

# 15 Days Divine Principle Summer Workshop

Moeciu Sus-Bran, Brasov, Romania, 15. - 30. July 2016

**A**nyonghaseyo! Greetings from Romania!

We are so grateful to report the successful the summer 15 days Divine Principle workshop to our Heavenly Parents and True Parents.

The WS was full of passion to study Divine Principle. The WS was operated by positive ownership to hold question of DP and get answer by discussion.

The new style of lectures was very effectively guide the participants to be subject partner of DP studying.

The WS had composed by 3 order growing period, The formation stage(DP first part), the Growing stage(DP second part and True Fathers` Life1-10), the completion stage(Life of Faith1-10, SES introduction)

There was day of harmony and Mountaineering between the each stage for reflection and deep relationship.

The each day begins by HoonDokHae(reading, discussion, sharing) with a lot of inspiration. There was action task(Finding the practical way apply DP) by team work. There was DP give & take action after dinner for better understanding of DP. The each day closed by Shimjung Diary for daily reflection.

This year, young people joined the workshop from all over the world. For 1st gens it is a joy and blessing to see active 2nd gens, and for 2nd gens it is a surprise and curiosity to see active 1st gens. They could work together in teams to better understand the value of the faith life and True Parents through the eyes of one another.

Our 1st generation could more feel the beauty, purity and simplicity of 2nd generation in relationship to the Principle and Heavenly Parents, whereas the 2nd generation could witness efforts, struggles, determination and commitment of 1st gens` faith life to follow the Heavenly Parents & True Parents.

Having practiced ManMulBokKi (FR), JeonDo (WT) and living for the sake of others prior to the workshop was an essential step in relating to each other as brother and sisters with True Parents in the center. They could more easily connect to each other's Shimjung (Heart) and grasp a deeper meaning of the Principle. Thus, the workshop atmosphere was very harmonious and united. It is amazing how people can bond together as a family even if they meet for the very first time, coming from different family! We can only but feel incredible gratitude and joy to True Parents for opening the way where this can come true.

The success of the workshop was aided by the staff, Blessed Families, which have trained to organize and manage such workshops for several years in a row. Under the guidance and leadership of our National Leader, Jeong Bong Moon, they could really unite to support the participants. Mr. Jeong was the main lecturer and for workshop in a row he poured his energy and sweat to convey the Word with heart based on the Original Divine Principle lectures. After each lecture of about 30- 40 minutes, the participants were paired in teams of two, and for ten minutes each of them had to take the role of lecturer in front of their partner in order to summarize the content. This way of studying proved to be really good and it has improved significantly the quality of the workshop. In the past, much of the message got lost as participants were fighting to stay focused, to stay awake, etc. But now, everything is more alive as they engage actively with the content, by listening shortly and preparing at the same time to explain it for others.

The lecture of True Father's life taught as great example to follow the way of restoration for all of us.

The life of faith lecture focused on the practice of faith in our daily life.

Please follow through the pictures and reflections to get a better understanding of the workshop atmosphere and impact.

Thank you Champumonim(TP) for all the love we've received during these 15 days!

We love you!

## Reflection

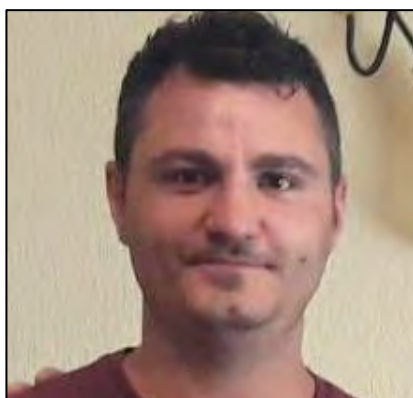

**Cinay (20)**

From WS, I understood God more and found out what He wants from me. I discovered that He wants me to become His child from position of servant to His child. I have to believe absolutely in Him and to fulfill the Three Great Blessing. I have to fulfill my 5 % responsibility and to offer joy to Him. I have to keep my purity for my future spouse. So I can give him all my heart and fulfill the second blessing

**Amira (19)**

During the WS, I had a bit difficult time to understand the point of lectures. What is the Divine Principles? How to find the true me and so on? And the DP question was difficult for me. But through DP Give & Take Action (sharing time) , I got the chance to understand DP more with others. I could manage to grasp the basics. That I meant establish my true value by becoming God's child and through relationship with Him.

