

FFWPU Dominican Republic holds Preparation for The Blessing Seminar

Bernardo Cruz
March 18, 2022

The seminar began with a brief introduction and a profound prayer by MC, Hope Gomez, a second generation leader in the Dominican Republic, who commended the event to our Heavenly Father-Mother.

Reverend Bernardo Cruz gave the words of welcome, as former head of the blessing department, he gave some instructions on how to apply, what they need and some recommendations for the candidates and parents, one of his most outstanding words was that we must continue the lineage of God and share the blessing. All human beings want to be happy but there is no way to happiness without true love.

The general secretary of UPF and also a speaker from the Dominican Republic gave a conference, one of his most outstanding words was that the mission of young people is to make perfect love, that in this world all people are blind, without knowing love real. And that now thanks to the foundation of our Heavenly Parents and the foundation of our parents we are creating a new humanity of people who love with true love, as our Heavenly Father loves.

Mrs. Miho Okazaki's conference was based on a Japanese book, highlighting 6 points: the 4 positions, resolution of problems between parents and children, preparation of conditions to be a candidate, keep in mind that the ideal couple is not the one that I think it's perfect from my point of view, if not from God's point of view, Arrange the reason, the date and improve for the blessing. In addition to that we must bear in mind that the life of personal faith becomes the life of faith of our partner and the life of faith as a couple becomes the life of faith of our children.

The national leader, Mr. Bernardo Cruz, gave a short lecture saying that it is our responsibility to continue 10 consecutive generations of the true lineage. That our second generation is the 4th Israel and that the second generation should be proud of their lineage.

At the last part of the seminar the leader of the second generation gave a testimony of faith as an older brother telling that the second generation goes through many difficult experiences to maintain the lineage, however it is the best way that they can choose.

Then dynamics were made to bring the children and parents closer to each other. We could see how lovingly parents and children relate with each other thus forming a wonderful atmosphere.
