

# Friday Open HoonDokHae Discussion

## Why is History repeating?

Bucharest, Romania, 16. October 2015

**A**nyong Haseyo, from Romania CARP!  
From downtown Bucharest, Romania, positive energy is spreading towards the rest of the city. We feel as if the Peace Center is not just the heart, but represents the spiritual core that can support the people living here, either young or old, atheists or spiritualists, dreamers or programmers, children or parents. As long as we keep our prayerful heart awake, there is a powerful message that needs to be shared.

Last Friday, on the 16th of October 2015, on a chilly weather that challenged our participants, we bravely discussed about the meaning of history, about the reasons of its repetition and how the past influences our way of **thinking and lifestyle. Even if “the past is in the past”, it still can spread its tentacles and influence us if we try to disregard it.** Just how ancient cultures used it in order to educate their children about who they are, present generations can also benefit from this kind of knowledge.

The text selected included True **Father’s words and the opinions from** one historian and one novel writer, all

offering insight about what we can learn from history and why it has such **an interesting “personality”**. We included two challenging questions in order to guide the members:

1. Can you recognize any case of **“history repeating” in your own life?**
2. What can humankind learn from history? What can I learn?

The opinions shared were very precious for understanding the value of time: the changes that concern the depths of our mentality take a few generations to be digested and rooted. Laws as well as politics depend on the transformations that take place from one historical period to another, we set up these things as boundaries in order for the mistakes to be avoided or at least better controlled.

The representative of another team stated that we are the generation that makes history for the generations coming, so that we need to shoulder the effort of preparing for a better environment and setting for the next generations.

We tried to understand history also from the point of view of life offering us the chance to make a mends, to fix past

mistakes through our different relationships. With sincerity we can **admit that the problems we avoid don’t** just go away by themselves but they become recurrent until we fix them or somebody from our descendants. So history holds also this understanding concerning responsibility. And we can avoid creating a history of mistakes if we live according to strong and positive life principles.

As a conclusion we can say that history has not taken its direction accidentally. Behind history a great power has worked to decide its direction. In the present age we are the fruit of history and the ancestors of the future so we cannot let time pass in a cheap way. We must cherish and use wisely every moment on this earth remembering to also leave some wisdom behind.

We hope that this meeting and discussion time was useful for everyone, we could feel their sincere hearts and willing desire to discover something new.

With prayerful hearts and gratitude, Romania CARP brothers and sisters.

# Purity education Program

## My Life, My Family, My Lineage

Bucharest, Romania, 13. October 2015

**G**reetings from Romania!  
We are so grateful to offer this report in front of Heavenly Parents and True Parents.

This Tuesday, we organized Purity Education event. Our subject was 'My life, My family, My lineage!' We shared about importance of lineage.

In the beginning we had presentation about 'Lineage'. What is the meaning of lineage?, How important is lineage? And How important is my standing point now as historical result of all my ancestors.

Afterwards we made 3 teams and we tried to make 'Lineage Domino' together in order to experience importance of lineage. All participants put a lot of effort to be successful this Domino. Even though sometimes fell down many of pieces but still we tried until the end. The message from this 'Lineage Domino' experience was JeongSung of our ancestors. Some of our ancestors had difficult life like Domino pieces falling down but still some of them try to make it right. It is a lot of effort even we cannot totally understand.

So after this experience of Domino the lecturer emphasized that we are the historical result of all this JeongSung. And now we have choice, if we will continue this lineage like before, make it worst or try to make it better and pure.

In the end of this program we had sharing time in team. We shared these 2 points, What kind of characteristics you received from your ancestors? What kind of characteristics do you want to give for your future children and descendents? So all the participants felt we need to find a way to make ourselves better for our children and descendents. Afterwards we had presentation about how to make it better. The most important things is Sexual purity, prepare for our future spouse. Because now, this young age is the period of preparation for the future. The period of focusing that how to

develop our character, how to grow our heart and find out what is the real purpose of our life.

All the participants could feel the importance and value of their life. And importance of preparation for the future. We wish this program can encourage Romanian young people to keep Sexual Purity in order to make beautiful family in the future.

Thank you so much Heavenly Parents and True Parents.

# Two Day Divine Principle Seminar

## How to restore Human Values

Bucharest, Romania, 3. October 2015

Greetings from Romania!  
I would like to start this report with offering our heart of gratitude for Heavenly Parents and True Parents. We concluded 5th week of 5th 40days JeongSung Condition period for JeonDo with 2Days Divine Principle Workshop.

