

The special emissary of True Mother Rev. Sa Kwang-Kee visits Italy

Milano, Italy, 22. June 2014

With a very short notice the European HQ announced the Rev. Sa's tour to some European countries. It was not easy to arrange anything, due to the previously programmed activities, but we were happy to know that Rev. Sa was ready to join us whatever programs we had. So we received him in Milano where he could join a pastors and national financial committee's meeting.

We had to organize witnessing activities and few other issues concerning a new financial organization, but Rev. Sa could have space to give a speech regarding his mission and the providence. It was very clear and inspiring, especially expressing his desire to support the European countries with his own experience and connection to True Mother. We were very happy to hear about the desire to work in harmony with the European President and the regional HQ.

On Sunday he joined the Milano community that held an open air Sunday service in the Monza park, organized by the 2nd gen. He listened carefully to the sermon given by Agostino Rossi, a 2nd gen already married and finally he gave an inspiring speech based on guidance for the Tribal Messiahs and the creation of a "Community of

Heart" as the foundation for all activities and our life. At the end we could have good time together in which the blessed members could share many things with him.

In the afternoon we joined the final day of the famous soccer tournament sponsored by UPF in Monza. Rev. Sa was introduced to some VIP and enjoyed watching the soccer games. He was impressed by the Korean hymn that was played at the beginning to honor the founder of UPF.

On the next Monday we went to the Milano station where, while waiting for the time to leave for the airport, we could spend some personal time together and share about the future of Europe and the Providential time.

It was a very quick and refreshing visit, just to start with such an important mission in the most important providential time of our history. I wish all the special envoys to really be successful in fulfilling True Parents' desire and support the building of the CIG all over the world.

Thank you,
Giuseppe Cali
