

Introduction to the Spirit World Machine Project

Peter Dean Nordquist
July 23, 2018

Here's the Summary: (Intro to the Intro)

In 1985 after being released from Danbury Prison in America, True Father (Rev. Sun Myung Moon) came to W.R.I.S.T and asked us to make a spirit world machine.

Danbury was America's attempt to crucify or assassinate his character. In the eyes of much of the public, True Father became just a "convicted criminal." In prison however, Father was paying indemnity and making conditions to open the gates of hell to liberate the spirits in hell.

From Divine Principle we read: "When Jesus was crucified, the curtain between the holy place and the most holy place was torn in two, from top to bottom (Matt. 27:51), meaning that by the completion of the providence of spiritual salvation through Jesus' crucifixion, the way to communicate between the spirit man and the physical man, and between heaven and earth, opened up." Also Jesus descended into hell for three days and then resurrected and appeared to his disciples.

It is truly a comparable providence for Father to quickly come to WRIST and also say at the Leader's Conference, "Scientists are almost there." This short slide show in PowerPoint covers some of the things we have been considering in pursuing this yet unfinished task that True Father requested.

Note:

The Spirit World Machine Project was an attempt to build a machine to communicate with people who had died in the physical world and now lived exclusively in the spirit world.

**INTRODUCTION TO THE
SPIRIT WORLD MACHINE
PROJECT:**

**THE THEME THAT
UNIFIES RELIGION AND
SCIENCE**

Truth
and
Sincerity

Scientists are almost there.

- After being released from prison in 1985 True Father visited WRIST at the East Sun Building in Long Island City, NY where he requested that WRIST make a spirit world machine. As homework to make the spirit world machine, True Father said to study how mediums do what they do.
- Very soon after that also in 1985 at the Leaders' Conference that True Father held just after he was released from Danbury Prison, True Father talked about WRIST and explained that scientists are almost to the point of being able to prove the existence of the spirit world. He said that Dr. Jean Charon, who had attended our Science Conference and formulated the theory of Complex Relativity, was right in his belief that particles are half spiritual and half physical.

Divine Principle explains how mediums do what they do.

- ▣ As we know, each human being is a mediator and center of harmony between the spirit world and the physical world. We have 5 spiritual senses and 5 physical senses that resonate with each other just like tuning forks. This is explained in the last section of The Principle of Creation, titled "The Invisible Substantial World And The Visible Substantial World Centering On Man:"
- ▣ "Since all the spiritual phenomena thus perceived by the spirit man are reflected and echoed in the physical man, presenting themselves as physical phenomena, man finally comes to feel spiritual phenomena even with his five physical senses."
- ▣ [Divine Principle: Principle of Creation: Section 6, 1973]

The human body however is not just physical.

- ▣ Besides each particle being half spiritual and half physical, we have the fact that the human body consists of a spiritual body that is a microcosm of the spiritual world, and a physical body that is a microcosm of the physical world. These exchange elements with each other such that the spiritual body is able to grow in the soil of the physical body by receiving life elements from God as well as vitality elements from the physical body. Similarly the spirit body returns living spirit elements to the physical body to help maintain the health and well-being of the physical body.

The spirit world is just radio frequency.

- ▣ True Father also said, while talking to WRIST members at East Garden in Tarrytown, NY in 1998 that the spirit world is just radio frequency or electromagnetism.

Electrical engineering

- ▣ True Father studied as an electrical engineer and so knows very well what he is talking about when he mentions electromagnetism. True Father also postulated his own theory of why lightning strikes and was planning to write his thesis about it, but didn't get that opportunity as a young student. He mentioned his theory of lightning in speeches in the 1980's.

How does lightning strike?

- ▣ Briefly Father asked, "How do so many electrons clump together in the clouds if they are supposed to be repelling each other all the time? The answer is that they don't repel each other all the time. Like sisters who are not married, they have no problem being close to each other. But when there is a married electron and proton, this constitutes a higher dimensional harmony that is protected by the universe. If a single electron approaches to try and interfere with the the married electron, then the universe repels that single electron through the married electron."

Electron Dot

- ▣ This theory has somewhat been proven by the investigation of what are known as "electron dots." An electron dot is an electronic junction in which electrons can be input one at a time and taken out one at a time, up to 5000 electrons.
- ▣ They order themselves in quantum states as though they were around the nucleus of an atom. In this case it is said that the coulombic force of like particles repelling each other does not disappear, but that the quantum states take priority.

