

The First Day Of Registration Of Volunteers To The Peace Army

Sun Myung Moon

October 21, 2005

Hoon Dok Hae with True Father at the Premier Palace Hotel, Kyiv, Ukraine

Those who know English raise your hands. Less than half. Does everyone speak Russian? (There are Ukrainian speakers, but everyone understands Russian.) The Russian army should become the Peace Army.

Those who know Korean raise your hands. Who knows it well? Are there Koreans who know Russian? (None.) Young people should know Korean. Missionaries, you have to take responsibility and teach members Korean. You should know that the countries that were under the influence of the Soviet Union suffered a lot of damage because of communism. Therefore, you must learn languages, go into the world and make efforts to make it one world under God.

Scientifically speaking, Korean is superior to any language in the world. If you research Korea, you will understand that it is a special country. From a linguistic point of view, the Korean language occupies high positions in the world. If you go to Korea for the first time and say to a Korean person in Korean: "Airport", he will understand you. It has a simple pronunciation. (The translator could not hear well.) I have the most correct pronunciation. (True Mother: Father uses dialect.) The Korean language, from a linguistic point of view, occupies a high position. The Korean alphabet, if desired, can be mastered in 30 minutes. In Korean pronunciation is associated with 4.9 trillion sounds of the universe. Koreans can speak Russian as well as Russians themselves. If they study it for 5-10 years, then you will not distinguish them from local people by pronunciation. Therefore, the Korean language is outstanding.

Japanese have to learn Korean through television, where you have to make Korean subtitles, and then go out into the world. If you know Korean language then in any country you can learn to understand its language and people in a year. Korean missionaries can already provide for their living in any country in a year, and Japanese missionaries cannot do this even after living there for 3 or 5 years. The Japanese alphabet is such that writing and pronunciation are not related.

On my speaking tour, I use the religious terms of high level language. There are many levels in Korean from high, which is used in aristocratic circles, to simple, which is spoken by people of the lower class. Western cuisine is simple - bread and salt is enough, in Korea there are 360 appetizers and salads. Appetizers also consist of many components. Koreans can feel any taste. It is cold in Russia, so you eat salted meat here, and there aren't a large number of appetizers.

Korea's history is longer than China's. The roots of Chinese culture are in Korea, the prototype of Chinese characters also comes from Korea. In the tribal era, Koreans were famous for shooting well with a bow and winning all battles. However, they did not like the constant conflicts, and they moved to the Korean peninsula. The history of the Mongol race is the source of human history. As a result, it turns out that Korean history represents the history of mankind. Usually ancient people worshiped the Sun, but Koreans understood that there was a supreme being, so the roots of religion also go back to Korean people. Korean history knows prophets, who prophesied that good times would come, so Koreans did not fight or resist

change, but adapted to it. 1200 years have passed since the era of the Unified Shilla. The Korean people can concentrate quickly, so they shot well with their bows. The Chinese called them oriental people who shoot well with their bows.

Therefore, if you master the Korean language, then it will be easier for you to learn any language. I gave direction to the Unification Church from '80 to '85 to use only Korean, but members did not follow that. Not having learned Korean, they justified themselves by saying that, due to the fact that there was a lot of work, there was not enough time. The Soviet Union had a bad influence on 30 countries. Who's going to fix that? The quickest way to fix everything is for the Soviet people to admit this and explain in these countries that they were wrong.

One of the best ways to change to the culture of peace is to teach the language that carries it. Korean missionaries, having learned the languages of the world, have good pronunciation and know how to use the sublime language. If they teach the people of the world, concentrating their efforts on America and Russia, then the world will develop rapidly. The Teacher was born in Korea, so 600 volumes of speeches, respectively, are also in Korean. To understand them, you need to know the language. Among people of the same level, the best will be the ones who know Korean better, at least a little. Sasha sits here because he knows Korean, doesn't he?

If Koreans come together, they will constitute a fearful power because they believe in something unified. When the time comes for the unity of Korean people who aren't large in number, they will still be able to push out the great powers. Currently, the Korean Peninsula is surrounded by great powers: Russia, China, Japan and America. Strategically, Korea occupies an important position. Russia wanted to seize Korea, the same goes for Japan, China and America. England, too, looked at Korea with wolf eyes. Genghis Khan wanted to conquer Korea, but it was the only country he failed to conquer.

