Peaceful Families Organization (PEAFASSO) at the Adagom 1 and 3 refugee settlement in Nigeria

"If you wish to grow, you must invest yourself. This is the truth, and it is a principle for development in the entire world. So again, if you wish to expand and develop, you must invest. True development and expansion are possible only through pure investment. If you invest recklessly, you will end up with a reckless result. If you invest with a serious and pure heart, you will have a serious and pure result. A pure result is possible only by sacrificing yourself with genuine sincerity. Sacrifice is about investing yourself. So invest by sacrificing with genuine sincerity.'

By True Parents

It was a wonderful experience accrued on the 06/02/21 at the WORLD PEACE HOME premises. The PEACEFUL FAMILIES ORGANIZATION decided to share the firewood she had gathered after great manual labor investment. She gathered this wood from the farm area by the side of the WORLD PEACE HOME complex. This farm area is intended for an experimental Agro complex aimed at improving on

nutritional lapses among the refugees, host community and humanity in general.

The gathering of this firewood has been an arduous exercise, where the old and young invested time and energy. I urged them to work hard and express the power of the God in each of them, use the product of their sweat to share with others. I gave instructions that we should express the love and substance of Heavenly Parents in us with the fellow community. We decided to identify the men of God and other settlement governing heads and give them each a bundle of firewood to use. Generally, firewood is very scarce where we live. Sharing with others will enrich them with Heavenly Parents' love.

We started the exercise by preparing ten bundles. We gathered and prayed for this exercise and begged Heavenly Parents that let this exercise yield plenty of them joy and it should yield breakthrough for the development and settlement of the Cheon Il Guk. We prayed for more victories including the Blessing of the multitude and expansion of our work to bring all humanity back to our Heavenly Parents.

We carried a bundle each to respective destinations. Personally carried mine to the pastor of a church who had been against my activities. I was happy meeting him in his church, he and the wife appreciated my gesture and especially the fact that I was the one who carried it on my head. He asked me to sit for a while and eat something. I was very delighted with their hospitality. I feel something heavenly and lovely roamed around his premises.

While we gathered at our complex, we discussed on the reactions of our recipients. One of us was given transport money to go home to their settlement which is about 3 kilometers away. Many others came back with bags of thanks. It was very touching listening to their testimonies.

While moving around the settlement in the evening I received good appraisals from some recipients. A new story is going around the settlement about our gesture. We have to continue the exercise by Saturday next.

We thank our Heavenly Parents, our True Parents and all of us for carrying out this exercise that is opening the way for ore achievements.
