

## WFP USA 2025 Giving Q3 Schools of Africa Fundraiser – Goal Surpassed and Dreams Realized

Katarina Connery  
October 11, 2025

**Goal:** \$15,000

**Raised:** *Over \$20,000!*

Because of your generosity, every funding request from our partner schools across Africa can now be fully supported. Together, we've made sure that students, teachers, and communities in **Mozambique, Kenya, Rwanda, Liberia, and Guinea-Bissau** have what they need to continue learning, growing, and thriving.

### Mozambique: Water and Dignity at The Sun of Mozambique Secondary School

This year marks the school's 30th anniversary, a milestone made even more special thanks to you. With your support, the school will soon have **new water tanks for student and teacher restrooms** and a **repaired photocopier** that's vital for exams and classroom learning.

For thousands of students, these aren't small improvements, they are daily reminders that their education matters. Graduates like **Dr. Filipe Mucondua**, now a district health director, trace their success back to classrooms built on hope, community, and care.

### **Kenya: Restoring the Heart of Handow Secondary School**

Your donations are helping to **renovate the school's dining hall**, a vital space where more than 600 students gather for meals, connection, and community.

As student **Marion Arita** shared, "Because of you, I walk into class each day with hope in my heart and confidence in my future."

Handow is more than a school, it's a place where young people are discovering leadership, teamwork, and faith in themselves.

### **Rwanda: Empowering Women Through Vocational Training**

At New Hope Technical Institute, your contributions will help **fully equip the new Professional Training Center** with tools for **culinary arts, hairdressing, and tailoring**.

These tools open doors. Graduates like **Anne Marie**, now a salon owner supporting her family, and **Antoinette Nibomugisha**, who started her own dressmaking business and now mentors others, embody what empowerment looks like in action.

Each sewing machine, washing station, and fryer represents opportunity - and you helped make it possible.

### **Guinea-Bissau: Brighter Classrooms for Brighter Futures**

At Sunac Elementary, your generosity ensures that the school's **exterior and classrooms can be repainted**, creating a safe, clean, and inspiring learning environment for children in one of the region's poorest communities.

As one parent, **Mário Cú**, expressed, "I'm very happy that my daughter is a student at Sunac. I want to thank WFP for their support."

Sunac continues to stand strong - offering consistent education, even when other schools must close.

### **Liberia: Supporting Teachers and Classrooms**

Funds raised will also provide **teacher salaries, classroom updates, and sanitation supplies** at our partner school in Liberia. For many children, these classrooms are their only chance to receive an education - and your support ensures those doors stay open.

Your impact goes far beyond bricks, paint, or equipment. It's seen in the **faces of students who can learn with dignity, teachers who can teach with confidence, and families who gain renewed hope** through the power of education.

Together, we've proven that love in action changes lives.

"When we give and forget, true love flourishes."

- *Dr. Hak Ja Han Moon, Mother of Peace*

From the bottom of our hearts - thank you for believing in these young people and in the future they're building.

Because of you, 2025 will be a year of restored classrooms, running water, vocational opportunity, and hope fulfilled.
