The created situation, the weather, teamwork, challenges gave the workshop a special evaluation and made more sensitive and beautiful spirit.

Something new in this workshop was the singer group (D. Kotroci, J. Haziraj, E. Kola) that created a special and inspired atmosphere in the beginning of each lecture and meeting.

My motto always has been “Being a leader of heart ” and was the heart and love for God that motivate, gave me hope, ta make a future based on high principles and heartistic culture.

It’s great to have a big family and I feel really lucky that I’m here today. I love helping others and people in need. I think the best thing to do is to give and receive love, because love is that, that open every heart and bring changes.

A. Gjata, Korce

Those lessons that we learn should become part of our body, it is important that we practice them also. We can fulfill our purpose with courage and will, but I think this is the best place to make it. I’m grateful to God and and staff for everything. To be all unite in peace and make it with all heart.

That that impressed me more, was the love and the understanding from staff and all members, and is helpful that through this, to share with others this love and kind of understanding, to become a better one. To be evaluated persons, that one day could became good parent to take responsibility for our families. I really thank you all for this opportunity and overall I’m grateful

to True Parents , for their love investment, for all of these years, to make use become better persons and to find the way of true love, the right way.

E. Hyseni , Vlore

I it's hard but not possible, that in such short period of time to learn a lot. Games, challenges, lectures, knowledge, responsibility, rules, different characters and cultures, and possibility to meet many brothers and sisters. Enlargement of spiritual aspect and family growth...

F. Berisha, Kosove

I believe that was not just an experience but also an unforgettable challenge that taught us how to behave with others and cooperate with them. We learned to dare, to try and above all do not give up!

X. Doko, Durrës

The most important from workshop were the topics and were so meaningful for me and i think a will never forget. Even in the begging i was neglecting, but then I understand how precious these are teaching for our life.

I. Totoshi, Elbasan

We learned that to be a leader first we have to rule ourselves, and then to do more widely. Those 3 days will leave traces in my life and I am sure of that.

V. Përlleshi, Shkodër

I enjoyed all challenges but the most that I challenged myself, I discovered and proved to be brave not only in cases when I show intellectual skills , careful and reserved. Life is ours and must break the barrier that we put ourselves every day and that we change every time we change the environment.