**Madalin (34)**

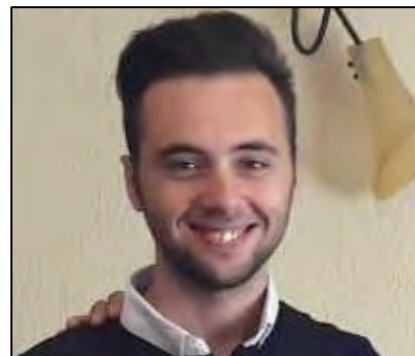

Until now I lived my life centered on myself, being always frustrated and disappointed because of all the peoples around me, my friends, my family. Now I understood that I am responsible for my life. For my future. I understood that the family is very important and must be centered on God. I am determined to build this kind of family.

**JooYeon (19)**

I had learned many things, I could know that more understanding of DO and practical way to apply to life. I did not listen DP and did not know the Unification church clearly what kind of religious. Even I could not recognize my self-identity as 3 Gen. I could break the principle without knowing. The sin not going to vanish. Therefore, from now is so important to live well centered on DP.

I could realize the relationship with God and my self-identity. it is still not clear but I found more confident to live well. I like DP. The DP is true value of life for me. I am so exciting.

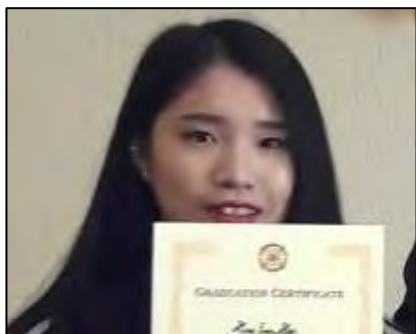

**Albano (20)**

This workshop has been like a resurrection for me. I knew that I have been for some years in unification movement but this WS has been the best do far. I have understood God in a higher level. During this whole WS. I have centered my thought or God. I

lived to think only according to His Will and principle. I thought that I had a dream but now I understand how meaningless my dream was. I discovered another dream, my life vision and I also have made an action plan to achieve it.

Now I understand better my responsibility. I understand better my position as Cain to love my central figure and my position as Abel toward other people. I will do my best effort to practice True Love in my life. To really see any person as God's children, as my brother and sister, to live for the sake of others and always put public goals. Have a public mind.

**YunHae (20)**

I had doubted a lot of God's existence. My mom said to me when I was a child, pray & let's go to church. I got stressed a lot. I became to hate to hear such word from mom. But since I came SES ELT program, I could feel God's existence "God truly exists." through MMBK(FR), DP Studying & HDH.

I feel God is my parents. I could feel His Shimjung. I had learned about God's Shimjung. God's Heart is like my parents' heart. It is correct. Human beings had fallen. But He forgives and loves again... He gave the chance to restore again. God is great and I so deeply respect.

I could not understand well DP. I must study DP well. The understanding DP was not easy. But I could realize more after DP studying (teaching the others).

I am proud of myself to study DP until the end. Thank you.

**Iasmin (21)**

What I understood the most from this WS was the important of God's Heart. Especially Mr. Jeong's Heart. I could

relate somehow the pain of loving as a leader and I am still asking myself why people choose this path, why True Father choose this Path. I understand God and God's heart but this is still a lot of space my Shimjung to be one with God's Shimjung.

From This WS, I gained a lot of determination and preparation for my lifestyle and habit as home to be centered on God and one with God's standard, one with God's original purpose for human beings. I found out the importance of human portion of responsibility. but I need to develop more emotionally with God.

**YooJin (20)**

My internal goal during 15 day DP WS, to study hard DP in order to feel His heart and find the way to apply DP to the life.

How to understand DP more and how apply DP to the life and finally make habit of life centered on God. I could more understand DP. The value of object partner is so precious. To become such beautiful object partner is so important in our life. And Cain & Abel relationship as well. From now I will put my Jeongsung (devotion) more to the HDH in order to find motivation and planning action. I will keep on my determination to do this and always remember the value of DP.

