

It's Time to Expand

True Mother delivered these remarks on October 7, at the Nagoya Hilton Hotel in Nagoya, Japan, at the celebration of the success of the 40,000-Person Rally.

This is a good morning. I want to congratulate you on the work you did over these three days, which led to successful events.

Yesterday at the Blessing Ceremony I declared that blessed families are the chosen people. What does “chosen people” mean? For over sixty years, through True Parents, God has given birth to many blessed families globally. And thanks to True Parents’ victory in 2013, Foundation Day was the beginning of a new story, a whole new era. It has been seven years.... It is Cheon Il Guk. Do you understand? God's dream, humanity's hope...

We yearn to live in attendance to God, both on earth and in heaven. However, due to the fall of humanity’s ancestors, a history of bitter pain has lasted six thousand years.

Considering the fundamental principles of creation determined by God, only when victorious human ancestors that can be the True Parents appear can God's dream come true. For over six thousand years, God has been going through a difficult course to restore humanity. With a heavy heart, he waited anxiously for the day when human ancestors

who can console his heart and live for humanity appear. How difficult must it have been to indemnify the mistake that it took him four thousand years to be able to send Jesus Christ, his only son?

A foundation is first

I am saying this: The principle is that True Parents, the Messiahs, need to start from a national foundation. As humanity did not accept that, they repeated the failure by not accomplishing their responsibilities. It took four thousand years to be able to bring forth God’s only son. Thus, God saw a thread of hope. But what ultimately happened? Because Jesus had to go to the way of the cross, he left with the promise that he would come again. True Parents could no longer be born through the people of Israel. That is why God searched for another nation that would be able to fulfill the providence and give birth to God’s only begotten daughter.

It was the people of the Han Dynasty, the existence of which began four hundred years before Christ. They were migrants, experts in astronomy, who

loved peace and hated war. Thus, they moved down to the south, all the way to the Korean Peninsula.

I also said that Japan, which is so close to the Korean Peninsula, is from the same race. Is it all right for siblings to quarrel in front of their parents? It is not right, is it? Therefore, blessed families and leaders from Japan, what can you do? The only way is for you to give the blessing to your people, that they may belong to the chosen people. A chosen people governed only by God and True Parents! Do you understand? It is the path to becoming eternal citizens of Cheon Il Guk.

Thus, you will have to fulfill your responsibilities. Being in blessed families and being chosen people who strive to fulfill God's dream, should you expand your environment, or must you reduce it? It didn't end with yesterday's event. You will have to constantly teach others and create prestigious families that can register in the Cheonbowon. Do you understand? You will do that, won't you?

Nagoya young people (YSP)

Thanks to all of you, I have strength. You are in the eye of the tornado that will allow Korea, Japan and the United States to take a giant leap into the world! May we unfailingly fulfill, with your help, God's dream and humanity's hope, the kingdom of heaven on earth!

Doctors and nurses

With the same heart as mine, I hope that you will take care of your patients; save those who are about to die. So that through those people, more people can be saved. I hope that you will study well and work with pride.
