(by Keith McCarthy)

This is an advanced seminar to explore and explain the philosophies behind the volley of attacks on America's history, culture and ideals. The seminar presents a clear path forward for all patriots, believers, and people of goodwill and conscience to build a unified front against the domestic and global forces intent on destroying America's founding principles.

The destructive policies and culture of the Woke and Marxist agents have brought America to the brink of an existential crisis. By manipulating the meaning of words and creating a false identity crisis, they have masked their true intentions. They seek to destroy our backbone as One Nation Under God and replace it with a culture without God. By knowing the purpose and ultimate goals of these ideologies, you will be armed with a broad, unifying worldview that overcomes the barriers that divides America's patriotic champions.

These sessions light the path to rebuild America's healthy, family oriented, law-respecting culture. We look forward to your participation in our conference.
