1,567th Cheon Shim Won

prepare song

Bow and Pledge # 3 # 4

opening prayer of gratitude

Most Honorable Heavenly Parent

Beloved True Parents of HEH

Tonight we offer our gratitude and glory to You for allowing this Blessed position of the 1,567th Cheon

Shim Won, for guiding Your children together at this Special Vigil Devotion with one mind and one purpose.

At this Cheon Shim Won, which is True Father's eternal Office and like the warm Womb of our True Mother, we will cleanly empty all our bodies and minds and dedicate pure and immaculate devotion so that only Heavenly Parent's Heart and True Parents's Heart, the Cheonshim, can be resonated. So, please completely govern the whole.

Beloved True Parents of HEH, we know that, even though True Father was full of deeply embedded sorrow and unfairness before this Korean people, He did not speak against this people, but simply continued suffering as a matter of Course, and has triumphed in Love.

True Mother too broke through a rugged sandstorm alone, where She could not see an inch ahead. And when we think that She walked the path of thorns with Tears, treasuring one day like a thousand years, in order to keep that Covenant, saying, I will surely complete the Providence and settle Cheon Il Guk in My generation,' we who became Her children must pray with life-and-death determination to generate the yoksa and an amazing miracle.

We must advance forward, risking our lives at this Cheon Shim Won, so that Mother's Tears and Devotion will not fall on the ground. Even though human minds change from morning to evening, we believe that True Mother's Love toward Her children is unchanging. Do not let us of the GA be children that gives worry to the True Parents. Just as True Parents go through Their Path with Patience and devotion, let no trial or persecution to waver us.

Mother's final gift and supreme hope as our weapon, please make us H soldiers who can strongly and boldly advance and advance again. Tonight, through our earnest wailing and struggling prayer, cause absolute SW, centering on True Father in the subjective H world to be fully mobilized and work, so that we in the objective earthly world accomplish one heart, one body and one mindset, with True Mother, making a condition through which Heaven can perform works, and becoming a condition of devotion that can generate miracle-like results desired by Heaven, as soon as possible.

Earnestly wishing and wanting that our earnest devotion of hyojeong today becomes a wall of fire of the Holy Spirit that wraps around and Embraces Mother's Sacred Body, so that She can be liberated and

released as soon as possible, I offer this prayer of gratitude...

In my name, Kim Ju Won

actively working as an Academy student after Spirituality Workshop activities, a time of struggling to find the existence of the SW and deepen faith in Heavenly Parent and True Parents. As I cried out at the top of my lungs and prayed earnestly, Heavenly Parent warmly wrapped around and embraced me, allowing me to experientially realize Heavenly Parent always together with me.

Upon that faith and to practice true love, I resolved to join the spirituality academy training, actively working the planning of the 3-day and Wednesday Workshop and whatever service is related.

I felt that having to be an example from a low position and carrying out the words and actions that are one with the center, is not easy. Sometimes looking at the others from eyes of my own standards, there were times when I could not completely love people. Whenever that kind of time arose, holding onto the Words given by True Parents, in order to like all people, I deal with people while staying up through the night.

I prayed and have tried to love all the academy students with cheonshim, and this time was so precious that I am grateful for. But I came to personally feel that there is the difference of feeling and inheriting True Parents's Love to correctly practice it.

Spending day after day to resemble True Parents, because the love I could harbor was lacking, there were many times I could not love the students with the Parents' Love. But for me, the moment I deeply realized True Parents's Love, it became the driving force that rises me up again. That moment was when my mother ascended from cancer years ago. In 2022, at the hospital while caring for my mother, alone by her side, I was able to share my mother's final days together with her.

Going through multiple surgeries and procedures, her body became weaker. Even so, she was a mother with a strong heart to always think of her family before herself, asking if my younger sibling, who was an elementary school student at the time had gone to school well.

Whenever I think of my mother in the SW, the love she gave resounds from a deep core of my heart, allowing me to gain heartistic power. After my mother's ascension, there were many times I spent the

night crying secretly for my family. I was thinking that I was the saddest person in this world. But I felt that (tears) it is Heavenly Parent Who possesses a greater sadness and embraces me.

