

Report on 4 - day Divine Principle seminar

23 - 26 January 2014, Tirana - Albania

Dear brothers and sisters,

It is our pleasure to share with you this report of the 4 day DP workshop, held from 23-26 January, where the full series of DP lectures were presented to the guests.

There were 43 participants, from which 20 were for the first time.

DP lectures were structured in 12 lectures and were given by leaders and members of different centers. During lectures there were many questions from participants, and it is appreciated their desire to understand and receive as much as possible, but also the lecturers who were ready to respond to their questions during and after the lecture.

The new guests were listening very carefully. The most special lectures for the new guests were the last one about the life and activities of True Parents.

Brothers and sisters, with the great support of Heavenly Parent and True Parents, invested a lot to make this workshop a great success.

Here are some of the reflections from participants:

Starting my “journey” to know God was the most precious and wonderful thing that happened in my life. I, who was grown in the midst of pain and sadness, felt deeply inside my heart an endless love. This workshop has overcome my expectations. There are no words to describe the feeling of peace, love and goodness that comes from my heart. I reflected on my mistakes.... Felt pain for them... but over all I felt that God loves me. Maybe you can't understand what it means for me to love God... and to dedicate Him prayers every moment that I blamed him for my suffering that I had. It was this workshop that understood my heart on the way toward God, a way with I could learn from True Parents.

I felt very good in this workshop. I felt a lot of emotions that never felt before. I felt like home. I could know many brothers and sisters. I could learn many things that I didn't know before. I learned spiritual love, God's love, the origin of humankind and why the world is at this point now. I could learn many things which will help in my daily life. I am sorry it finished so quickly, but I will never forget it. I don't know how will I leave from such a miracle!

... In tis workshop is like I born again. The first day I was under a great spiritual pressure, I felt shy to speak or sing, but the second day I felt freer..... Today, at 5.30 am, I woke up and went outside to pray for some

minutes, and the promise I made I will write with big letter at the wall of my home, because I don't want to forget. At the beginning I couldn't understand things like now, I just felt them, but the inspiration goes as soon as you go out of here. But now I feel that I am more mature to understand things better and seriously.

I am grateful to almighty God that made me part of this workshop with indescribable values. I really think that this is the beginning of a long and difficult investment, but with strong obedience in God. In my first participation in the workshop, I could understand better the truth, as God brought it. Even though I listened before these lectures, now I could really understand. It was difficult for me to accept, being affected by my Muslim background, but I understood that God is always with us, in happy and difficult moments. Therefore I thank Him with and with my humble heart I ask you all to continue together to spread this truth!

These four days were reflection moments, but also left many unclear issues to me. To believe something big, the research on it should be big, but it is not the issue to believe or not in what you hear, but to really have the conviction in what you believe. The truth needs sometime! But it is the truth will never be lost!

Thank you to the staff members who could fulfill successfully their responsibilities!

Report by: Greta Voci, MC of the workshop.
