

An Encounter with Returning Resurrection While Witnessing in Las Vegas

Denpota Furugaki

January 24, 2018

"Spirit who could not complete their missions during their earthly life must return to people on earth who share the same type of mission as they had during their lifetime. When a spirit assists an earthly person to fulfill God's Will, the person will fulfill not only his own mission, but also the mission of the spirit who has helped him. (Resurrection 2.4)"

As much as God wants to save his children through us, our ancestors are eager to be resurrected through cooperation with their earthly descendants. Today was a day that we clearly saw the work of ancestral spirit.

Tamami Nozoe, a Japanese missionary, has a Christian ancestral background on her father's side. Her grandfather was a respected pastor for Assemblies of God, world's largest Pentecostal denomination, in Japan. Assemblies of God in Japan has an incredible foundation that kept devout Christian faith even through the pressure from the Japanese government in war time. Moreover, they have established the condition of loving Korea by sending missionaries to Korea for further evangelical work.

Through Tamami we met a man that welcomed us with a distinguished spiritual vibration. This man, J. Olive, happened to be a Pastor for Assemblies of God in Las Vegas. Being interested in the Divine Principle after reading the introduction, he was eager to make an appointment with us for further study. Through this man, we can feel high hope of the coming age for the resurrection of Christianity. Restoring such person would be a victory that directly answers True Parent's desire for American Christianity.

Other Guests:

- J. Kopf -POC 2 (half way)
- G. Steinfiel -Introduction
- J. Rodriguez- POC 2 (half way)
- N. Allen POC 3

"I want to create a peaceful family" said N. at today's DP study, which was POC 3. How we can establish a peaceful family was the main idea of the discussion.

Divine principle says that it is important that we fulfill the first blessing before moving on to the second. This requires maturity of character, mind and body Unity, and it also includes sexual purity. In the society nowadays, cultural communism has influenced people to think individual-centered. Nicholas seems to find truth in the statement that the mainstream culture nowadays are preventing the existence of peaceful family. Therefore, he seems to be finding more and more value and what the principle says.

Moreover, as missionaries we don't just teach principle but also connect to guests' family heartistically. Today we brought Donuts to Nicholas's house and also gave a message card to his mother. She seems to have really positive impression on us especially because she respects Japanese culture.

This is the culture of heart that missionaries would continue to bring in people's houses.