I also came to know True Parents Who walked the path of thorns with blood, sweat and tears. After feeling the Parents Love, I could feel the sadness in a person, and naturally resonating with that sadness, a mind welled up wanting to comfort the Heavenly Parent Who is in that person, and wanting to help them overcome with love so that it is not too difficult if it is a sadness that I too have felt. (tears)

On the path of the Will there are words: A person who can comfort a person in sadness is possible only by a person who has experienced greater sadness. From these words, I realized that I am still lacking to comfort the sadness of Heavenly Parent and True Parents. Therefore, regarding the difficulties or trials that arise to be as a small stepping stone to comfort HPs, I am trying to overcome them with gratitude.

Looking back on the academy I came to personally feel True Parents, Who are loving me while practicing true love. Coming to know Heavenly Parent's Dream and the Will, I came to feel the world differently, as I became able to feel more love and share that love.

Rather than what I had accomplished in the past, I came to know, I realized that it is right now that I need to advance forward with True Mother on the path of the Providence. Now, in order to convey the love I received from Heavenly Parent and True Parents and spread it to a wider world, I resolved to go with the Heavenly South America Cheonshim Won Team. (tears) Even in the short time of 3 months, I will plant love so that True Parents Love can blossom, where They offered Devotion.

I will put in all my heart so that the devotion can connect to H Central and South America. Holding onto Mother's Words that the Truth will surely be revealed, I will hold onto H Mother's Dream and move forward toward a hopeful future... Mother, I love You

Testimony

She bows

gratitude

First daughter among 2 daughter and 3 sons

I followed my parents to church as a 2nd gen, rather than a deep and independent faith. Having an introverted and timid personality, I frequently felt lonely in the church life, and there were not many friends my age. There were many times I disliked going to workshops.

Nevertheless, because my heart always felt warm and full of grace when I returned from a workshop, I suddenly attended church WSs and general WSs. As time passed, seeing the friends, older sisters and brothers with whom I led a life of faith, gradually leave the church, I too shook at times. But because the church was always like the warmest hometown to me, I could not leave completely.

During the days of preparing for Sun Moon University, I offered sincere devotion for the first time. I although I entered the desired university, college life was not easy.

From the 2nd semester of my first year, I came to experience burn out and depression amongst difficulties in relationships and academics. And without overcoming those problems, the difficulties continued for a long time.

Ignoring the voice of my original mind and failing to hold my center, I could not receive the feeling that I was living life properly.

Watching friends and acquaintances change through the spirituality Workshop and testifying with tears, my mind which also wanted to change began to grow inside me, but amidst very realistic reasons and fears, I could not easily participate in the Workshop.

In that way, I became a university senior, and from the 2nd semester of my senior year, I moved into the SM CARP Center coming to live there.

Within the daily prayer meetings and vigil devotions and the cheonmyon Sunday Services and community life, I began to recover my heart little by little. I could feel true love within the group life and was able to retrieve my original bright light that had been lost.

However, an unresolved fear and emptiness still remained within my heart. I came to think that, if I graduate in this state and go out to the world, I must ultimately collapse. And feeling that right now was the last opportunity, I resolved to take part in the Workshop.

However, as the seasonal spirituality Workshop and other schedule overlapped, participating seemed virtually impossible. Yet, like a miracle, the professor shortened the two-week course class. Looking back even before that, Heaven was already holding onto my life and guiding me. I engaged with the heart, 'Let me become a self that can be completely reborn during these 40 days and offer it up to True Parents.'

On the fifth day, when I entered the Special Prayer Room for the first time, I felt a warm energy wrapping around my body. Tears began to well up. While offering prayer before the preparatory praise, I earnestly prayed, 'I truly want to live attending True Parents. I want to feel True Parents's Heart.'

