If God has a purpose, he has a mission to go towards it. God himself cannot carry out that mission. That's where we need people. What is the purpose of God, the world of good. The purpose of this universe is to have the same family centered on one emotion and God. Therefore, before there is hope of man, there must be hope of God. Before there is a human situation, there must be a divine one. Hope and circumstance must not originate from man but from God. We become one with God's wish, and even though we have a wish to reach our end as a transit, we cannot achieve it without that wish, and we cannot do it without a direction to reach our end.

Also, we want to be welcomed by everyone and praised more than all beings in the universe. I want to love you again. I want to be loved. That's what I think. That is my real wish. It didn't start with my beloved self. Therefore, he who uses it like his own is a thief. No matter how much you love it as much as you like, the world of human desire, the world of completion of good purpose, and the universe will not be born through it. But without love, there will be no peace or happiness. As the main point of all human ideals, love is more important than anything else. Therefore, hope that began on its own cannot become global. The situation that I started is not a global situation. Love that originated from yourself does not become global love. There is an original guideline that should be that hope. There is an original purpose that should be in this situation. There is a master who should be love. Everyone who owns it is a thief. That is something that needs to be punished. Human beings in this world stand in that position. No matter how big you say, everyone is a thief. That's why it's a world of sin because it's a world where those people live. It will be like that will happen. Therefore, the word that there will be a heavenly hearing at the end of the life is also a word of precious conclusion that has to be proved historically point of view.

From that point of view, it is a land of thieves all over the world. It is a strange country. Therefore, I prefer a holy country to a country like this. It is said that this is the original human form. "Let's go to the country we wish for." That country is not what it is now. It is not democracy, communism, or Japanese nationalism. It's not Japanese nationalism. Then, when I think about it like that, I understand. Let's go. The Unification Church teaches how to do it and how to get there. The mission of the Unification Church is to lead the way and pave the way for the right path, and it is also the lifelong goal of the teacher who leads the Unification Church.
