

# Holy Ground Established in Yekaterinburg Russia

*Evgeniy Skvortsov - February 9, 2019*

A Holy Ground was created near the city of Yekaterinburg on Saturday, February 9, at the site of a stone monument marking the border between Europe and Asia. This site is a very popular place that is often visited by wedding parties and excursions.

During the opening ceremony, the members prayed for unity and resolution of the conflicts of Europe and Asia that started during the world wars.

Although the weather was cold, everyone was happy. I was pleased that a signpost at the site included the distance to Incheon in South Korea. The coordinates of the Holy Ground can be seen at <https://goo.gl/maps/gzj6BfRk8Gz>.
