

Invitation to Second Generation International Art Camp in Croatia

Richard Buessing
August 22, 2017

Dear Brothers and Sisters,

We would like to invite you to the second generation International Art Camp in Croatia (ACC 2017). This program is inspired by our blessed members who are active artists and second generation art students in Croatia.

The Motto is: **"Be Creative and Unique"**

Theme for this year is: **"Art of Living"**

Croatia is known for many beautiful Islands, therefore we would like to invite second generation to join our ACC on the island of Rab. It is one of the most beautiful Islands and a famous touristic destination. The warm sea water together with long sandy beaches is an ideal environment for our sports activity. The breathe-taking landscape will help to inspire both current and future artist to be creative.

There are many talented second generation artists in various areas. We want to give them an opportunity to explore themselves and share their talents with each other. If you are yet not sure about yourself as a future artist or you still need some more time to find your direction this could be your opportunity.

In the course of the camp, you will hear and learn about the most important things in the world of art. Sharing the inner aspect of art and learning about external techniques from experienced artists will give you deeper insights how to express yourself and how to direct your creativity.

Potential candidates are anybody who study or work in the area of fine arts such as painting, design, sculpting, animation, illustration... from age 18 to 33.

If you are not a student of fine arts or a professional artist and it's just your hobby that you enjoy, you are also most welcome. Take this chance to explore more.

We will have a professional painter, Ji Suk Baek, who has got many years of experiences in an international art school. She will lead the course of drawing and painting. The team of camp artists will also join two other artists Jolana and Goran Petrinic, illustrators of children`s books and comics who will share their passion and artistic experiences.

Besides basic art program there will be other activities like picking olives, building stone walls, shaving sheep and other outdoor activities at the beach such as hiking, swimming and games.

There will also be various lectures on topics such as: life, universe and everything by William Haines, director of education FFWP-UK. "Finding Your True Self" by Radomir Witek, professor of mathematics and physics, who has many years of experiences in guiding young people. "Art of Spiritual and Physical Health" by Jolana Petrinic, practitioner of alternative healing. All lecturers are blessed members who are professionally working in those areas and can give a good insight into how Principles work in our lives.

The maximum number of participants is 20. Registration deadline is September 7, 2017. Confirmation of your registration will be sent within 7 days. [Attached you find the detailed program](#). We are looking forward to meeting you and enjoying the creativity – a great gift from Heaven.

Registration and Contact:
