THE 2ND INTERNATIONAL CONFERENCE ON THE UNITY OF

NOV. 1972

On November 23~26, 1972

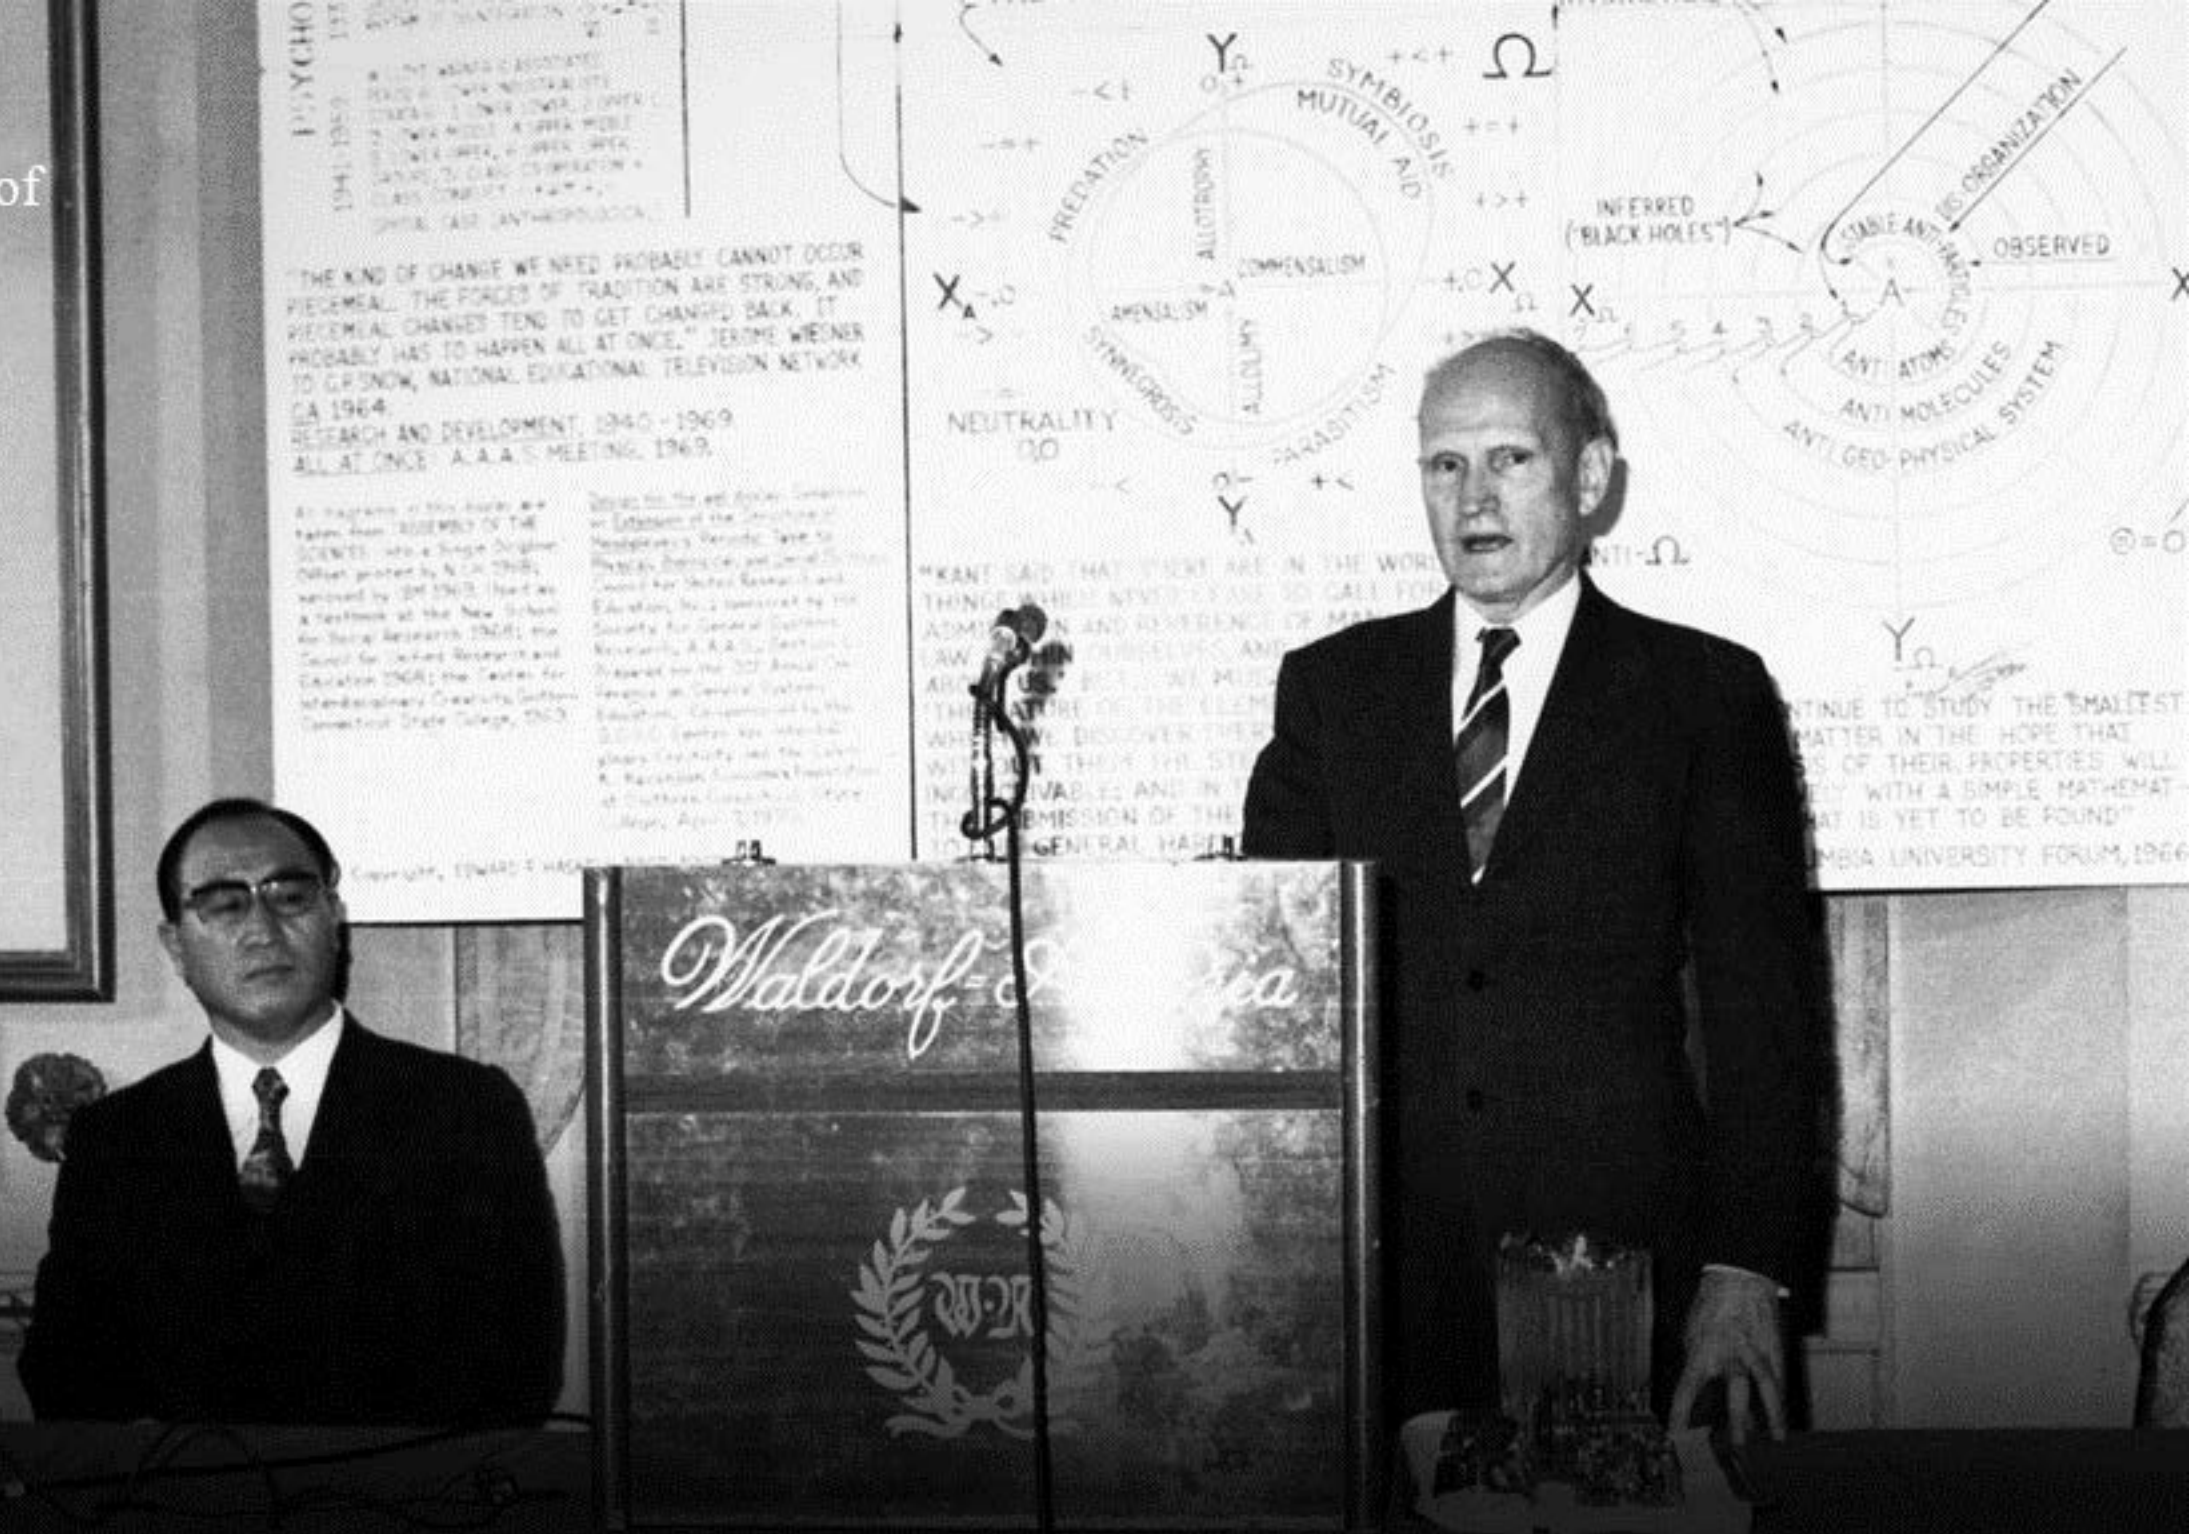

*the first international conference of the Unity of
the Science at Waldorf Astoria New York, the US.*