**Aran (19)**

I already went many DP WS but I couldn't really understand DP lectures deeply to feel God's heart. But In this 15 day summer DP WS, I could really find my own value and how important is own life. I think now that I am more mature and I could really understand DP. Then I able to put in practice what I did learned here. I did not really know if I truly find my self-identity but I understood that we are God's children so we have to live centered on God.

I understood how important is my responsibility that I don't have to wait until God, our Parents will help us. I have to make choice in my life. And I have to make good choices, So I have to deep open heart and open mind to be more faithful on all the things that I am doing, and then I think that I will be able to make good and best choice un my life

I think how I really find the key to resolve my problems. I am really grateful about this precious time with these amazing people.

### **Arin (18)**

I can't understand truly about God yet but I can imagine how sorrowful His love to His children is. Maybe if I was in His position I could understand. I am God's child but because of fall, I lost Him. But because of Divine Principle, I can restore myself and find true self identity. What truly understand is that I am a spiritual being to live with God who is perfect being. I am not yet to reach the equal to God but It could be possible in the future.

I truly know now what is the responsibility. I have now; the three great blessing (to inherit Gods Shimjung, to unite with the spouses centered on God, to be owner.) I choose do not give up until I achieve three blessing.

### **Gheroghe (21)**

First of all, I want to say in the beginning, I could not imagine that I will be so inspired and to feel so much my heart.

I have many important realization, but most important is that my position was Cain, but I naturally submitted this WS. Because of the love and understanding God's Heart and TP' heart through Mr Jeong.

I understood also more about our value in life that is determined by how much you satisfy and offer joy to God who is our original, eternal subject partner.

My determination now is to leave something behind with eternal value. So I want to live for the others, for the whole purpose, for my parents and to pass on the tradition of love through my blessed family. I truly can say and I am very grateful to say this. I could truly for God's heart and feel Him as my parents, feel His love.

### **Leeran (25)**

There are many reason to come to Romania, But most important one is to know clearly the way of life and live well. First of all, I realize the God's Shimjung. God is actual living together with us. And His sorrowful heart to restore fallen man. How much does he shed the tear for us. I could understand His situation a little bit. I also think about my life how was. I should start the new lifestyle centered on God. I had lived quite self-centered. I must pay indemnity to my self-centered action and thinking.

The Principle is very related with daily life. I miss the True Father who taught amazing and profound truth.

### **Gabiriela (22)**

My internal goal for this workshop was to grow my potential heart. I felt really blessed to stand in the position of team leaders and I am very grateful for my team. I learned important lessons from each of them. Through the DP lectures I could understand the Principle better. I understood things better than last year because now I have more experience with people and I felt more connected to True Parents. I could understand how the Divine Principle is actually about real life, situations; In the Principle, we find the key to restore our self. I truly believe we can bring a change, I could see the change in myself.

I am aware of my fallen nature and of bad habits. I believe that I am the right path and God certainly brought me here. Throughout WS, I felt God's direct guidance. He answered many of my prayer and questions. God is amazing.

### **Ari (15)**

I came to this WS to learn more about God. How can I get close to Him? But the most important reason why I participated at this WS is to find quickly the purpose of life, a chance to have a reason to live centered on God. I have a clear life plan but it is quite self-centered. I came to mediate myself to have a dream for the whole life.

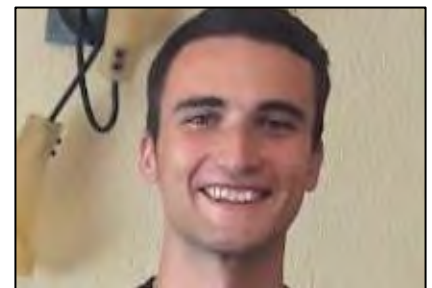

The DP lecture was very good. I understand a lot from DP.

### **Soojung (22)**

I was determined to study hard DP. The lecture was easy to understand and the teaching each other after lecture DP was good to understand more effectively and make us to focus on DP lecture.

The action Task was so excited and guide us to apply DP to the life.

### **David (20)**

The WS had been very busy and valuable. I could understand more about God's Heart and How much True Father has done in order to comfort His heart. I could understand that if my life is not centered on God, I will never be able to find true happiness or give value to my existence. So this is why our thinking, word, action and habit to be centered on God. I want to work more to become more mature and responsible individual life

**Program**

Day	Program	Lecturer
