

# 5 Day Divine Principle Workshop

27<sup>th</sup> of November – 1<sup>st</sup> of December, Training Center, Tirana – Albania

---

Dear Brothers and sisters!

From 27<sup>th</sup> November to 01<sup>st</sup> December 2013, we organized a 5 day DP workshop. 70 participants could be part of this workshop, from which 35 were for the first time. Generally the workshop was successful. Participants attended all the lectures with great interest. In this workshop, we had young lecturers, but they presented the lectures very professionally and could get the attention of participants. Even though lectures were very intensive because of time limit, the participants were ready to challenge themselves following each session correctly. Responsibility and team work created a very good family atmosphere between guests and for all of us.

Here are parts of reflections from participants:

*This workshop was the first 5 day workshop for me and was very special... I hope to keep the right attitude after this workshop, to follow Heavenly Parent and True Parents and to create a vertical relationship with them and to give God true love as He did during all this time. I pray for the people who got the truth to keep the right attitude and follow True Parents. Thank you for these days.....*

**Aida Grami-Elbasan**

I came for the first time in this 5 day workshop..... I feel that this workshop was very special because not only my mind understood the lectures, but also my heart felt them... I could understand the values and my responsibilities; I think that I got the right “food”, energy and feelings to continue in different way the coming days.... It is time to prepare myself to welcome God in our life and in this workshop I felt that I can do that.

**Arlinda Elbasani-Tirana**

My coming in this workshop and knowing the lectures more deeply taught me to “breathe” in different way. Now nothing is as before, even I don’t see God as before. Here I learned to pray, to refrain my body from the physical desires.... I found myself, the essence of life, now I know my purpose....

**Ermelinda Kuka-Vlora**

For me it was a beautiful feeling to be part of this workshop, because it made me reflect and think more for everything that I think to realize in my life **to be centered on God.** ... I could learn many things since I joined the Family Federation, and it gave a push, an energy to go on. And thanks to this workshop I could understand that we should be closer to God, be near him in prayer because we are his sons and should be always with him. I could also learn that God is really almighty, but he needs us, needs to be liberated from this situation and need to feel the joy of True Love together with his children.

**Emiljano Hyseni-Vlora**

**This workshop was very convincing, and could give answer to many “whys” of mine.** From now I will be part of this great family and I will keep responsibility for myself to realize everything as it should be done. Five days before I was not this person that I am now. This workshop really helped me to understand my situation and the ways how I can restore myself, and this I could understand only through praying to Heavenly Parent and True Parents. I hope that many young people will join us to understand Divine Principle.

**Denis Allko-Tirana**

In this workshop I felt good. There were things which made some changes in my mind and heart, which is not completely clear now. But I decided to participate in every coming workshop to understand more deeply the Truth, I need to do that.

**Viktor Cepi-Elbasan**

Attending this workshop made me understand myself and gave to me answers for many questions I had inside myself, **which I had but couldn't share before.** In this workshop It became more clear to me that **God exists, but not as I imagined as a high person in heaven ... but that God is inside of us, in our heart and spirit.**

***Arjola Alliu-Vlora***

The knowledge that people get during their life are very important and essential for their maturity, but when they are combined and expressed in one person, this is really something holy and divine. **I didn't think that I would experience such beautiful days in this workshop.... Life is very short and need to choose the right way to live that.** We are a small glimpse in the world; we should be able to change this glimpse in a cosmos of the world and our spirit.

***Qamile Mashku-Shkodra***