Afterward, during resonance prayer, I repeatedly cried out, 'Aboji' 'Omoni'... The heart of a child seeking the Parents began to rise from the depths of my heart, and that HPs had come to me. In the midst of that, during a Life Principle lecture, and after praying, 'Please let me look through the Eyes of Heavenly Parent,' and holding my partners' hands, an inexplainable gladness and heart of love rose from the core of my heart.

(Tears) I came to hear and convey (I spoke), 'Heavenly Parent says, Heavenly Parent is so, so glad to meet you, and is so, so, thankful. Heavenly Parent Says, 'Thank you for coming, and that Heavenly Parent loves you.'

And at the moment I said those words, uncontrollable tears burst out. I came to feel that, even if it was only a little bit, Heavenly Parent's Love, which cannot be expressed in short words, had a feeling of sorrow and gladness that washed over me simultaneously.

I had many experiences while offering devotion at Cheon Shim Won. As I failed to properly keep devotion and would lose to my body (exhaustion), experiences of fear and confusion arose in my dreams. One day I fell asleep while sitting up praying and in a dream, I was in a situation of being dragged away by satanic temptations and could not wake up. But suddenly, I heard the sound of a chanting prayer where several people were crying out, 'Let us become one with True Mother.' And at that moment, my mind snapped awake, and I began to cry out with them. At the final moments of crying out, 'Let us become one with True Mother!' I was able to awaken from my dream.

Through this experience I came to feel more vividly that Heavenly Parent and True Parents are actually Present and protecting me.

In the latter half of the Workshop, I experienced actually realizing the heart of loneliness. Looking at the

Workshop Center, which became empty as trainees left one by one, an unexplainable sorrow rushed over me, especially when I saw the Seonghwa Spirituality Workshop students returning after finishing their graduation ceremony, my tears did not stop, thinking, 'These children who have returned with such difficulty, I wish that they would not turn to the world again and not become stained. I sincerely wish these pure, snow-white children will not receive hurt when going out to the world and will return again.'

As time passed I came to feel that it was perhaps, not simply a feeling of my own, but a part of the Heart of Heavenly Parent. And again, I experienced a deep loneliness and thought of Heavenly Parent saying, 'Aboji, Omoni, I'm so lonely.' Then, True Mother's Image came to mind, and I came to realize that the existence I had yearned for that much, had precisely been Heavenly Parent and True Mother. Feeling a true love and comfort that transcends my physical parents, I shed tears for a long time. And afterward, the loneliness inside me began to disappear little by little.

Through the spirituality Workshop I came to realize that my life up until now has been within Heavenly Parent's Love and grace, even the time of depression when Heavenly Parent gave me the grace of special ansu and constantly held onto me through surrounding people and public officials.

And on the third day of offering devotion after the Workshop had ended, I saw a great Light descending on the Cheon Shim Won and being conveyed to me through the surrounding people. (Tears) Seeing that appearance, I realized that Heavenly Parent gave love to me and happiness through the people surrounding me. Realizing Heavenly Parent had constantly guided me and loved me, my tears did not stop.

From an indescribable heart mixed with gratitude and sorrow, after the Spirituality Workshop, I came to have a faith of my own centering on Heavenly Parent and True Parents, rather than just my physical parents. However, as my heart began to rise and fall, I came to face my own weakness and limits a lot. (tears)

Even if I made a resolution, it did not last long, and many times I lost to my body. In order to overcome this, I would write a devotion on the palm of my hands. Even on days when it was difficult to offer bows, carrying a mind, 'Let's try offering even one more bow.'

And, although it was difficult, before I knew it, I could increase the bows to 43. In that process, I came to

obtain an important realization. Rather than hating and pushing myself, it is important to embrace my insufficiencies with a parent heart and move forward one step at a time, and that it is not about changing perfectly at one time, but even if one falls, to rise again and connect more to devotion little by little.

Even now, I'm still a lacking person. However, what is clear is the fact that, when I was about to give up, Heavenly Parent did not give up on me and was holding onto me until the end.

