## Tongil group have been reported in the media news.

### 1. New Year Series Report on 'Becoming a Small but Strong Country'

<http://www.segye.com/Articles/News/Politics/Article.asp?aid=20121231022367>

- The Segye Ilbo reported on the 'complete preparedness of the civil defenses of Switzerland for emergencies' as part of a plan for the New Year to publish a series of articles starting with page 10 of the January 1st issue (Tues). Through onsite reporting the reality of military-like modern families thoroughly prepared for civil defense was conveyed directly to the readership.
- As model cases of the Peace Army and Peace Police that the chairman was emphasizing, onsite reporting of the cases of Switzerland and Israel were reported and reporting is currently underway on companies in the defense industry in Israel.

### 2. Planned report on 'security – growth by kicking out the welfare party'

<http://www.segye.com/Articles/News/Politics/Article.asp?aid=20130101022540>

- On the front page of the January 2nd (Wed) issue of the Segye Ilbo, an article appeared that criticized the budget in the New Year for far exceeding the previous year's budget for the first time ever calling it a 'to rags budget.' The article pointed out that while this year's budget had apparently increased welfare spending, the required budget for security and economic growth was cut. It criticized how the budget for free education ballooned to 689.7 billion won, but the national defense budget was 328.7 billion won, and the budget for research and development was slashed to 200 billion won putting national defense on the chopping block for the sake of further welfare. Amidst all this, a strange phenomenon occurred where after congressmen looked after their constituency, the SOC budget was inflated to 371 billion won. A day after this article came out, all the other newspapers came out with a similar article.

### 3. Exclusive report on how the 'Ministry of National Defense unaware of length of Singer Rain's Special Leave'

<http://www.segye.com/Articles/News/Politics/Article.asp?aid=20130103025158>

- An exclusive report appeared on page 8 of the January 4th edition of the Segye Ilbo (Fri) stating how the Ministry of National Defense gave an erroneous report after not properly recording the number of days the celebrity soldier/singer Rain was afforded. This led to more than 1000 replies posted on Naver and other portal sites.

### 4. 'Swiss Paul Lynch Artillery Base' made public for the first time in Korea

<http://www.segye.com/Articles/News/Politics/Article.asp?aid=20130109024679>

- On January 10th (Thurs) on pages 1 and 8 as the second part of New Year Series Report on 'Becoming a Small but Strong Country' the Segye Ilbo reported on the 'Swiss Artillery

Base.' On site reporting helped convey a fresh report to readers about the nearly 80 artillery bases and of some of those bases that were being operated as museums.

– As model cases of the Peace Army and Peace Police that the chairman was emphasizing, onsite reporting will take place this month on the case of companies in the defense industry in Israel.

#### **5. Exclusive report '3~4 Policy Control Ministers Newly Instated'**

<http://www.segye.com/Articles/News/Politics/Article.asp?aid=20130109020016>

– On the front page of the Segye Ilbo January 9th (Wed) paper a report was written about the presidential transition committee dividing all government departments into 3 to 4 groups according to the active review of placing a minister in charge of each group.

#### **6. Exclusive report 'Annual Tuition at Schools for the Gifted set at 10 million won'**

– On page 2 of the January 10nd (Thurs) issue of the Segye Ilbo pointed at that with the annual tuition at a natural sciences and engineering high school set at 10 million won, a phenomenon is taking place that shuns gifted students from less affluent backgrounds. Education professionals are demanding the government boost the ridiculously low government support. The article became a sensation over the internet garnering many replies.

#### **7. Report 'Name, Unification Church Reverts Back to Family Federation for World Peace and Unification'**

– On page 19 of the January 12th (Sat) issue of the Segye Ilbo, the Unification Church will use the new title of World Federation for World Peace and Unification (abbr. Family Federation) and as appointed Yang Chang-shik as the new President of the Korean branch.

## Announcements of major Tongil group.

[TIC Introduction] Just what is a precision ball screw?

2013-01-21

[What's a ballscrew?]

A ballscrew is a part that takes the rotating movement of a device and changes it into a straight-line movement.

[Wondering about the sales trends in Korea..]

The flagship product of TIC Co., Ltd. is a part called a ballscrew. This product is mainly being delivered to the Korean machine tool maker, "Hyundai Wia," and is also supplying to "Doosan Infracore," and "Hwacheon Machine Tool Co., Ltd." Further, it is also sometimes used for defense and commercial uses, with the sphere of usage gradually expanding all the time.

The global ballscrew market is worth about 1 trillion won, and with the Korean market maintaining a market scale of about 100 billion won we can look forward to TIC Co., Ltd. enjoying further development in the future.

[What, if any, difficulties are you currently facing?..]

Also, with the Taiwanese companies, "HIWIN", and "PMI" targeting the Korean market with low prices, it is a great obstacle to our price competitiveness.

[What is it about TIC that you are most proud about..]

Starting from 2003 with the introduction of developed technology has resulting in TIC Co., Ltd. focusing on improving the technology business and the production of high quality products of a precision caliber. Also, the company currently possesses a "parts materials reliability certificate" recognized by the "Korean Agency for Technology and a Standards and "Single PPM," a quality certifying system, and is recognized by its biggest clients in Korea, "Hyundai Wia," "Doosan Infracore," and "Hwacheon Machine Tool Co., Ltd" for its quality. But, we still need more public relations to be recognized for our reliability.

At present the company is working hard to develop a high-speed low-noise ballscrew, and has started development in high load bearing and other specialty product fields.

[What are your plans for the future?]

TIC Co., Ltd. has plans in the future to boost competitiveness in the market with the goal of developing different dimensions of dimensional technology that can meet the demands of the market, and have plans to increase market share through focusing on research and development in specialized fields.

Let's encourage TIC Co., Ltd. to develop in the Korean and overseas market.  
We hope TIC Co., Ltd. can have a stellar year^^
