

Friday Open HoonDokHae Discussion

The Importance of Education

Bucharest, Romania, 27. May 2016

A Anyeonghaseyo!
On the 27th of May 2016, Romania CARP organized in Peace Center – Bucharest, the weekly HoonDokHae meeting. This week discussion topic was: “The importance of education”. The focus of the activity was on finding value in education and finding better ways to study.

As HoonDok material we used passages from True Father’s autobiography that focused on the importance of education and how important is to find value in study.

To understand deeply the words of True Father and also in order to share

our thoughts on the topic, we separated in four teams.

After everybody shared his opinion with the other members of the team we gathered together for the conclusions. From each team a representative shared the conclusions of their discussions.

Everybody was inspired and the representatives of each team shared that “education is important in order to prepare for the future”, “education is a long term investment”, “education is the base of culture”, “through education we find ways to improve ourselves and society”. “without

education we are vulnerable and we don’t have a clear path in our life”, “if you receive education you can develop your own ideas”.

An important point that we emphasized is that is important to find value in your studies and to have a higher perspective. Also education should teach people to live for the sake of others and to offer solutions to the problems that we face in our society.

The guests where inspired by the event and gave a positive feedback.

Thank you so much Heavenly Parents and True Parents.
