I would like to share a photograph that my father treasured very deeply. He kept this picture by his bedside since I was a small child and for as long as I can remember. His love and dedication to True Father shines through his beautiful smile"

The ascension of Wesley Samuel can be an opportunity for us to reflect on the meaning of the 430 Couple

Blessing in 1968 and the 43 Couple Blessing that followed it in 1969. Wesley's couple is a member of the 43 Couple Blessing.

True Father's words are recorded in the Cheon Seong Gyung as follows (pp1349-1350).

Meaning of the 430 Couple Blessing

What is significant about the 430 Couples? That was the year Korea's history reached the year Dangi 4300. In the year 4300, the gates were opened so that any Korean family could enter the Kingdom of Heaven, no matter what type of family they might be. Even the groups that opposed could enter. No matter their tribe or national origin, no matter if they were opposed, the people of Korea, even if they were the descendants of butchers, as long as they were human beings, they could enter the Kingdom of Heaven.

So the 430 Couple Blessing marked the time when the whole tribe would contribute. The era of selectivity gave way to the era of universality. For instance, if the Kim clan were chosen by God, everyone with the surname Kim could enter one after another. Then in 1969, I blessed 43 couples representing the many nations of the world. I gave the Blessing in Germany, the United States, and Japan. These 43 Couples were the counterpart to the national level 430 Couples.

What this meant was that all the countries of the world received the privilege given to all the tribes of Korea to participate in the heavenly realm. This was the internal foundation for all the nations of the world to be able to contribute. If this relational base were connected, the tribes of the external world could be connected to the Korean nation that stood on the standard of indemnity of the internal world. May God bless you and your families!

Sincerely,

Richard
