“Together with the True Parents, UPF and IAPP will become the Abel UN in name and in reality. That means that all the problems of the world will heal in reality, through True Parents. This movement, of creating the kingdom of heaven on earth **through educating and healing with a parental heart**, is Cheon Il Guk.

I pray that you will become proud national messiahs who will save the people of your nations by educating them through the teachings of the substantial True Parents.”

“I am speaking about this to you scientists today, because you must know heaven's secrets. You must know God. This planet belongs to God. You have invented many things in a variety of fields, so that we can enjoy abundance in the 21<sup>st</sup> Century. However the by-products of these inventions endanger the lives of humankind and the lives of all living things in the cosmos.

I am reviving ICUS because your efforts are greatly needed to create one human family centered on God.”

“After hearing [Mrs. Moon]’s opening remarks, I felt a lot of resonance with her eloquent articulation of humanity as one family under God, and also that the purpose of science is to serve this sacred reality.

My sense is that ICUS, in this new chapter of its evolution, could potentially play a unique and powerful role in stewarding a skilful awakening and synthesis of science and spirituality.”

Greetings to all European leaders and members ...

I look forward to being a partner with you in the development of PWPA activities in Europe.

I hope that in the coming weeks we can take positive steps to advance PWPA in ways that align with the goals of “national restoration” understood broadly.

Please let me know who is interested in organizing focused PWPA activities for academic contacts and members in the near future.

We can send current materials and also support in other ways. When there are gatherings of 10-20, I would like to participate in person.

With prayers and good wishes, etc.
