

Korea is on the world stage in a failed way

Hyung Jin Moon

Hyung Jin Moon, September 3, 2017 Sunday Service

Korea is on the world stage. Of course in a failed way and now in a way that is a completely chaotic and on the verge of nuclear collapse. If the Han mother did not send the curse to all the world, starting from Asia obviously first because that is where Father want to begin the Cheon Il Guk culture, and begin the strategic placement of democratic nations and alliance that would eliminate tyrants from its ranks unlike the UN which has all these tyrants in its UN Council.

How can you have China as the head of UN Security Council? Give me a break. They can get away with every single type of human right violation. That is why Father called the UN a satanic UN, because it protects Satanist, it protect the big power brokers and protects these tyrannical authoritarian Nations. Abel UN would not do that, would not protect that! It would probably exclude, it would not allow dictatorship nations to be even in the UN. In addition, of course it would be moving in the opposite.

The satanic UN is always pushing for disarmament. All you hear is disarmament. How successful that disarmament has been! Of course, the disarmament can be on nations that have been more sovereignty base. Not the tyrannical nations. They have been giving it by our stupide presidents like Bill Clinton and CIA. They have giving them their missiles.

The danger of nuclear war is always been there since 1945. Obviously, no one want to think about nuclear holocaust or a nuclear war. Not wanting to believe that is coming, because it is so terrifying and terrible. Because it is better not to think about it. Just feel better about your day. If you have to think about nuclear war, then you have to start framing your existence and all the people's existence in a different way.

Now we have had a tremendous blessing in the last 70 years when the Lord of The Second Advent was on the earth. He was blocking those things and of course stopping the course of North Korea from being more insane than this. True Father played a critical role in making steadying them off, making them docile.

Now if the Han mother did not betray True Father, turn her back, and reject the three kingship etc. if she did not do that, then the work we were doing in Korea would be going forwards now almost 5 years, but before that we were making inroads for 5 years; so it was 10 years going on. The message that we were giving to the South Korean government and we were working with the highest levels of government; Kook Jin with Strong Korea; we had the vice deputy of the nation of Korea, the Defense Department. He came to our Church events as well. We had 60 stars of all the generals that were sitting at the events. Kook Jin Was invited to top military schools to give lectures about the real treat of China and the preparedness of South Korea.

We had a very clear strategic plan for Korea to move toward sovereignty. They are now in a military system where they do not train their men. Everybody supposed to go the army; but do not train in actual military tactics or anything like that. It is more of a brainwashing camp. Therefore, they go into the military, taught for two and half years and have just to obey the hierarchy, just to worship the hierarchy. They shoot maybe 200 rounds per year; we shout that in a day or in an hour here! One hour we will be shouting 20 rounds here!

Most of the time for Korean military men is guarding little basis and they are just standing there smoking cigarettes all day, and just taking orders. Learning that the hierarchy, the centralized government is your God, and you have to obey this God. If you do not, they will make your life miserable; they will put you in prison. That is the basic training there. It is not really a military training! It is an indoctrination training! That what you get with a centralized governments and archangel powers

Therefore, this was the clear strategic guidance, which we were giving to the Korean nation. Have your men go to the military service that is fine! They do their training; when they come back home, you the

government you should allow them to bring their weapons back to their home like the Switzerland model, like Israeli model. It is a scenario where, they are surrounded, by hostile nuclear powers, like Iran etc. all kinds of the Middle Eastern nations trying to kill you, but they have everybody who is trained! Even the girls have to go there to do military. Everybody gets the military training. They also are able to get the guns. Therefore, in an hour, the whole nation becomes an army, so if there is an attack, boom! Already they are moving with their tanks squad, or whatever. That is why no nation around them, even though with their powerful nuclear capabilities, they do not want to miss and risk with Israel, because it is so powerful. Also is the same in Switzerland.

Hitler decimated Europe. He took of all the nations of Europe, but one nation he did not touch, and it was Switzerland! Switzerland was not touched. Because Hitler did the estimate, "if we go in Switzerland, it going to be 1 million men were going to send in; is that what he said. Then the Swiss people said ok, we will go to the mountains shout twice and then come back home!

We got 500,000 military men ready to train, ready to go. Therefore, you come with one million men, we just climb those mountains, we know those mountains, we shoot twice boom, boom, and we will come back home and then drink coffee. Hitler did not touch it, because there is great danger going in there. He felt the power that was there, and did not mess with it; he did not touch it.

Now if South Korea did that and listening to the direct guidance of Cain Abel that we were giving to the top levels of government, top levels of the elite. Spiritually we were trying to divide the elite between able type and Cain type. Because in order to get able type revolution you have to split the elites, and the good elite have to help to create the foundation and have the funds, all that kind of stuff to support an actual battle that happens within their class ranks. Just like Donald Trump, he is from the elite but because he is standing and all the people support him, boom! He can make this huge inroad into against this deep state.

The same thing that had to be done with Korea; a split. Because it is highly centralized; then you would get the firearms that they trained with in the military, which would be one-step closer to the civilians. Then, the civilians, the dad would have trained a mom how to use it when the dad is out or when some bad people come in. then it would be seen more as a self-defense tool even as that culture will start shifting they will start seeing " oh not only as a military weapon but also self-defense tool.

At the same time, he is going to train his kids. Therefore, his kids are going to learn about how to defend and how to have a proper amygdala function. They will think about self-defense, saying, "Oh if mommy and daddy are not here and there is a bad person trying to break in" you have to know how to put assailant out. Then what happens to the mafia in Korea, what happens to the gangs, what happens to all the bad predators? Are they going to think twice about breaking into grandma's home?

They are going to think twice about breaking into grandma's home or even single mom's home or somebody else's home. Then I can have the leverage of power, which they once had. When the firearms would be brought down that way, then it would bring in a completely new culture. You could start connecting with Father's sovereignty culture and the hunting farm he was making down in Yosu or the fishing farm. All those self-alliance arts, aquaponics farm, and self-reliance things, everything is connected to the whole culture of self-defense and understanding how to defend yourself and empower your kids to defend themselves. That all connected to self-reliance, not being a slave to a system, not being a slave to some Archangel promising you that they will do it for you. It changes the culture; it brings a Rod of Iron to the hands of the people.
