

## God's Work in My Hometown

1992 my wife Midori and me came back to my hometown in Imst, Tyrol, Austria from the mobilisation in Korea. As many others, we started to get step by step connected with the “real” life far way from the life we experienced in our church and also in Korea.

For more than 20 years we went through many difficulties getting used to this world and cope with many internal and external challenges. I am not happy with the situation of society, how this world is run and I feel deep sorrow for God and the people. I more and more got involved in thoughts outside the “mainstream” of society and I am supporting alternative ideas and systems.

Because of this I met people and an organisation who were organizing lectures about different topics like alternative money systems, healthy food and so on. I supported them and invested myself and brought a famous Professor in Austria whom I knew already to lecture about an alternative money system. This was the basis that this organisation could trust me.

After that successful event I suggested to have a more spiritual topic so that we would have more balance in the topics presented. They liked my idea and so I was arranging our brother Johannes Stampf from Vienna, who wrote a book about life in spirit world, to give a lecture.

Johannes then gave an inspiring presentation about the spiritual world based on the Divine Principle. More than 60 people attended and all of them were very inspired and impressed about these explanations. People stayed until midnight and asked many questions. This shows how powerful the Divine Principle are if the people can listen without all the negative influences of the media.

In June I will organise a 1-day WS as a follow up for more interested people and I hope that also many people will come and listen to the Divine Principles more deeply.

The spiritual world is supporting us and we have to develop a burning heart to teach the people the words of our True Parents. We can see that religion and churches are losing more and more power and I think our time is coming now. We should not be afraid! People are anyway searching for solutions and for a better way of living.

Wishing all b&s a successful time in their hometown - God will be with you!

Hermann Resinger