Unity of Science and Religion

- ▣ The Divine Principle states many places throughout that the new truth will unify the internal truth of religion with the external truth of science:
- ▣ "What will be the mission of the new truth? Its mission will be to present the internal truth that religion has pursued and the external truth searched for by science under one unified theme. It should also seek to overcome both the internal and external ignorance of man and offer him internal and external knowledge."
- ▣ [Divine Principle: Introduction, p10]

God is the First Scientist.

- ▣ God created the world according to scientific principles that can be studied:
- ▣ "When the scientific nature of the world is observed, it can be concluded that God, the Creator, is the very origin of science. If human history is God's providence to restore the world to His original purpose of creation, it must be that God, Master of all laws, has manipulated providential history according to a plan and an order."
- ▣ [Divine Principle: Introduction, p14]
- ▣

What is that unified theme?

- ▣ It reveals the heart of God as Creator and True Parent, who created human beings in his image with two sets of dual characteristics: Sung Sang or mind, and Hyung Sang or Body, which each have Masculine and Feminine characteristics.
- ▣ Considering that God and His Image are similar to Mind and Body, or Sung Sang and Hyung Sang, we can see that both sets are mentioned in Genesis 1:27 on the first page of the Bible:
- ▣ "So God created human beings in his own image. In the image of God he created them; male and female he created them."

The Meaning of the Number 4

- ▣ This theme is presented in The Principle of Creation as the 4-position-foundation, which develops through three stages of the Indirect Dominion by the Autonomy of the Principle, and returns to One Body with God in the Direct Dominion of the Love of God, thus returning joy to God. This is known as the 4th stage and is why the number 4 separates Satan. Being one body with God means that God plus one is a majority and cannot, therefore, be invaded by Satan.

The Structure of Everything

- Unification Thought explains that every individual-truth-body consists of four 4-position-foundations: two (inner and outer) that are centered on heart, which does not develop, because the world of heavenly heart is already at the highest dimension and transcends time and space, and two (inner and outer) that are centered on God's purpose of creation, which develops toward goodness in pursuit of the Three Great Blessings.
- Also the results of the two stages centered on heart and the two stages centered on purpose perform give and take action and produce a result.

A Big Theory of Everything

- ▣ All potential and actual relationships that existed in the past, exist in the present, or will ever exist in the future are covered by this explanatory structure. The Divine Principle thus is a Big Theory of Everything, sometimes referred to as a Big TOE.