In the future I wish to live while conveying Heavenly Parent's Love and grace I received to even more people, leading the children who wander back to Heavenly Parent's Bosom, and not shake in any environment, returning to the love I received. TYSM

40-day Japanese Workshop trainees

'The Love of the OBD'

HJ Report

Uno Takanori

Japan Training Dept Team

I want to introduce some people with applause, the trainees of the Cheonshim Resonance Prayer Workshop

We have 805 trainees participating in this Workshop. And up until now we have had 4,531... applause

Looking at the CS robes, it's very beautiful, and if Mother saw this, I think She would be very joyful. Yes.

Do you agree. TYVM

Among the trainees, many 40-day are participating together and also the 3-day decided (some of them) to join the 40-day.

With the Japanese 40-day Workshop, (I had offered a report about the 282nd Workshop, and I thought I would not be offering a report for quite a while, but here I am and I will do my best)

True Mother: The entire world is in great chaos. And that is because they do not attend Heavenly Parent. Because we have entered an era when we can attend Heavenly Parent, all problems of the world can be resolved only through true love of Heavenly Parent through True Parents.

The 60th Parents Day is important. All BFs must awaken to the fact that they are the chosen people and fulfill their responsibility. Starting from H Japan, they must deeply, experientially realize and go forward to educate, Cheonbumo Ron and the Great Epic of the Chosen Han People of Korea.

We must make sure that H Japan inherits the authority of the Cheonwon Gung Entrance Ceremony.

The Mother and son relationship cannot be severed. I believe in the Japanese family members. I know the loyal heart and devotion with which they follow even amidst difficulties.

Please convey to all Japanese family members that I love them. Aju.

Like this, She is H Mother Who believes in H Japan more than anyone else. Even while She is in the midst of (an extremely) difficult situation (at the risk of Her Life), let us offer gratitude to our Royal Mother, our Wang Omma, Who always thinks first of Her children and encourages us... applause (and he bows to True Parents Picture) TY

Engraving these Words in our hearts, our Japan teams, staff members and trainees have run doing our absolute best to fulfill our responsibility and now we will watch the video containing that...

video

testimony... When I saw my younger brother wanting to go home, I thought my devotion was lacking and offered more, and there were times when I could not feel grateful due to the tight schedule, but when I saw my brother improve, I was encouraged and by the gift of the HJ Offering Papers and my and his being able to return to the church was because of the tower of devotion I accumulated for my younger brother because of Heavenly Parent and True Parents establishing the devotions for me and my brother.

Seeing the Workshop trainees at the end, I felt the mind that I and hopefully more of us need to take it right away, and there was an opportunity. We felt we need to love the nature of the complex in Mother's place and it became such a precious time.

Main Characteristics:

Lectures

This time something new, Mr. Yokoi offered the 'Absolute Sex' lecture, and a very good result of 2nd

place in the evaluation. A time to keep purity and marital fidelity and establish a heartistic culture and family, also mentioning what must not be done, so that one listens while realizing the correct lifestyle, and also satanic weapons of alcohol, cigarettes and drugs. I

Testimony: What was impressive was realizing it was wrong to think of not receiving the Blessing. Because my parents did not get along very well, I did not have hope for myself in the Blessing. I thought that living alone was better.

Last year, I received the Blessing. But due to matters of not developing affection toward my partner and skin ship, I felt I disliked it. And various thoughts were entering while spending time together, so that this 40-day time was very difficult.

Attending with my partner, during the Workshop, I realized that the negative things I was experiencing were not really me, and that I wanted to love my partner and that was the real me.

After the lecture, I saw how humanistic my thinking was, but afterward I could look upon my partner with developing my original heart and a loving heart. This is my 3rd 40-day Workshop, but I never had this Absolute Sex lecture hit so deeply. I was able to feel that there's no greater grace and gratitude than receiving this education.

Ultimately, I think our goal is to return to our original self, and because they convey and teach us how to walk the path based on True Parents's Word, it seems that even greater grace descends, and it is a period when the grace of negative spiritual separation is happening all day, that Heavenly Parent grants even stronger realizations. Applause

First place in the experiential grace is the Cheon Shim Won devotion. TY to HyoJN, HeungJN and True Father always with us performing their works and PL who does his absolute best to fulfill True Parents Words on earth and the staff.