The messianic idea in Korea is very strong. If the countries that invaded Korea didn't leave behind ten times more than they took, they would perish. Politically, the most important area that can affect the world is Korea. Strategically, Korea - the peninsula - is an important place that can connect all the places of the world. An island cannot become such a place. There are 3.7 billion Asians and only 800 million Caucasians. ... Japan adopted Buddhism, Christianity, and Confucianism from Korea.

The peninsula is the place where all civilizations originated. Spain and England grew on the basis of the peninsula. Italy is also a peninsula, so many paths passed through it. Thus, its culture developed and this became the foundation for influencing the world.

...

We have two hands, but imagine if our hands were of different sizes, not harmonious and moving in different directions. How could they grab something? But we can coordinate our movements. If we want to grab something or pass something from one hand to the other, we can do it. Where is the struggle here?

A man and a woman are different, aren't they? Are they the same or not? (Not the same.) Women have large hips, so they wiggle them when walking. Women have two roundnesses: the shoulders are narrow, then one roundness and then in the hip area another roundness. In men, the shoulders are wide, and then there is a narrowing down. Their roundness is only in the front - in the shape of the abdomen. In men, the upper part of the body is larger, and in women - the lower. They have wide hips, don't they? And where do they unite? With what? The shoulders of men and women are not similar, their hips are not similar, their height is different. They also like different food - everything is different ...

If you follow the communist idea, skipping one meal undermines the source of my life. Even if a person is physically starving, prayer and spiritual saturation can lead to the fact that he will gain weight. There are such cases. Communists don't know why this is happening. So I spit on communism because it has a half-hearted view of the world. There are visible and invisible things. For example, do we see air? The visible world is the mediator, and the invisible world is the base through which hundreds of invisible things are connected.

The concept of struggle has no place. On the face, the eyes, nose and mouth are in their places creating harmony. They don't fight each other. Will you marry the person whose parts are struggling? ... The top needs the bottom, the right side needs the left. When these different parts interact with each other this world appears. Only such logic will be correct. Any being can only gain joy, satisfaction and happiness through relationship and harmony. Separation and conflict cannot bring joy, harmony or ideal. This logic cannot be denied.

How many ancestors did God create? (Two.) Absolutely! What would happen if our eyes were not symmetrical, our nostrils were in different directions, our lips were of different sizes, or if our ears were not symmetrical? All parts of our body are interrelated, they are adjusted to each other. Is that true or not? Everything exists on the basis of a pair system, movement and relationship in such a system creates continuous existence. How can a man and a woman come to unity through struggle? How can a man and a woman unite? With bread? On the contrary, if two hungry people want to eat enough, then, because of a piece of bread, a struggle will begin.

Ultimately, this struggle will lead to the death of both, if neither is willing to sacrifice himself or herself for the other. Can communists accept that everything exists on the basis of a pair system? They say that development occurs when something new comes, entering into a struggle with the old and destroys it. The souls of people who lived a thousand years ago are different. Communists say that development will occur when the top fights the bottom, but in fact the top goes to the bottom, and the bottom goes to the top. They say that mutations occur arbitrarily but this is a full and outright lie. Have you ever seen winter spontaneously giving way to spring? They apply mutation to whatever they want.

Development occurs where subject and object meet on the basis of reciprocal relationship. So, the conclusion: everything exists due to the give and receive action in pair systems, resulting in harmony and not struggle. Got it? Check and you will see that the entire universe exists on the basis of such pair systems. A man and a woman are different from each other, but how can they unite? Men and women, do you want to unite with each other? Do you? (Yes.) How? With your fingers? Or maybe kissing will bring you to unity? If the husband has a long nose then kissing is uncomfortable, you have to tilt your head then, the eyes lose their horizontality, and the nose leans to the side. The eyes don't match. The faces of Oriental people, unlike Westerners, are comfortable for kissing because they are flat. Westerners have sunken cheekbones, long noses, elongated faces, so they have to adjust to kiss.

How can we unite? Do we need to meet through the eyes? Is it enough to meet with lips? Eyes, nose, mouth, ears - even with all your senses you will not achieve unity with the opposite sex. You can try to connect your lips with your spouse, nose to rest on the nose and stare into each other's eyes, but still you will not achieve unity in this way. Suppose that a man and a woman love each other, but a man pats a woman only on the head. Would the woman like it? The woman wants him to touch her breasts as well, so that their relationship becomes deeper. Isn't that the kind of character women have? They put their breasts and buttocks on display. Thieves! Soviet men, when you see a woman's breasts, do you want to touch them? Aren't you like that? If a man touches a woman's breasts, she displays her buttocks too, wanting him to touch them as well. Women, do you have that desire? In Korea they say that by looking at the legs, you can determine the character of a woman. If she has ugly legs, then she is a thief or leads a bad lifestyle. I can determine a person's character by looking at shoes alone. The universe and humans need balance. If you start arguing because of problems, then balance will be disturbed. It doesn't have to be that way.