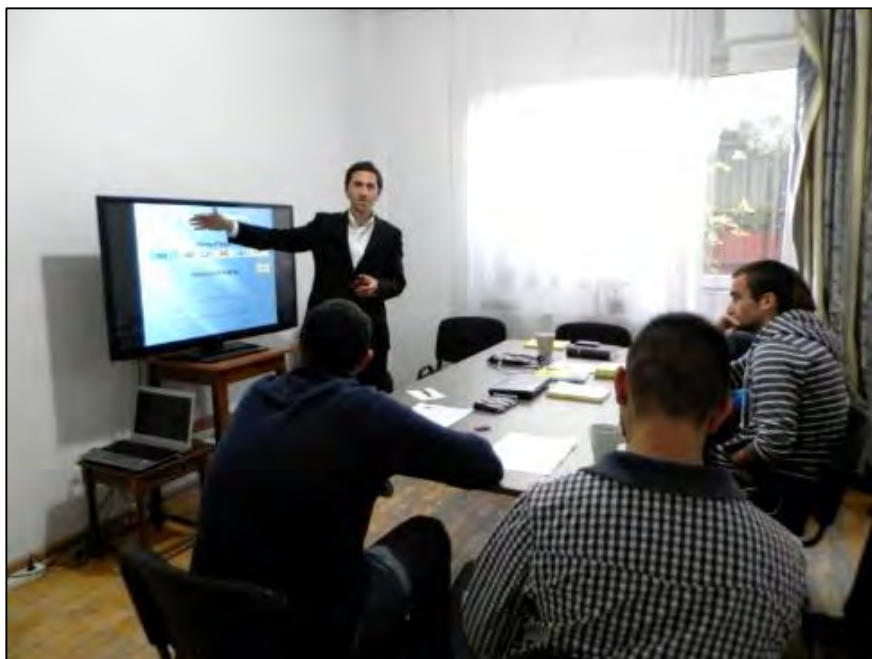

This weekend many of our guests and CARP members left to their home town. But still we could receive the new guest who has a lot of desire to study Divine Principle. We were so happy to see his pure heart and a lot of passion.

In the first day of Divine Principle lectures were **'Principle of Creation', 'Human Fall', 'Eschatology and Human History', 'Messiah' and 'Introduction to Restoration'**. All the lectures had very clear messages. **Specially in the 'Eschatology and Human History'** we all could understand how important Era we are living and we have such a responsibility to fulfil **God's purpose** of creation.

After lunch we had one sports project organized by one of our Active CARP member. Because it was really beautiful weather so we went to park and play basketball in teams! All of us really enjoyed playing and shed sweat with smiley faces. We could be closer to each other through sports and we could share brothers and sisters love in the end of this project!

The end of the day we had sharing time as family. This time we made questions box, so we choose questions from this box and we discuss about these topics. We could find out so many different feeling and opinions towards Divine Principle and our life. So this sharing time made us our closer to each other.

Second day, we started the day with joyful morning excise and morning inspiration **'HonDokHae'**. In this time, we read the message **'What is the life of attendance?'** from True Father's Words. Because we are

living the era of attending Heavenly Parent and True Parents, but sometimes is difficult for us to practice it. But through this time we could get clear message the meaning of attendance and we found out many ways to practice it.

In the morning we had 2 more lectures from Divine Principle **'Parallels of History' and 'Second Advent'**. All the lectures had very clear message with such a excitement to share this Truth. And in the end we presented about CARP membership. Because after 2 Days Workshop they can be member of CARP and they can participate more active. The participant was excited about program and activities. We will guide and support him through our activities and Divine Principle study continuously.

We are so happy to offer this weekend in front of Heavenly Parent and True Parents. At same time we want to invest to find more new young people to offer greater joy for Heavenly Parent and True Parents. Because we all feel young people are the hope! We would like to offer all this internal, external

result in front of Heavenly Parents and True Parents with our sincere heart.

Thank you so much Heavenly Parents and True Parents.

### Reflections from Participants

#### Laurentiu (29)

In this WS I had the opportunity to develop my biblical knowledge. From the moment of creation and origin of sin. I

discover that real fall was Eve and Lucifer fell and follow by Adam. The forbidden fruit was **God's interdiction** for first human beings to consume the act of love before arrive to maturity. I liked singing and sharing as family. I was happy to make sports so I would like to suggest you to make more sports activities. Thank you so much for Romania CARP!