The team that was the center was precisely the Praise Team.

Although the Japanese team of 40-day have no separate practice time out of the schedule they sacrifice any spare time and many became one and challenged new songs directly written by the HJ Choir Team of

the HJ Church...

Regrading the 3 new songs:

'Heaven's OBD'

I asked the composer about the meaning in this song, and there is a back story about it. True Mother is achieving miracle-like results for the Providence and this song is to witness that to the entire world and all humanity. And it was directly afterward that the Autobiography was published, so that this was prepared with God's Guidance and Revelation

Highlights of the song:

'Our compassionate True Mother Who rebuilt the land of death into Heaven's Land,'

'Let us all share it, with our soul's poured into it our song of true love

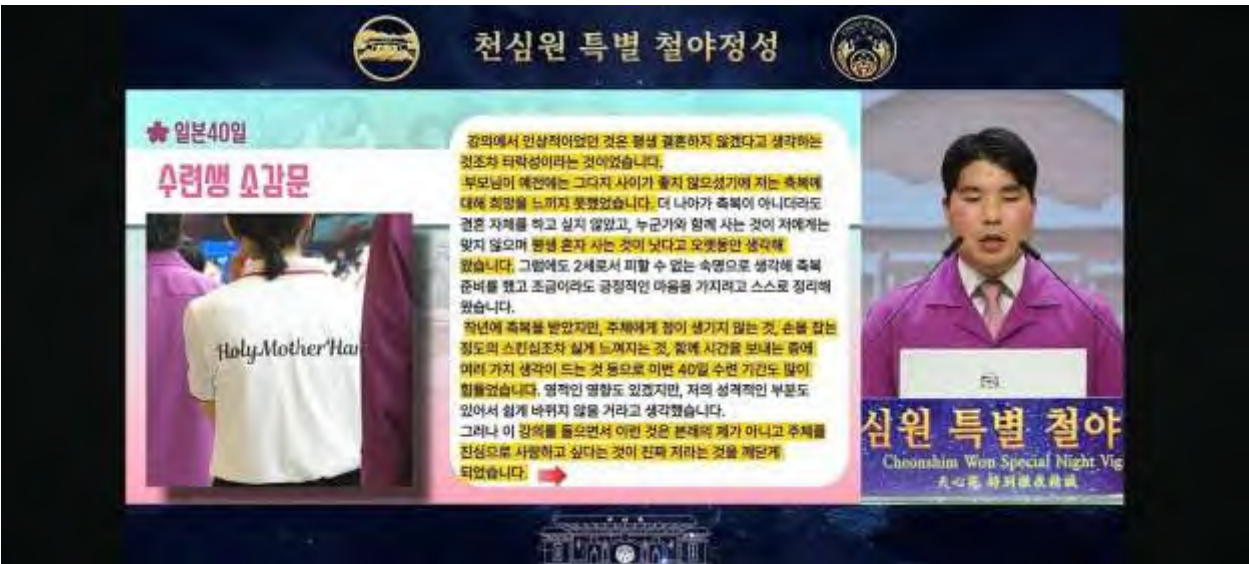

The True OBD, beloved by Heaven.

The noble Mother whom all things in the world have long awaited

She pours down Heaven's great Blessings in abundance'

Is it not such a grace-filled and beautiful song...

These songs you can see on Cheonshimwon TV and You Tube Channel

testimony: grace through this song... Offering praise with the lyrics in Korean was not easy, but how great to offer this to True Mother at this time, to be at least a little comfort to True Mother and Her Holy Body, I wanted to offer this in Korean, and with the heart of conveying my heart to True Mother together with the other members and the very next day, receiving the news of the extended, I experienced the SW working. That news because Heaven used each and everyone's devotion...

Next song, 'Net of Light' through receiving inspiration while in the Cheon Shim Won devotion, sparked like a grain of light and many like matching hands with each other like a single net that Heavenly Parent is call each to perform, and this multitude calls on Heavenly Parent and True Parents, praying all night long, and the words to scoop up as well as the meaning to connect is this word.