World Conference on the Unity of the Sciences

Sunhak
Institute of
History

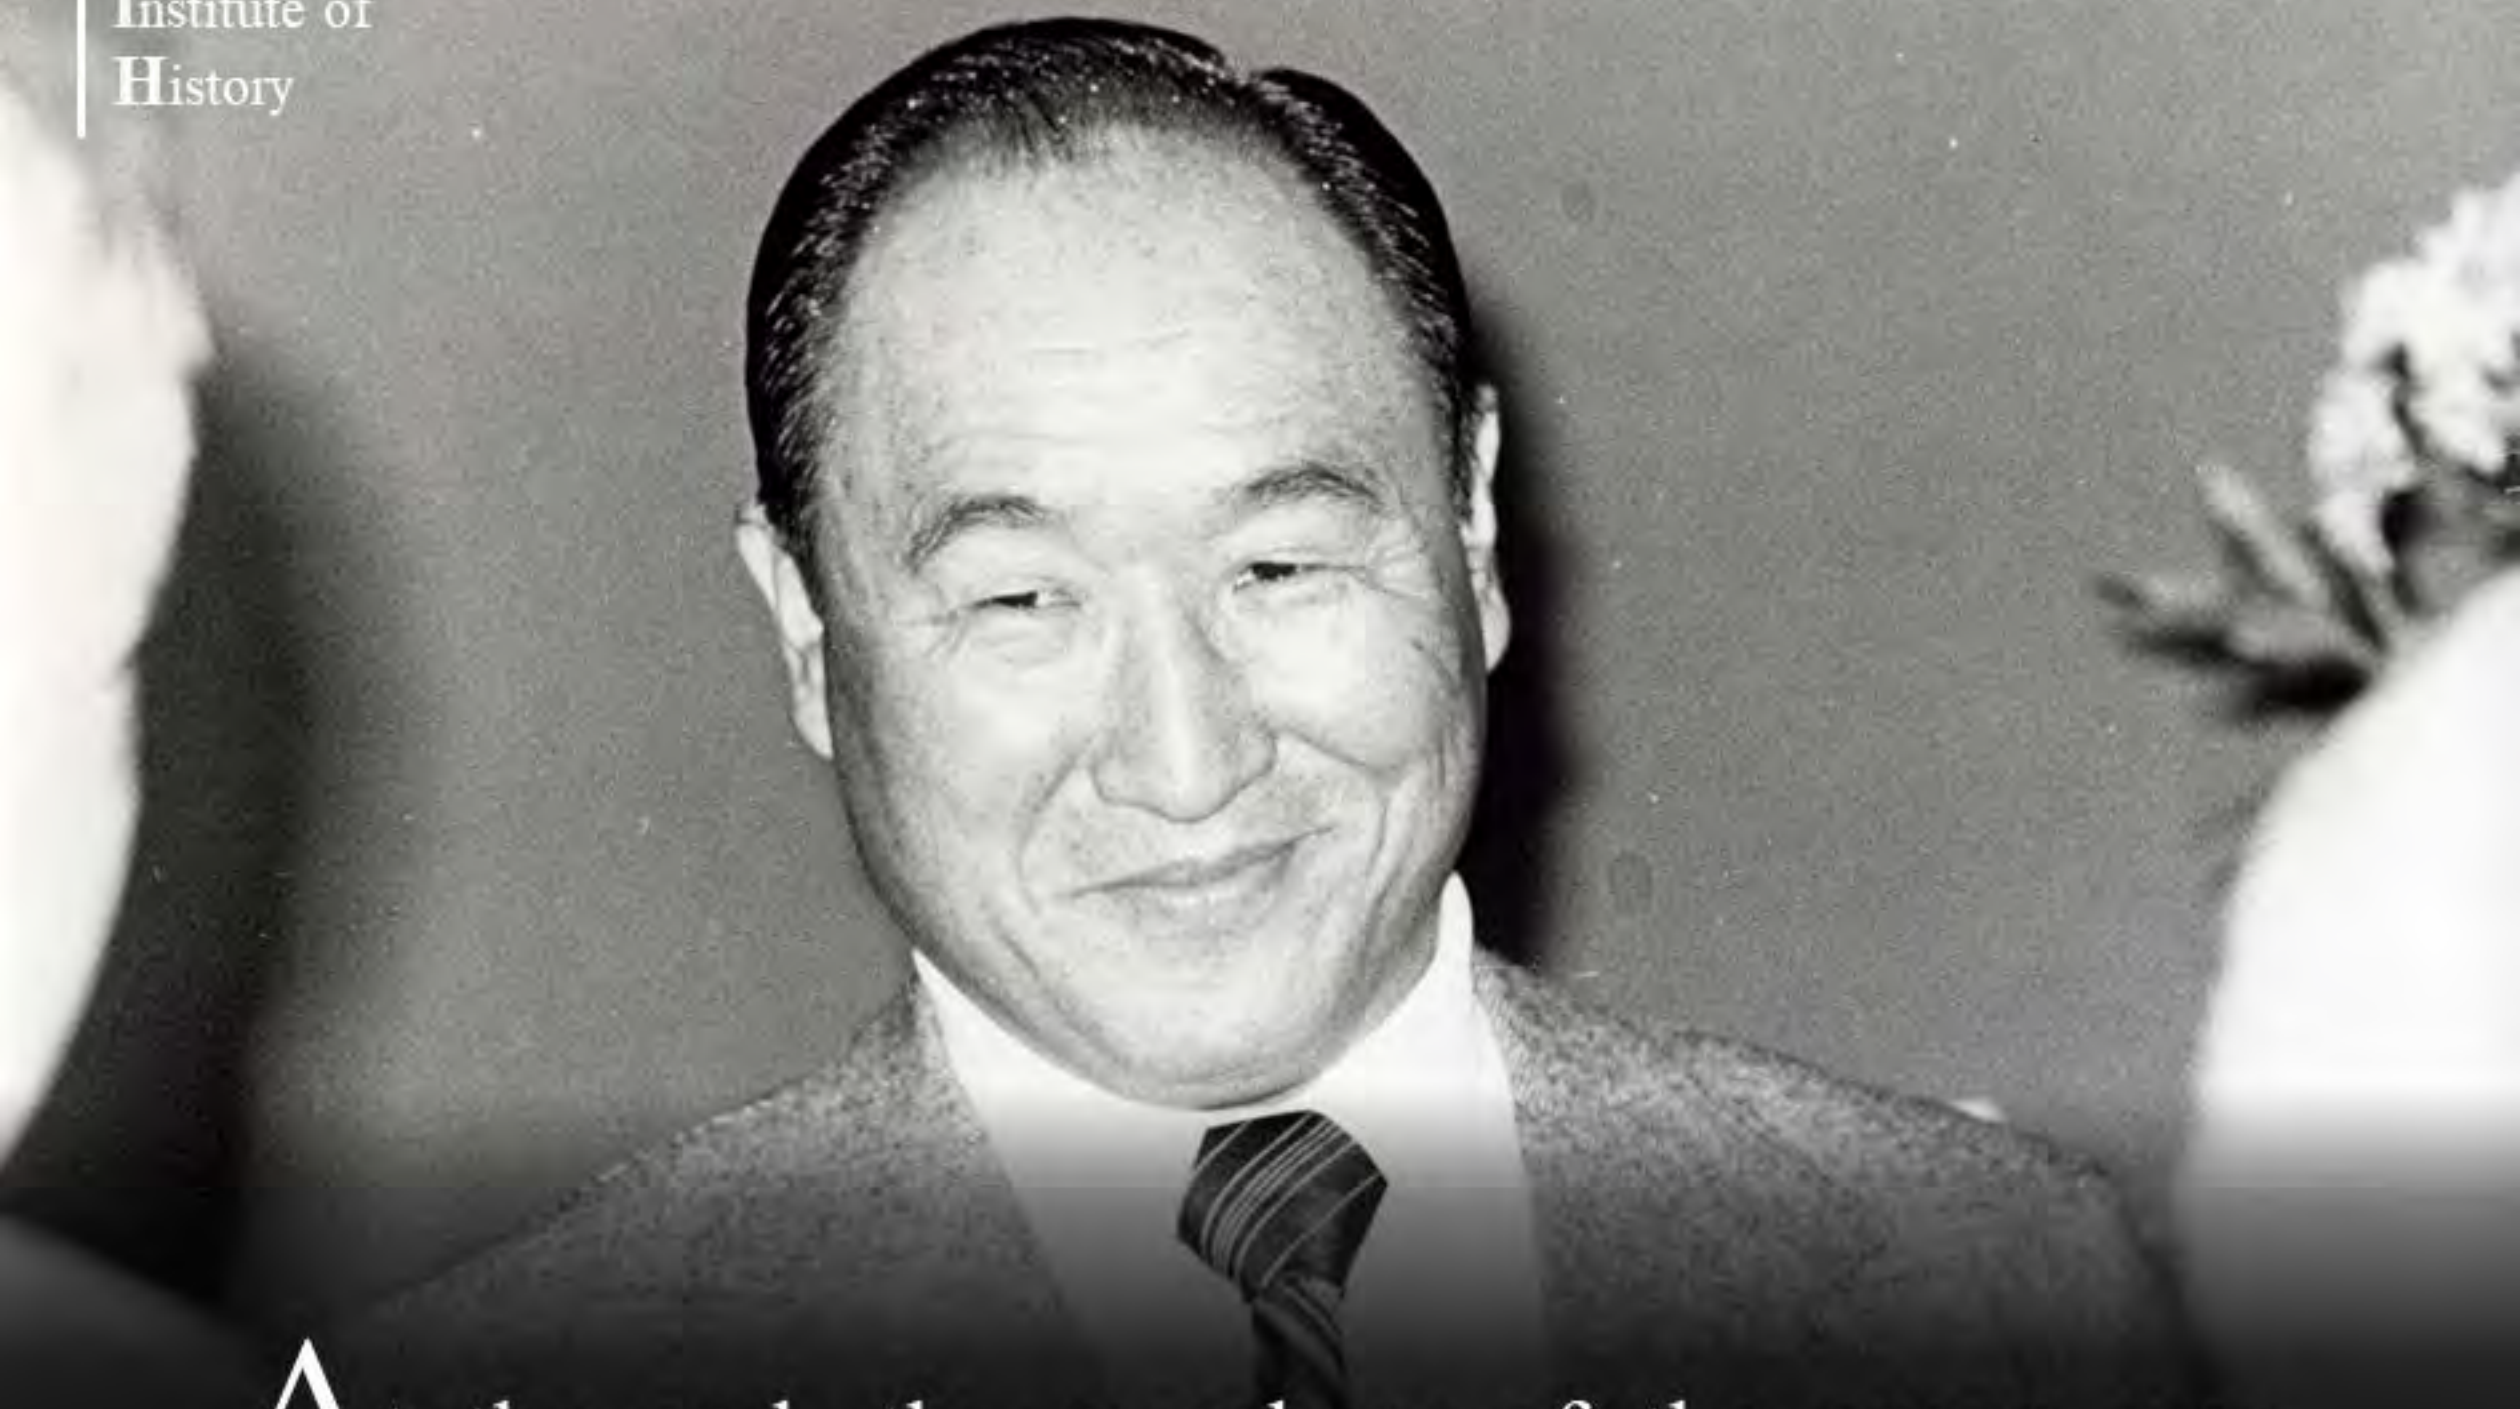

The first international conference of the Unity of the Science is the international conference to discuss about the issue in the society. The international culture foundation invite the scholars during the Thanksgiving holiday in every year.

T rue Father planned the international conference of the Unity of the Science during his third world tour. At the conference, Mr. Edward Haskell conduct the onference at that time.

Dr. Haskell invited 11 scientists and established the world scientists group for deveioping the world. Additionally, the book “Full Circle” was publihsed and recored the reserch results.

At the end, the members of the group was decreased into 5. Dr. Haskell was inspired by True Parents when he met them, so he helped True Parents to establish the first international conference of the Unity of the Science .

The first international conference of the Unity of the Science was expanded under the motto “for the morality of the modern science”. At this conference, True Father delivered the keynote address entitled “the mission of the unified science for the world molarity.” for over fifty scholars who were from 8 nations.

Until 2017, this conference had been held 23 times, and many scholars had the discussion about the relationship between religion and science, absolute value, and the new value movement.

“

Here today, some pioneer scientists are systematically integrating and unifying the truths of past scientific discoveries into a new system of philosophical science. I think this is noteworthy, worthy of high praise. It corresponds to the historic emergence of a new system of Unified Thought that unifies past philosophies and religions and establishes a new view of value for the modern age. As I previously pointed out, the main mission of science is to improve humankind's material life. I expect Unified Science will contribute with a new effectiveness to that end.