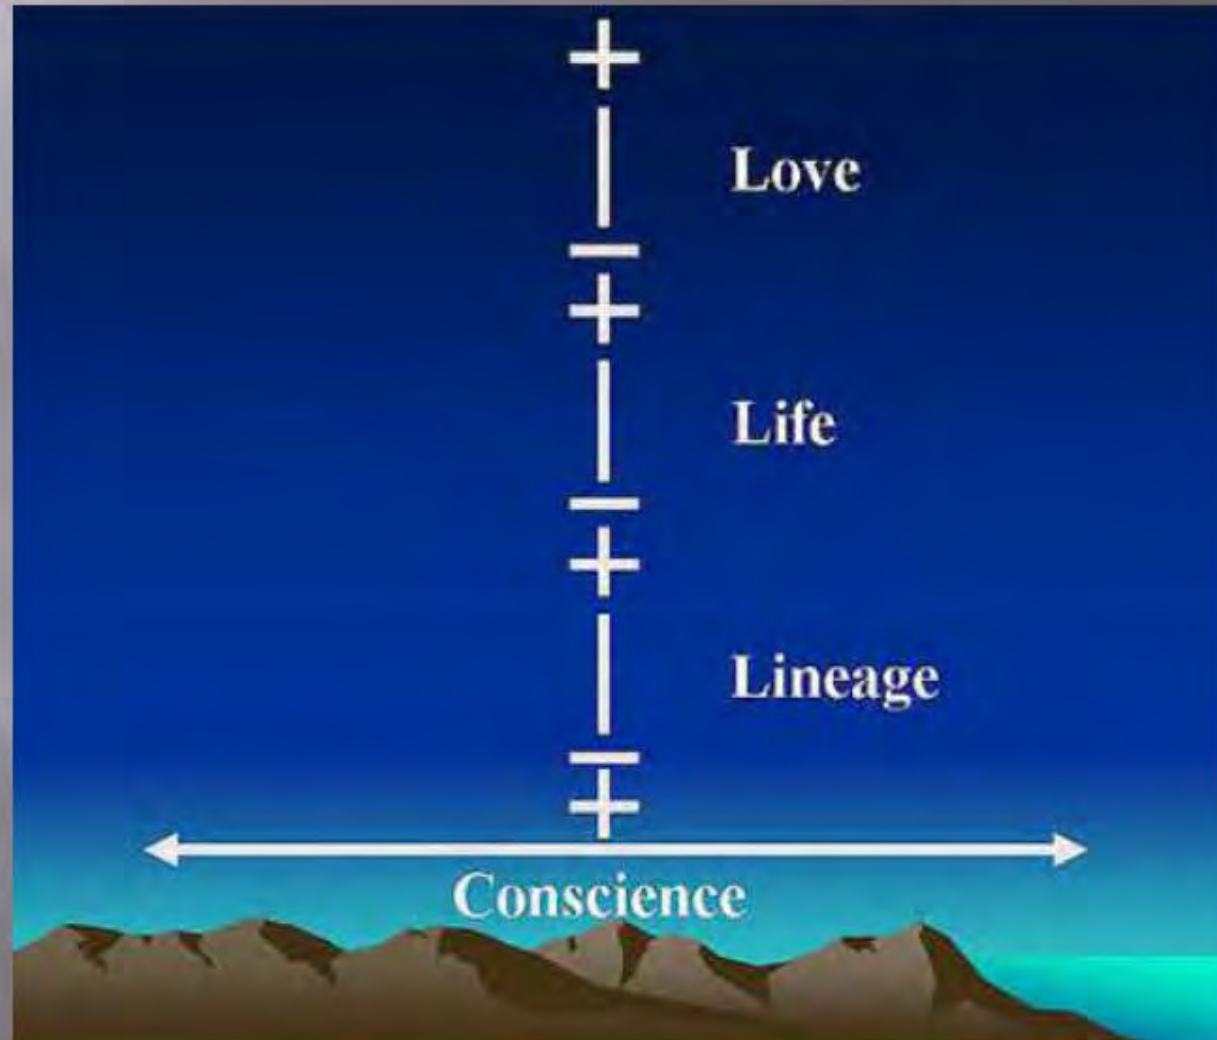

ilshim + ilshin = ilchai

- Father explained the formula of ilshim + ilshin = ilchai. This is another way of explaining how the structure of the First Great Blessing - to be Fruitful, combines with the Second Great Blessing - to Multiply.
- Ilshim refers to the One Unified Heart/Mind of the Husband and Wife during the Day.
- Ilshin refers to the One Unified Body of Husband and Wife at Night.
- Ilchai is the combination of ilshim plus ilshin returning to One-Body-With-God in the Origin Stage,

Mystical Tradition in Religion

- ▣ God has inspired aspects of the 4-position-foundation in the symbolism of each major religion or cultural sphere. We can see this by studying the mystical experiences of the major spiritual traditions.
- ▣ This shows that God has been working to reveal the deepest truth throughout history in the dynamics of the 4-position-foundation.

