

PeaceTV's Worldwide Training Course For Video Production Managers

Yong-cheon Song
March, 2024

PeaceTV initiated an 8-week training course for video production managers across continental regions starting March 1st.

In today's era of instant communication, True Mother aims to disseminate the news of Cheon Il Guk globally in every language. Consequently, she has provided filming equipment and authorized iPeaceTV to offer this video production training. This enables participants to aid in the development of providence by creating and preserving videos about activities in each region, thereby sharing the words and teachings of the True Parents with people worldwide.

The international headquarters selected motivated individuals under 30 years old, engaged in public mission work on each continent and possessing basic skills in camera operation and video editing. The headquarters helps to accommodate this two-month training, designed to cultivate young talents who will lead video production efforts in their respective continental regions.

This comprehensive training merges theory and practical skills, including scriptwriting, planning, filming, video editing, and distribution. iPeaceTV's goal is to equip young individuals with the ability to produce premium content, significantly advancing the providence of True Mother, the Only Begotten Daughter within the public mission framework.

Looking ahead, these video production managers will maintain regular communication with iPeaceTV to conduct interviews with Cheon Il Guk's key figures in their regions. These interviews will be highlighted in the Hanju Hyodowon Memorial Hall, as per True Mother's declaration. iPeaceTV aspires to evolve into a global media platform that consistently broadcasts a wide array of activities taking place in different continental regions. Further information will soon be made available to iPeaceTV and the respective video production managers in each continental region.

Letters of appreciation to True Mother

Lee Eun-sun, Participant in iPeaceTV's Video Production Training (South America)

Dear True Mother, whom I dearly love and miss,

I am Lee Eun-sun, brought up within a blessed family from the Korea-Japan group of 360,000 couples. Inspired by your guidance that every moment should be used to advance Heaven's providence, I've come to understand that media is the most powerful means to swiftly share Heaven's providence with the world. I'm deeply grateful to have the privilege of being among the first on our continent to undergo this specialized training by iPeaceTV, the national broadcaster of Cheon Il Guk.

Moreover, I appreciate the grace that enables us to use the camera and video editing equipment provided during this training for future projects on our continent.

Throughout this training, I've been profoundly moved by how much you value media and the effort you dedicate to developing future leaders in this arena. Following these 8 weeks, our goal is to quickly spread your message of compassion and providence throughout our continent, aiming to transform it into a 'Heavenly South America' aligned with Heaven's will. We strive to be the future generation of filial sons and daughters in South America, delivering reports of hope and victory, and sparking the revival Heaven eagerly awaits. I fervently pray for your continued health and longevity, so we may bring you joy and success reports throughout your lifetime.

Zancan Chung-nam, Participant in iPeaceTV's Video Production Training (South America)

Dear True Mother, my name is Zancan Chung-nam, a second-generation member of a Brazil-Chile family.

In our modern society, where the consumption of online media is becoming increasingly popular, I've come to understand the importance of ensuring that Heavenly Parent's Holy Community is likewise actively engaged. This involves delivering the messages, direction of providence from the True Parents, and sharing various activities with all global members in real time. Such engagement is essential for participating in the providence of the Heavenly Parent and True Parents.

For this reason, I'm deeply grateful for the iPeaceTV training course you've initiated. This training gives me confidence that we can enhance the bond between Heavenly Korea and Heavenly South America, which are pivotal areas of providence. Under the guidance of Continental Director Kim Dong-woo, Heavenly South America has built a studio within the Continental Headquarters and is now nearing completion of acquiring the necessary equipment for content creation. I am confident that with the required equipment and skilled team, Heavenly South America will greatly advance our mission to widely share and testify about the Heavenly Parent.

I commit to thoroughly learning and utilizing the filming equipment you have generously provided during this training. I intend to use this knowledge to create high-quality content once I return to the South American continent. I am truly grateful to you, True Mother.
