VICTORY OVER COMMUNISM

Victory Over Communism with Bill Gertz

Podcast

Communism didn't end with the Cold War....

Unfortunately, communism did not end with the collapse of the Soviet Union in 1991. Under the Chinese Communist Party, communism is making a comeback with devastating results and must be opposed.

China's communist rulers are on the march. According to Chinese Communist Party supreme leader Xi Jinping, the world will soon be under the domination of China's anti-democratic communist system.

Domestically, Marxist radicals of the 1960s long ago shifted tactics and began their own Chinese-style Long March through the institutions of America. Over the ensuing decades, Marxists infiltrated all segments of society and are seeking nothing less than the ideological takeover of the country.

To meet these twin challenges, a new podcast called *Victory Over Communism with Bill Gertz* was launched in April 2022 by veteran national security journalist and New York Times bestselling author Bill Gertz.

Riots during the summer of 2020 saw radical leftists tearing down statues of American leaders and later produced alarming imposition of Marxist woke policies throughout the country. These actions were not a spontaneous outpouring against injustice. They were the direct result of a carefully-cultivated Marxist strategy of rage to overturn the democratic system and impose a communist system in its place. The counterproposal section continues highlighting facts and truth behind the problems plaguing society today. They do not emanate from an economic system. World problems are rooted much deeper in spiritual shortcomings. The episode's news section looks at woke ideology and efforts by some Republicans in Congress to halt the imposition of radical policies and programs. April 5, 2022

Inaugural podcast of Victory Over Communism with Bill Gertz, an award-winning national security journalist and best-selling author. The podcast series makes the case against Marxism-Leninism with Chinese characteristics, and American Marxism and then offers a unique, faith-based counterproposal to destructive ideologies. Hour-long podcasts are posted every two weeks.

The Victory Over Communism podcast is a project of The Gertz File Investigative Reporting Project, launched in November 2020. The project conducts major investigative and in-depth reporting on a range of national security and international affairs topics.

Each hour-long podcast takes on the ideology of Chinese communism, also known as Marxism-Leninism with Chinese characteristics, by exposing its fallacies and the deadly consequences of Chinese Communist Party rule in China since 1949.

Closer to home, the podcast also tackles the problem of American Marxism, a different ideology from its Chinese variant that has been quietly and effectively advancing radical policies and culture that the podcast will reveal has been undermining traditional American ideas of freedom, liberty, and democracy.

The podcast is not limited to simply critiquing communism and Marxism. Significantly, the biweekly programs also present a unique faith-based counterproposal that applies Judeo-Christian principles to exposing communism's false ideas. This, ultimately, is the most effective way to defeat these destructive ideologies.

In addition to the critique and counterproposal format, the hour-long podcast features news, commentary, and interviews with thought leaders. New programs are posted every two weeks.

Victory Over Communism is divided into four segments: A critique of Marxism-Leninism with Chinese characteristics or American Marxism, followed by a reasoned and in-depth critique of the fundamental tenets and activities of these ideologies.

The last two segments feature the latest news and commentary based on Gertz's decades of experience as a Washington reporter and his unmatched stable of news sources.

Last, the podcast will interview a key newsmaker or thought leader on the topics of the podcast.

The overall objective of the podcast is to educate the public in the United States and the world about the series of threats to freedom and democracy posed by communist ideology and its offshoots. Anti-communism throughout the years has been laudable in its efforts but has been unable to counter the religious-like spread of communism. It is the central tenet of the podcast that the best way to confront and defeat a communist ideology with a reasoned and rational faith-based counterproposal that will provide hope for overcoming the world's problems and seeking to build a better world through education and activities.
