October 2, 2016

On Sunday, October 2, local author and previous pastor, Dr. Michael Hentrich, held a book signing for his recently published book, the Divine Principle Study Bible.

The Divine Principle Study Bible contains over 1,000 footnotes that contain explanations of the Divine Principle perspective in their appropriate places throughout the Bible. It also contains a unique topical index that cross-references the Divine Principle and the Bible.

During the book-signing session, local members lined up to purchase a copy of the book and get their copy signed. Dr. Hentrich ran out of books and had to take orders.

This book is also available on [Amazon.com](https://www.amazon.com)

Below is a statement from the author on his new book:

Presenting an easy-to-use Divine Principle Study Bible for lay people and pastors alike, showing how the teachings of Rev. and Mrs. Sun Myung Moon elucidate the Holy Bible and are expressed and demonstrated in it. The Divine Principle Study Bible is the perfect study tool for Unificationists, ACLC pastors and their congregations, and open-minded Christian people who want to see how the Bible and Rev. Moon's teachings relate with each other. It reveals clearly an overwhelming weight of Biblical evidence supporting such Principle perspectives as: the spiritual resurrection of Jesus, the literal Kingdom on earth as Jesus' original mission, man's human portion of responsibility instead of God's absolute predestination, God and Jesus as distinct but united beings, etc. The Divine Principle Study Bible is a "must-have" for any Unificationist pastors or Church members who feel a calling to share the Principle with their Christian friends, or who simply want a deeper appreciation of Jesus and Rev. and Mrs. Moon, and of both the Divine Principle and the Bible. King James version.

This is the fruit of my long-time desire to see this kind of publication in print, and my recent study at the CheongShim Graduate School of Theology in Korea. If, after using this new resource, you have any suggestions or comments, they are more than welcome. Let's collaborate together to further enhance this valuable and useful resource.