The kingdom of heaven is formed through three generations, but what would have happened if Adam and Eve had given birth to only two children? There would only be one pair. For the universe to be filled, they must have many children. First there is the water world - the mouth, then the air world - the nose and then the world of light - the eyes. All the opposite elements in the universe form harmony and are adjusted to each other. The spiritual and physical worlds are opposite, but they fit each other. In accordance with the ideology of the Communist Party, all those who oppose it must be eliminated. Can the Communist Party radically change a person with such purges when his body and mind are in a state of struggle? In order to form harmony, there are couples. Am I right or wrong? The conclusion is this: harmony, not struggle and purge.

Didn't Stalin carry out purges after the formation of the USSR? Two communists cannot go the same way. To keep going one must lead the other. In communism a man leads a woman to walk through the doors. There is no harmony here. So, it insists on the logic that there is no God. Remember that the entire universe exists in pairs in order for harmony and unity to be achieved. The invisible internal and the visible must unite. Communists fight very fiercely in the physical world. According to communism, existence precedes thought. In other words, the house appeared before its blueprint appeared. Each person has different thoughts, different blueprints and plans. How can they unite if all they do is fight with weapons in their hands? The question here is, what came first: spirit or matter? This problem divided philosophy into two directions. If we say that spirit appeared from matter, then this is the denial of God.

In Chinese, Sasha (translator's name) means thank you. Is he a primary being or a secondary being? Answer, please. (Secondary.) As outstanding as he is, he is only a secondary being. This is nonsense if we

say that there is no primary being, but only secondary ones. In this world before existence there was knowledge, and before knowledge there was spirit. Let's check whether this is true or not. Why do we have eyebrows here? Did they know this was their place or did they accidentally appear here? They create a path along which sweat flows. If they weren't there, sweat would flood my eyes. Did you know that or not? Why is there a hollow around the mouth? If it wasn't there, sweat would get into my mouth. So, it knew it was the best thing to do.

Knowledge preceded its appearance. If these hollows are narrow, then such person will become a beggar. Successful people have them going aside. If they are narrow, sweat will get into the mouth, and you will need to spit it out like beggars. These hollows appeared because it was preceded by the knowledge that sweat and rain can get into the mouth. Why is there such a complexity here - eyelashes? They knew that there was dust in the air in this world and that it shouldn't get into their eyes. Did all these body parts know about such facts before they appeared? How could the first ancestors appear in the physical world then? There is also a hollow for tears. Why do my eyes blink all the time? They blink if a weed gets into them or the wind blows. If they stay open for 30 minutes, they will turn red and burn out from thermal radiation. We blink in order to moisturize the eyes, protecting them from drying out. This is a device that moisturizes the eyes so that the heat does not dry them out. Why are the eyes round? It would be better if they were flat. They are round to be able to rotate and see on all four sides. It would be a disaster if the eyelash refused to blink and close the eyes. If they didn't fulfill their role, it would be like death to them.

So, answer the question now, what's first: the conscience or matter? Please, answer. (The conscience.) The conscience, of course. I don't know about women, but men have hair in their noses. They intertwine there like tree branches, and when dust accumulates there, in the morning you go and clean it all up. The ears are formed in such a way that dust does not get into them. What would happen if the dust got into the middle of the auricle? Ears would be clogged. And what would happen if you did not have metabolism after a delicious dinner? If food has entered the mouth, it needs to be defecated from the bottom. Once you take a meal, it passes through various organs. You would die if it got stuck somewhere, but the food passes all the organs one by one. Everything is in mutual assistance. Where, then, is the struggle? Do you understand? The idea is in the first place, it can be understood even from one hair. Can your hair change its color through struggle and turn black or white? In struggle everyone thinks only about themselves. Do you understand? The conscience and matter form the two main streams of philosophy, so this is important. You should know that the concept of struggle is wrong.

