The idea of WFWP Portugal is to let people understand that, if young people understand the value of their integrity from the family, this value will be reflected in the Society, and then they can contribute on creating better Societies.

On the other hand, we also want to demonstrate that our work is towards gender inclusion, through of Gender Complementarity's Principle, hence terms including Male Speakers in a female event.

The event will be transmitted in Portuguese language, but there will an English translation.
