

True Mother visits Japan-Korea undersea tunnel, part of the International Highway

Yong Chon Song
November 14, 2016

The Japan-Korea undersea tunnel is the first link of the International Highway project that True Parents first proposed at the tenth ICUS in Seoul in 1981. True Parents hoped to connect all nations, whether rich or poor, through this highway and make possible the distribution of material blessings to all corners of the world.

To earnestly bolster those efforts and achieve this dream, True Mother paid a visit to the underground tunnel site in Karatsu, Kyushu, Japan this November 14, 2016. She first toured the office and listened to presentations given by personnel of the site. Following the presentations, she then went outside, cut off the prepared tape, gave her benediction prayer and then went on a tour of the tunnel. The tunnel is 600 meters deep and True Mother was able to ride all the way down. Sun Jin Moon, international president of FFWPU, Park In Sub, international vice-present of FFWPU, and Yeon Ah Moon, international president of WFWP accompanied True Mother in this visit.

Ever since True Father's Seonghwa, True Mother's work has been solely focused on achieving God and True Father's dreams. Let us all join in heart and devotion so that the day will come when God and True Father will see their dream come true.