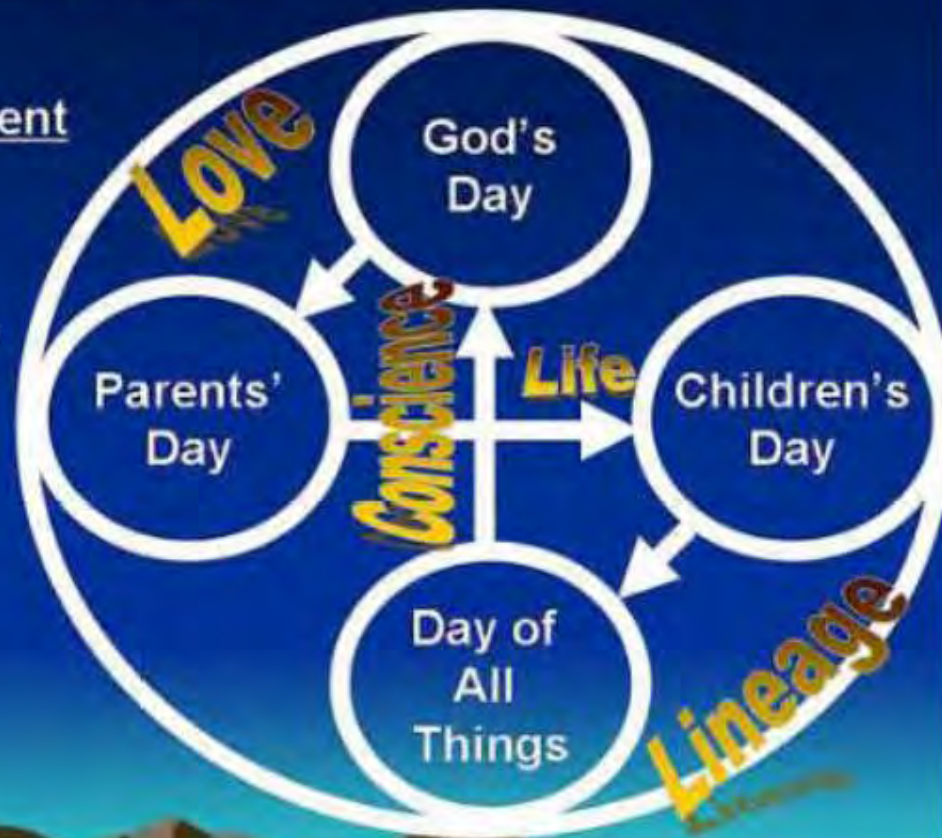

Further Study

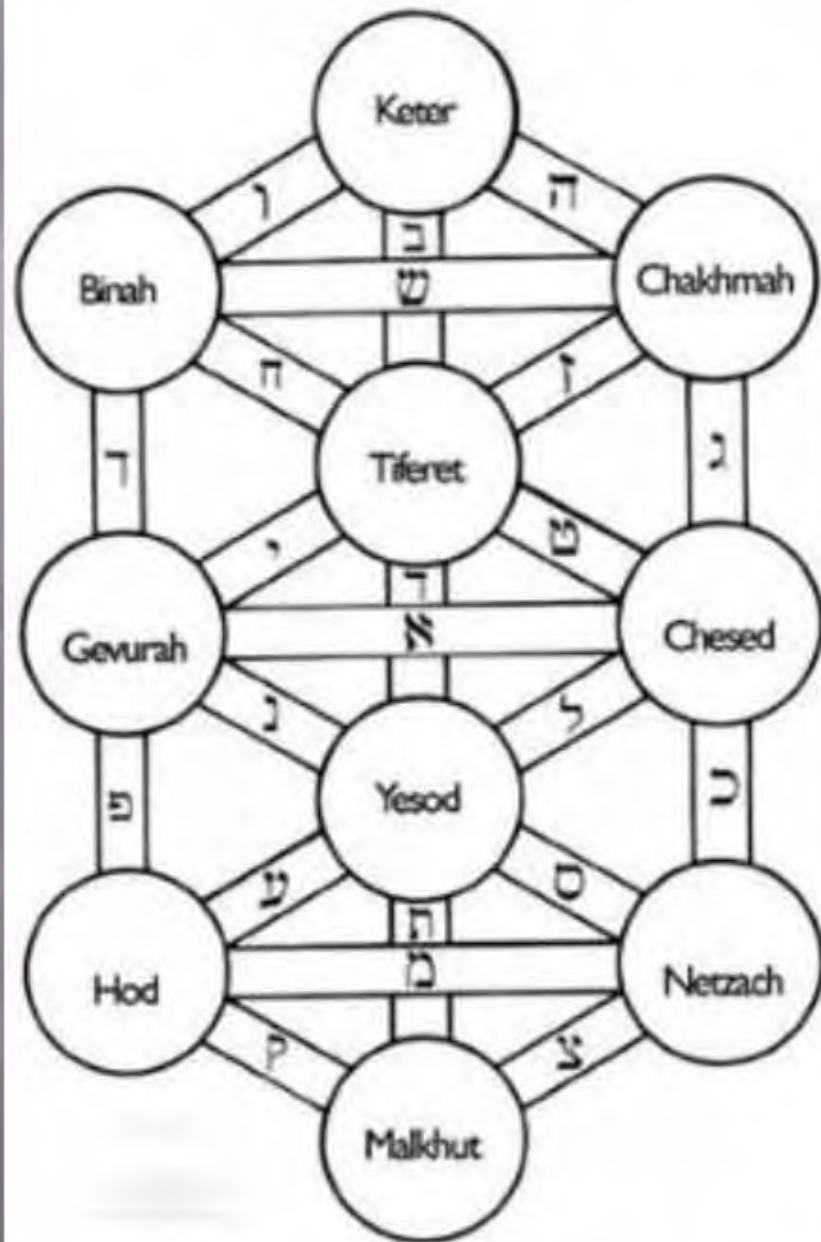

The Four Major Holy Days

Order of Establishment

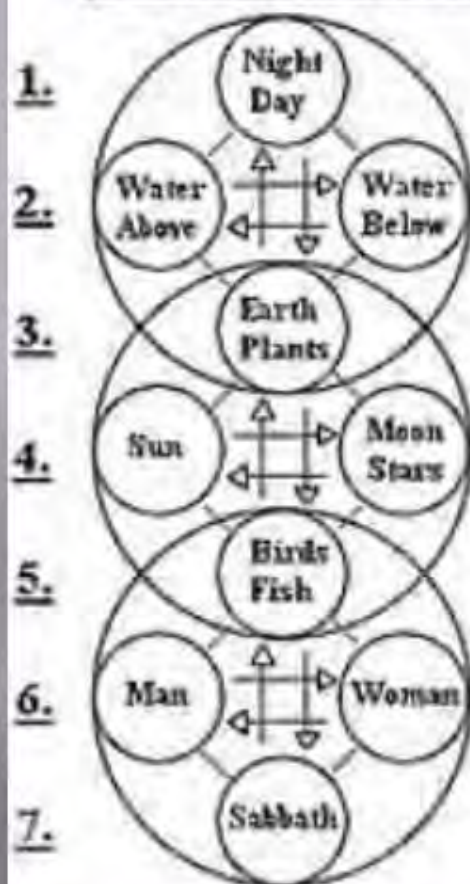

- 1) Parents' Day
- 2) Children's Day
- 3) Day of All Things
- 4) God's Day

Comparison With the Jewish Natural Array Tree of Life

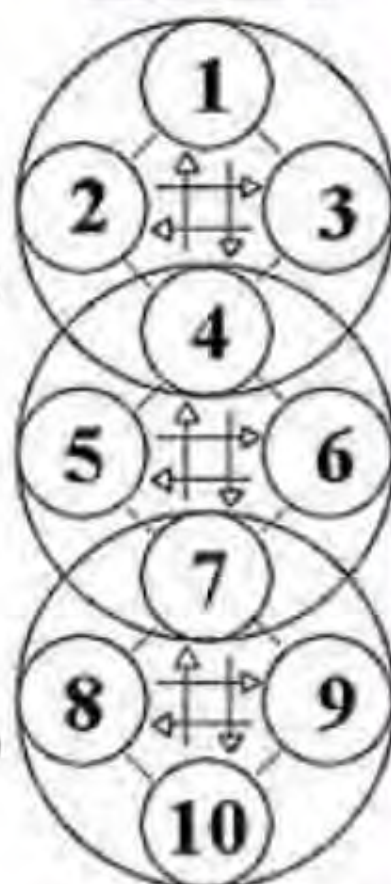

7 Days of Creation

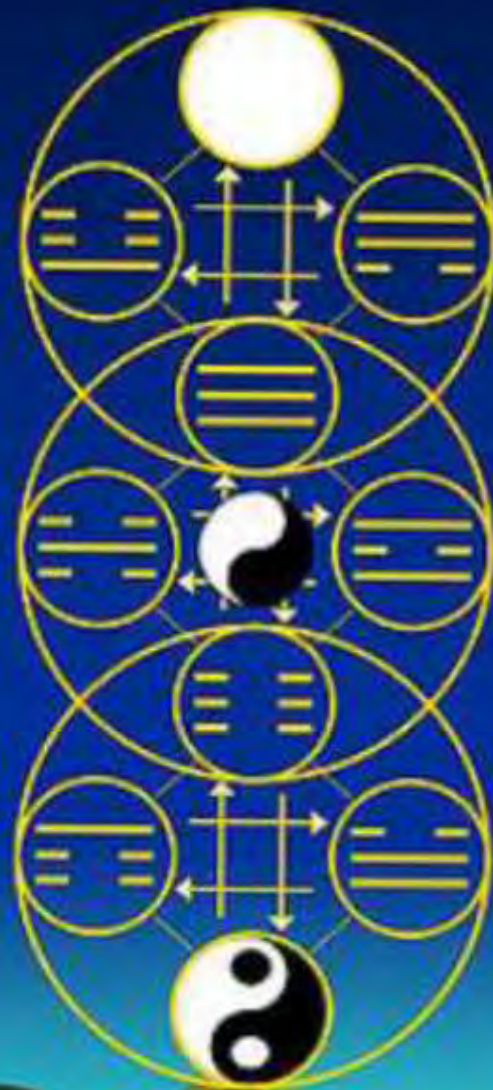

10 Commandments

- | | |
|-------------------------------|-----------------|
| 1) There is only one God. | Will |
| 2) Don't worship idols. | Wisdom |
| 3) Don't curse. | Understanding |
| 4) Remember the Sabbath. | Beauty |
| 5) Honor your parents. | Mercy/Love |
| 6) Don't kill. | Strength |
| 7) Don't commit adultery. | Foundation |
| 8) Don't steal. | Victory |
| 9) Don't lie. | Glory |
| 10) Don't envy or be jealous. | Kingdom |
| (Minimum Standard) | (Highest Ideal) |

