

Divine Principle Workshop held at our training Centre near Madrid, Spain

Manuel Campillo

September 23 - 25, 2022

A Divine Principle Workshop was held at our training Centre nearby Madrid. This workshop was a perfect chance to offer to Heavenly Parent our results from the last Europe and the Middle East 40 days of witnessing condition. A total of ten guests attended. We had a mixture of younger and older guests, creating a feeling of family, caring, and loving one another.

On this occasion, we focus intentionally, not only on giving the regular Divine Principle lectures but also on giving a lot of time for people to share their hearts and personal stories. In this way, a very personal touch was created and people expressed how much they felt an atmosphere of love and care for one another. Among the ten precious children of God attending, it became ever clear how much Heavenly Parent wants to reach all kinds of people, older and younger, more religious types, and less religious types, and the whole staff felt moved to love and care equally for all of them.

In creating the Cheon Il Guk culture, we must heal the heart of every person, and allow them to feel how much Heavenly Parent loves them personally. One guest expresses on her final reflection how much she is moved by our prayers; "you seem to have a very special heart-to-heart connection to God, that I never saw anywhere else, you pray as if God is really your Daddy, your Parent". This was our main goal for this workshop, let people be reborn into Heavenly Parent's bosom.

None of this would be possible without the precious help of our brothers and sisters, helping with devotion, praying, or as a cooking team, staff, spiritual parent, etc. When we unite, miracles can happen, and indeed, do happen.