Thirdly, the basic principle of the species is unchangeable. The one who believes that man descended from an ape, which in turn appeared from an amoeba is crazy. Would you be pleased if I would say that the amoeba is your ancestor? If you make a pair - a female gorilla and a Western male - then let them make love for a thousand years, if you expect some being to be the fruit of this love, will a gorilla or a human appear? Gorilla is gorilla, but human seed is different. Vertical relationships on a horizontal level are a mystery. Love in a horizontal relationship is designed for the process of reproduction. This flower looked exactly the same as a thousand years ago. No matter how many Doctor of Science make sacrifices, even if this world dies because of wars, the flower will not change. The Teacher preaches about the importance of lineage, it is unchanging. How can unity be achieved? Only the male and female can unite. Men and women who sit here are males and females. Why did such sexes as female and male appear? Probably because they wanted to appear. The Communist Party has no view of the purpose. It has no view of the purpose and has no direction. This is how it justified mass murder by equating human beings with animals. Such ideology has the potential to destroy the human world.

You're males and females, aren't you? Soviet males and females want to be involved only within their own circle. The Teacher talks about the need for cross-cultural marriage. If everything is left as it is, the seed will remain as it is forever. In order for the perfect seed to appear, cross-cultural marriages are needed, when a man and a woman do not come from the same place, but from far abroad. Jews are self-centered and do not like change, which is evident in their marriages. To breed, wild geese from the tropical zone fly to cold lands. Birds fly thousands of miles to breed, which makes their seed strong and capable of becoming a source that will remain forever. Therefore, we can conclude that in order to make the seed strong, there should be no state borders and border lines. If the people who live at the North Pole in the Soviet Union all married those who live at the South Pole, then they would overcome all four seasons and would be able to live freely anywhere. If people understood that such a diversity gives racial superiority, they would never want to marry someone who lives nearby. My point is that you should all create intercultural marriages. Thanks to intercultural marriages, it is possible to maintain superiority in dynamics, while marriages between relatives lead to degeneration. Later, this kind of lineage will grow weak and will lose to a strong nation when it will appear.

For nutrition, it is best to eat vegetables from different climatic zones: tropical, temperate, and cold, mixing them with each other. While comparing people who eat only one thing and people who mix and eat vegetables of four climatic zones at the same time, we can say that the former can live only in one area and eventually degenerate, while the latter can live anywhere. People who are small in stature, eyes or something else, gradually fall below the average level. Later, they become lonely and disappear as widows or widowers.

Although I hated communism very much, I had the desire to transform it into the best ideology. If people from communist countries create cross-cultural marriages, they will ultimately surpass those who marry

only those they like.

When the geese fly, they line up in a V-shaped echelon, and their leader is in front. Birds are required to follow their leader. In case of any danger, they send a signal, and the leader makes a circle. If everything is in order, then he signals about it and continues to fly forward. It is enough that there is order in front and behind. Reverend Moon is the most important leader of the Unification Church. You shouldn't worry that someone is higher and someone is lower. It is enough for everyone to look around and help the leader fly forward unhindered.

People have processed this flower, so it doesn't smell. A real flower emits fragrance. It's not original. Small flowers, despite the fact that they are small, last for a long time, and large ones can not last long. The artificial product is different from the original. No matter how hard humans work on the communist ideology, its smell or aroma is not genuine, so it will disappear in the future. The fundamental principle is about lineage. It divided everyone by nationality. The Soviet Union did not succeed because the seed of Russia and Ukraine is not the same. Therefore, you should look for greater development and a higher ideology. Rev. Moon's Godism can adapt to all four seasons. Even if all the others will vanish, it is able to survive and remain. The truth is unchanging. If one deviates from its essence and moves away from its fundamental position, then such people, gradually moving away, will disappear completely. Ideology must also be original. Therefore, in the Unification Church, we talk about the Divine Principle. It is unchangeable forever and ever. It has no concept of struggle. Everyone who acts in accordance with it will enter into the eternal Kingdom of Heaven. When you come to God then you will be pleased with any of His touches. You will feel good in your soul and your mind will be fine. You'll feel good wherever you are, you'll feel good all the time.

You all think white people are beautiful, don't you? Does God like black faces or white faces better? He likes faces of medium color - yellow. Therefore, He has prepared many nations of this race. White and black people will be only about 1.4 billion and the yellow race - 3.7 billion. 74-78% of the world's population comes from Mongolian race, those who bear the Mongolian spot. They spread to the cold places of Alaska, in the north, and pushed away those who ate meat. Mongol people pushed away those who practiced piracy and hunting. They did not make firearms or kill animals with guns.