The first shining grain was True Father and then members and then extended hands and were connected with True Mother. And as if sketching it in writing, the grains of light were connected and became this song. I hope it extends that we give all our heart and devotion...

That this song was made during the Cheon Shim Won devotion, it can be said that it was inspiration from the Heaven...

testimony: She saw us as grains of light connecting centering on HPs to form a net that saves humanity, and I thought, 'Ah, that's what net meant'...

Then, in the lyric, very directly, there were the expressions of Heavenly Parent and True Parents, and I was so touched by them shouting Heavenly Parent and True Parents's Name.

And at the very last determination during the vigil devotion, and while singing that song, it was a feeling that was close to prayer, and with such a feeling I was able to offer praise, and it was amazingly good.

As this trainee said, she thinks that 'net' means that the devotions we offer gathers into a gathering of lights so that even though one person may be small, when gathered lights, we can achieve greater things.

next song, 'Wings of Promise' Looking at the heart contained in the song, the 'wings of light' symbolizing the infinite possibility and promise and creativity that God bestowed upon human beings. It contains a message of resolution and hope that no matter what kinds of trials arise in the future, one will believe in these words given by God and powerfully fly upward.

Looking at the trials occurring in Japan and True Mother's hardships, we have many, but if we discover hope in the resolution and believing in the wings God gave us, I think and believe that we can truly soar higher

highlight video

'riding the headwind, we can go even farther. With prayers in our hearts, we can reach that rainbow we promised together. The world will change. The future will change. Spread your wings and ride the wind'

Testimony: praise team leader... I truly love the lyrics, 'to be able to reach that rainbow I pledged with you' With prayers, the world changes, the future changes, unfolding you wings and riding the wind. A rainbow is a phenomenon that can only be seen when the rain stops and the sun rises, just like the current reality which is painful and difficult, I feel that Heavenly Parent shines upon us with the light of true love...

The message is (timely to now and to us as BF's and children of Heavenly Parent and True Parents) the message is that the ones who change the world are us, and the ones who change the future are us. It reaches the depths of my heart.

Yes, Heavenly Parent is truly alive and working through our prayer and devotion (SW inspires songs most inspiring to be sung to Heavenly Parent and True Parents, inspiring to be sung to 2nd gen trainees, inspiring to the atmosphere that HyoJN, HeungJN and True Father work through for 2nd gen's help and growth, and most powerful for witnessing that attracts the mobilized SW, especially when created and sung by pure waters. There are none like them ever before in the world.) We come to believe that we can bring about the new Heaven and earth.

And this song has deepened our faith. And what is surprising is that the rainbow within this song, actually during the graduation ceremony, it appeared magnificent in the sky. And Director Chun Yu San also spoke of it during his HJ Reports.

But that rainbow was witnessed in another place on that very same day as well. That place is H Japan. That day, I don't think it was coincidence. When about 70 American youth came on behalf of Japan and conducted N.A.B.I. activities together on the street in Japan, it was that same day that a rainbow appeared circling the sun... applause

We know, that it was by no means coincidence. We know that when we come together (with devotion and witnessing heart the same with utmost earnest, SW is mobilized, True Father is moved and), miracles take place.

We know, that Heavenly Parent never leaves H Japan. Heavenly Parent is alive and performing works even at this very moment..

Break

Hoon Dok Hae

True Parents Who considered suffering as a matter of course, endured and triumphed. The Creator God Created us as children and wanted an ideal world of freedom, peace, equality and unity. However, at an immature time, the fall of the human ancestors motivated by excessive greed and desire caused the world to fall into an unhappy world punctuated by oppression, conflict, discrimination and division, which is alienated from the original world that God had realized at the beginning of time.

Due to this God, Who is the Vertical True Parent of humanity could not become the Parent and we ended up in a position like total orphans who are not related to God.

Father did not speak even though He had a mouth, even though He had much deeply embedded sorrow, 'han', before the Korean people. He endured.

Mother also...
