Special Chuseok Celebration of True Parents' Victorious World Tour for the Firm Establishment of the Heavenly World

Now, in front of heaven and mankind, we have created a model nation that can fulfill our Heavenly Parent's dreams. But we cannot just be satisfied with creating it. When any new life is created, when a baby is born, it needs a period of growth. Likewise, there is something that remains to be done in the Democratic Republic of São Tomé and Príncipe. The most important thing is the young people. The first thing we must do is raise them to use sustainable efforts and practices for the eternal future.

In the past, Christians took the Bible throughout the world, and without properly introducing God, they

governed and exploited people without even knowing the essential meaning of Jesus. But when it comes to this movement which the FFWPU is now leading, it is focused on creating Cheon Il Guk with True Parents at the center. After the six thousand years that have passed, Cheon Il Guk, where we can fulfill our Heavenly Parent's dreams, has finally started. We need to show the Democratic Republic of São Tomé and Príncipe to the world as a model nation and create an environment that can be followed by all the countries in the world. The most important thing is working with the youth. We need to train them to grow up and take responsibility. I am going to appoint World YSP President Robert Kittel as the new Chairman for the Youth Federation for World Peace, and his mission will be primarily be focused on Asia to allow him to manage his health well. In his place I will appoint Youth Federation for World Peace Vice President Matsuda as the new YSP President. Fortunately, Matsuda has extensive experience and can speak a foreign language, so I want him to focus on educating young people not only in the Democratic Republic of São Tomé and Príncipe but in other countries that have the potential to be restored. We will provide all the necessary support through the FFWPU International Headquarters.

The situation is the same in Korea, Japan, and the United State. Young blessed families are our greatest strength for the future. Our FFWPU leaders must use their last ounce of strength to take the lead in guiding young people to receive the Marriage Blessing and to accomplish national restoration and world restoration so that they can stand in the central ranks with Heavenly Parent and True Parents. Korean leaders must take the lead in challenging themselves. To be successful in fulfilling our goals on the world stage, the Korean leaders should at least master English even though they have to give up some sleep in order to have more time for studying.