The question is, which country's people from a geopolitical point of view will remain on Earth in the end? These are the people who can live both on the seashore and in any climatic zone - cold, tropical and temperate. Under the leadership of such people, the world will become one. History should be viewed from this perspective. If the Mongolian race saves the religious sphere, which has not changed for thousands of years of history, then from 70% it will grow to 160-180%. If a person's core is well saturated with the original smell of God, he will quickly figure out what is what.

Which people have created a culture that brings harmony and unity on the sea and on land? This is the civilization of Italy. Roman Civilization. Climate influenced the musicality of the Italians. A cycle of three cold days and four warm days. On the basis of maritime civilization, the climate of the Korean peninsula is similar to the Italian, its population sings well, they stage comedies and tragedies well. When a typhoon strikes, it is scary, and when the wind subsides and the sea becomes calm, you want to live on the sea all your life. Such a life allows you to live in any climatic zone. They can speak, but they also sing well. This also applies to opera. Did you know that in ancient Rome people could talk in the style of an opera song when they met? The song captures shimjeong, so even one word expresses the feelings of the

people and their culture. The four seasons allow a universal culture to emerge. People from such an area can become the central figure of the highest united cultural sphere in the world.

In Europeans, blue eyes on the background of white skin look very beautiful. They lived among the snows, they had to look for water and their eyes turned blue - a protective color. The Korean climate is determined by scientific principles. Three cold days and four warm days make the number seven. When warm air rises vertically from the ground it becomes cold. Usually, the temperature of the atmosphere is low - up to minus 50. But the earth remains warm due to the warmth of the earth's interior. Three cold days and four warm ones. Koreans are the most enduring people, so while in the tropical zone they can chop wood and work. Koreans can also work at the sea. I've been at the sea for 25 years. Who can control the ocean world? When you live there every day your dreams come to life. Different circumstances make the ocean world a treasure trove of art and culture. The Teacher also knows farming. Achoo! Don't sleep! Koreans live long lives anywhere in the world: at the North Pole and in the tropics. I say to you this from my observations having traveled around the world.

Communist-thieves lived in the Soviet Union, so Koreans did not like it the most. In the past, the Teacher had never flown in an airplane over the Soviet Union. I flew around it. People from Korea belong to the same sphere, so everywhere they build a united tower, fortress and altar. If you are not armed with Korean language, you will not be able to fight.

Can an amoeba gradually develop and give birth to a human child? Can a person emerge from an amoeba, bypassing the seed in thousands of stages? Did the amoeba evolve into a monkey by passing through the gates on thousands of stages? Even if you collect tens of thousands of gorillas and pray over them for thousands of years, a human being will not appear! Do you understand?! (Yes.) Whose words in the light of God's providence are true: the Teacher's or the Marxist-Leninists' of the Communist Party? The origin of species is unchanging! God's absolute, unique and eternal love is unchanging. The core content of the Father's speeches emphasizes the importance of lineage. True love, true life, and true people have disappeared because of the loss of true blood lineage. Everything was ruined because people got married in the wrong way. It happened forcibly, so you need to force people to enter into international marriages!

...

Ukraine in Korean sounds like shrink. People here cower in fear, shrink in fear. So Father had to give Words to correct this situation. Kyiv sounds like Key fall, lost key, so Father had to bring back this lost key again.

Got it? (Y-e-e.) Will you follow Father or your Soviet Ukraine or some Marxism, or maybe America? (Father.) I'm not going to oblige you to follow me. In the spirit world, I can, in the blink of an eye, arrange mass weddings for thousands of couples. Marriages for 150 million couples have already been completed. If you do not want to suffer in the spirit world, dispelling a thousand-year-old resentment with bitter crying, then you must receive the marriage Blessing. Then it will be possible to resolve in 10 days what takes 100 years and, in a month, what takes 1000 years. We need to prepare for such a time on earth to bring everyone to the Kingdom of Heaven as soon as possible. The final conclusion: this is not a threat, but if you want to check whether this is really happening, then die and see. Perfection must be achieved on earth. You have to do it in this physical world, no matter how difficult it may be for you. It is your mission on earth to achieve perfection. Without this, there can be no perfect result. Got it? (Yes.) Understand?! (Yes!) Do you understand or understood? (Understood.) Once understood, you need to act!

