Professor of Scriptural
Studies, HJI

Respondent

William Lay, JD
Adjunct Professor of
Criminal Justice and
Human Security, HJI

HJ International Graduate School for Peace and Public Leadership is pleased to co-host a special program with the Higher Purpose Forum (HPF). **We invite you to register for *Rev. Moon's Early Writings on Science* to be held on May 7 at 7 PM ET.**

Mr. James Edgerly, Director of Higher Purpose Forum will be the host of this event.

the Principle's treatment of scientific topics as conveyed in the Wollli Wonbon. These will include: elemental forces of gravity and electromagnetism, planetary motion, incandescent color, and applications to human psychology.

William Lay, JD, Adjunct Professor of Criminal Justice and Human Security, HJI will be the respondent.

Rev. Moon's (as yet unpublished) first manuscript of Divine Principle (titled Wollli Wonbon), which he wrote in 1951-52, devotes more than 100 pages to science. Topics range from astronomy to evolution, from electro-magnetism to animal behavior to psychology.

In the background of Wollli Wonbon is Rev. Moon's own life experience, first as a student of electrical engineering at a school connected to Waseda University in Japan, and then as a prisoner in the Hungnam Prison Camp in North Korea where he was subjected to many hours of indoctrination in Marxist dialectical materialism. At the start of his ministry, Rev. Moon saw a need to put forward "the Principle", as both a rigorous counterproposal to dialectical ideologies and a worldview that could be the basis for working towards a future of peace and harmony.

The program will conclude with a Q&A with the audience. We look forward to seeing you at this event!
