kryemadhi

All the lectures give a lot of explanation about human being. The essence of it is to transform the fallen man into a perfect man. Everything explained in the lectures, gives a very different feeling from the world outside.

Lorenc Tare

From the first lecture I could get explanation for different terms or symbols that I couldn't explain before. From one lecture to the other I could learn how to be a good person in all aspects and today that I got the Second coming of Messiah, at first it was unbelievable, but when I heard the life of this man, I have no doubts, because I could see the fruits that this tree gave.

Rakip Dule

I have always wanted to be part of such lovely and friendly program as here. From the lectures I could get I came to know the history of human being, on the other hand the love and good will that members of this organization tried to give to me. The last lecture was very interesting, I came to know the Messiah, something that till now was only in books. With a big desire I will continue to attend this organization and get more information and giving my best.

Artjol Agolli

I could learn a lot of things here, but what made me reflect the most is that the family is the base of everything and to build it needs a lot of work. Regarding the coming of Messiah, I was really impressed and this pushes me to discover more on this and to be more curious in everything related to Messiah.