Sit down, I just want to look at your faces. (Father.) Br-r-r Father! Father, your Teacher, decided to walk around so that you could see if he looked like a man who could take responsibility for the problems of marriage, life, and your eternal life. If you don't feel it, you can get out of here. Are you leaving or do you want to follow? (Yes!) Yeh-es. In Korean, it means Jesus. And here I come to see people from the Communist Party. You should know that this Father is more attractive and outstanding than the fathers you used to have. Now in the spirit world Jesus, Confucius, Buddha, and Muhammad greet True Father by saying, "Good morning, Father, True Parents." Those who want to follow the Teacher, quickly get up before I open my eyes. Sit down. I haven't seen you. We have freedom. You need to act for the next three years until the 8th year of Cheon Il Guk because I can go to the spirit world. Then you will not get the Blessing. It's a great blessing that we were able to meet. You have to become ripe fruits. There are a lot of problems, a lot of things to teach, but what if I have to go to the spirit world. Four of my children are there.

Remember the speech I gave. It has answers to fundamental questions. I proposed building a bridge or tunnel across the Bering Strait. Now developments are in process on the American side, but Russia should also take responsibility for this project by building a railway. Stalin displaced thousands of Koreans in Central Asia to die there, but they survived. To correct such mistakes, the descendants of those people who lived in the USSR must do 10, 100 times more for God's providence by following Rev. Moon than their ancestors did harm once. I have taken the initiative to create the Peace Army and Peace Police, and today I give permission to all those present to volunteer for the Peace Army. We can live anywhere, even without money. Teacher can survive without money even at the North Pole. For the sake of God's Kingdom, I can instantly find solutions to complex problems.

What is the size of the Russian army? If it becomes the Peace Army and Peace Police, it will not need weapons. With only a baseball bat in its hands, it will be able to establish peace on earth. In the USSR, a huge number of nuclear warheads were created - 14 to 19 thousands. More than in America. The Soviet Union hoped to gain dominion over the world by force, but we must follow only the peaceful path. Stand up those who can promise that being part of the Peace Army and Police will not kill people, but will educate them using words. Today is the first day of registration of volunteers to the Peace Army. All members of the Northeast continent can join such an army. Is there anyone sitting? Remember that the formation of the Peace Army began in Ukraine and that today is the first day of registration of volunteers to the Peace Army. Got it? As you know, there is still a struggle going on in Israel. The Berlin Wall was torn down, but the wall now being built in Israel is larger than the Berlin wall was. In Korea, the confrontation between the North and the South, which represents communism and democracy, continues. If Ukraine and Russia (Moscow) unite, there will be no problem. In the communist world, the world of Cain, the Moscow Communists and the Ukrainians are different, they are like Cain and Abel. If you unite, then it will not be difficult for you to resolve the mistakes of the past and peace will be established without problems. This will open the way to the Kingdom of Heaven, even for the devilish world.

Representing the people of Cheon Il Guk, the color of the Peace Army for Ukraine is white, and for Russia is pink. It is necessary to make certificates of entry into the volunteer army for Ukraine and Russia of respective colors. In the future, it should serve more sacrificially than the army and police units of the former USSR. In the end, the number of soldiers of the Peace Army should exceed the number of the Russian and American armies. The time has come very close to you when, by taking the position of Abel, by giving education, you can surpass America. So you have to get together your spirit and courage. Got it? If there are several million members of the volunteer army and police from India, China and Moscow, then the problem of confrontation in Israel can be instantly resolved. In the future, it will be possible to give an order for the withdrawal of Israeli troops. Our numbers of Ambassadors For Peace are about 30 times larger than the numbers of ordinary ambassadors. We have several hundreds of non-governmental organizations. Such a structure is already being built, but your task is to spread the word of the Principle everywhere. Learn the Principle even by taking academic leave from universities for a year. Do you understand? Did you understand what Teacher was saying? Then applaud.

I'm putting off my departure to be with you. Is it clear? I want you to fulfill your responsibility. Fulfill it the right way! I could not join the army in my youth, instead I devoted my mature years to liberating the whole world. And now I'm over eighty years old. The religious conflict in Israel and the division along the 38th parallel in Korea are explained by the mistakes of communism. You must understand and pray for the solution of these problems. How many people do you need to gather next time, so that I would come here again? If the number of the Peace Army exceeds the number of armies of the countries of the former USSR, then these countries will be fully restored. If Europe and America unite, come together and say, "Ok!", which means Open Kingdom, then the spirit world will come down to earth. In the West, Americans can interpret the word "Ok" as open kitchen. It's good if you think differently here. You can say, "Open Korea." In English, the word "Korea" is like "career." Alright? The Teacher is hungry. It's time to have breakfast and leave, it's half past nine. So I'll end with this and let's sing a song.