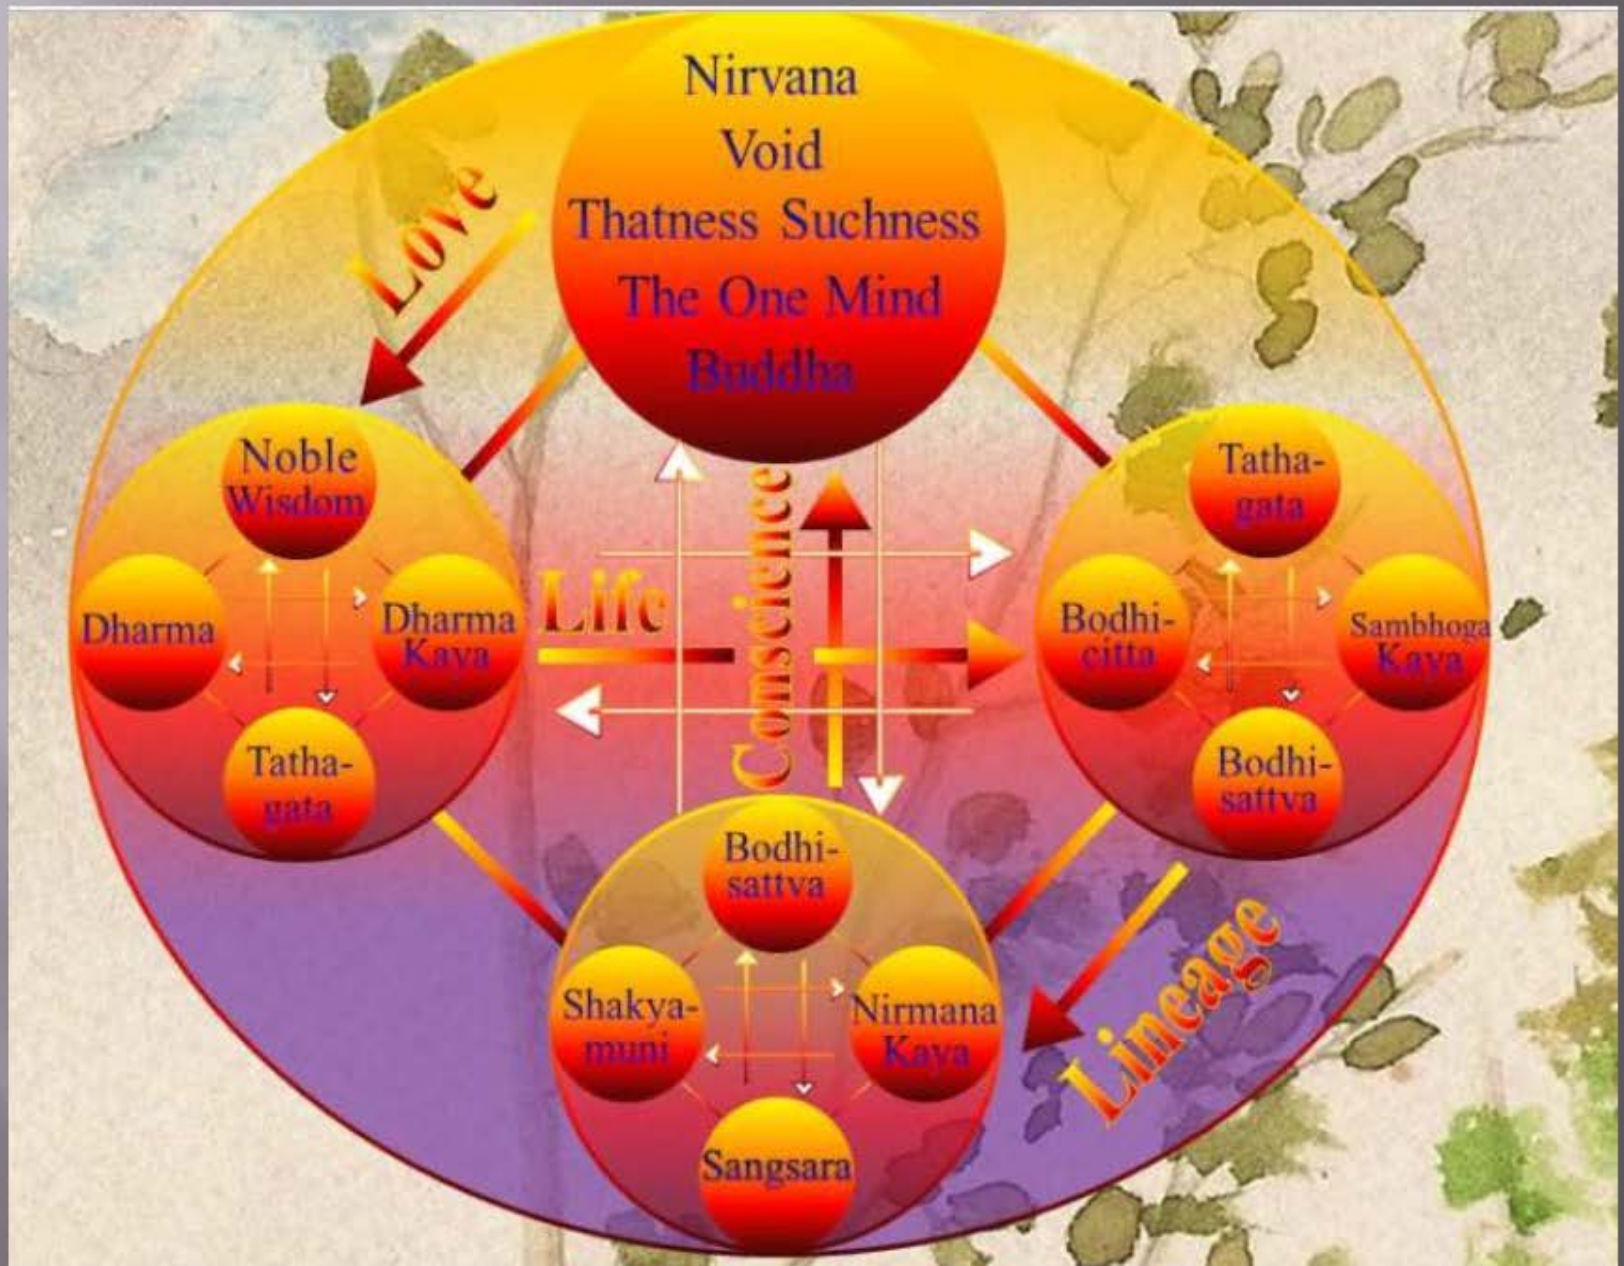

Tree of Life

ORIENTAL PHILOSOPHY

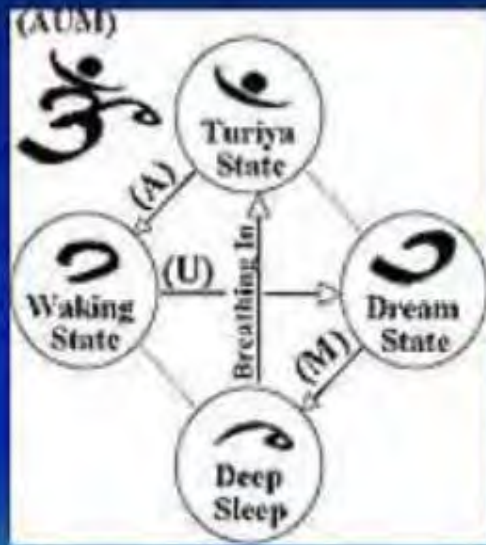

The Parnava: AUM 1 - Hinduism in a Nutshell

Every cycle of the breath transitions through the 4 states.

Between the In-breath and the Out-breath

The Aum plus the silence afterwards..

Breathe In:

Breathe Out:

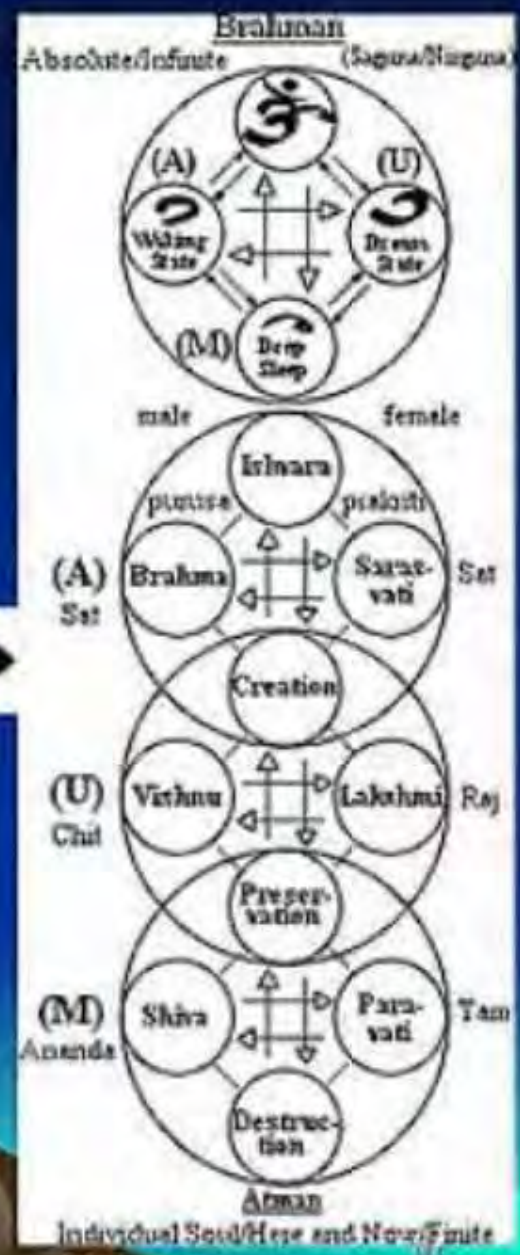

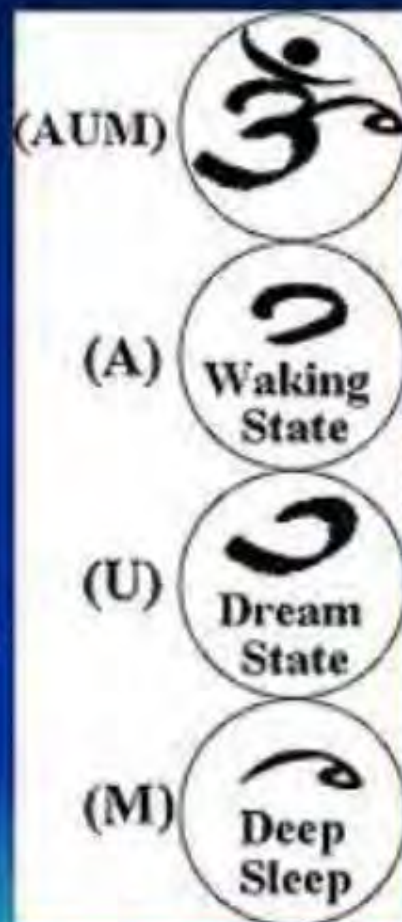

..then returns to one body with God.

The Parnava: AUM 2

The Aum symbol is expanded to include the Creation, Preservation, Destruction (Evolution) process of Brahma, Vishnu and Shiva.

These “gods” are often viewed in a monotheistic fashion as various aspects of energy within the human body. The One God is Brahman.

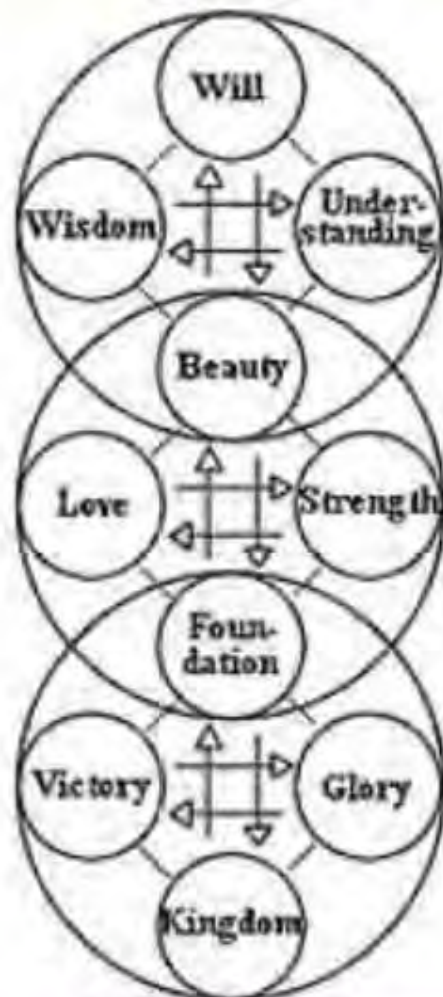

Comparison of Three Trees of Life: Hindu, Jewish, Unification Thought

Hindu

Jewish

Divine Principle

- Then where is God within us? God lies within the mind of the mind. How deep is that mind of the mind? Where is heaven? Wherever God is, there is the Kingdom of Heaven. If God is in the mind of mind, then we know what Jesus meant when he said that the Kingdom of God is in the midst of you. More clearly, we can say that the Kingdom lies within the mind of the mind, or center of the mind.

- Everything depends on and is moved by the true mind. What is the location or base of true love? It is the mind of mind of mind. True love is deeper than the center of the mind, so even God becomes helpless when you talk of true love. Logically, then, God is inside you. You know at least that you have a mind, so there must be a center of that mind, right? Is that mind of mind content, or uncomfortable?
