Dae Mo Nim - August 3, 2014

After returning from the African Tour (June 21 – July 2, 2014) Dae Mo Nim spoke to the members of the 1226th 2-day Workshop on July 6 to the 40-day workshop and 2-day workshop trainees. (Edited: Department of Education and Planning)

Annyeonghaseyo.

I just returned from the 3rd Africa Tour. Every time that I visit Africa I always feel, 'I have to give much more interest. I have to give much more love'. There were many beloved 2nd generation in Africa. When I think about, 'How can we have a better education for these 2nd Generation? How can we support them so that they could live a life following the principle?' were the source of the pain in my heart.

Hope found through the Africa Tour

When I arrived at the airport a 2nd generation couple welcomed me with flowers. It touched my heart thinking that 2nd generation in Africa receive a blessing and live their life as blessed families. When I visited a village on water and saw True Parent's photograph held beautifully in a room I felt, 'This is life of faith. We have hope'.

There is no bathroom in the village on water. They do it above the lake. They wash their clothes with that lake and eat the fish that they catch there. Even in such environment there 3 blessed families live happily.

When I was climbing the ladder to visit one of the houses I felt that the support would break so only a few could go up. But we all went up at the same time which actually cracked the support and the house tilted sideways.

So I asked Mr. Inpyo Moon (lecturer from Chung Pyung Training Center) to sing a song and he sang 'Ommaya Nunnaya' (Dear mother and sister). And the members also sang songs and they were truly great singers. After giving stationeries that we brought from Korea to the 2nd generation living there they would wave their hands wishing us a safe trip back home. I had so much trouble recently but looking at their warm smile I felt, 'My troubles are nothing'. When you also live your life you should always have a heart that you are happy. Isn't that so? We are all happy.

In Africa, not only do they not have a church but they also do not have an education system. Despite such environment I was so surprised to see so many members. How many times were they able to meet with True Parents? Even in a village on top of water they will attend True Parent's photograph and live their lives feeling the love of True Parents.

Let's take care the 7 billion people of humanity with a parental heart

In the principle it clearly states about good and evil 'Good is love and evil is fallen nature'. To live according to the words of principle. To develop. Love is the power that can create happiness. At the time of Jesus it was 'Amnesty' but it's more of 'living for the sake of others. Do it with True love' than 'Amnesty' in the time of True Parents. We have to live centering on the words of the principle and watch over the 7 billion people of this world and start thinking, 'What can we do for them to live their lives with a parental heart?'

We are not going to follow what the people in the society do but from a different position, centering on True Parent's words, we have to work really hard to establish our world. The tour is held so that we could engraft our culture. When we look at the many things that are happening I can feel an evil will trying to bring the evil culture of the society into our world.

That is why we are not going to blame others but first have a strong mindset, 'My family and I then my church must follow the principle and live a life without fallen nature and develop this humanity of 7 billion people.'

Hope through the 2nd, 3rd and 4th generation

Here we have many beloved 2nd generations. The 2nd generation are starting to carry important roles in many areas. Especially for Korea, the president is a 2nd generation. There are many who are also doing parish leaders.

The way of the 2nd generation see things and think about things must be a principled one. Lifestyle cannot be changed right away. That is why we have to create an environment where we could see, listen, say, and learn good things. That is how the providence and God's Will can develop.

I think, 'There is a future for this church. There is a future and hope'. Why do you think I think like this? We have 1st generation then we have 2nd generation. Because we have the 2nd generation we have the 3rd generation. There are a few 4th generation because we have the 3rd generation. That is why we have a hope. However, we have to live a principled life and bestow it from the 1st to the 2nd, 2nd to the 3rd and 3rd to the 4th generation. When we do this the life centering on the principle can be established eternally with the blessing received by True Parents to the 2nd, 3rd, and 4th generation.

Welcoming the 2nd Generation Era and unite as one

At the time of the 1st generation they spent much time on offering indemnity conditions for building the foundation of faith and foundation of substance. You mustn't forget that you who were born without the original sin must look at God's Will with one heart and one aspiration and fulfill your responsibility of creating it.

Sometimes I hear some people saying that the 1st generation did not fulfill their responsibilities. However, the 1st generation did complete their responsibility. Right now, absolute good spirits are created and we are changing Satan to Angel. Why are we able to do this now? Through the special authority of True Parents and the foundation of faith and foundation of substance with all the indemnity conditions made this possible. Even though it is small the foundation of faith, foundation of substance and indemnity conditions that the 1st generation had offered also added to make it possible. Therefore, to the village that stands above water the blessed families that serve True Parents were able to establish on earth.

That is why from now there should be 2nd generation emerging to the political world. The society is also entering in the 2nd generation era and there are many movements involving the young generation. The political world is working hard through various ways to gain young adults and university students to join their political movement. That is why our church must create and establish an era where the 2nd generation could hold the hands of the 3rd generation with one heart and one aspiration.

Reason for witnessing young students

What age do you think is the most efficient in this smart or IT era? It is the people in their 20s, 30s and 40s. When you enter your 50s your heart becomes plentiful. You become an adult. You become an adult when you are in your 50s and 60s but the IT business is at its peak when you are in your 30s or 40s. That generation must push and support the 50s and 60s. It is only when you are in your 30s and 40s when you can actually pour in passion in your work.

That is why the young 2nd generation must give many ideas. When you look at the history of the church the university students and the seonghwa (young) students have witnessed much more. That is why the church was able to grow rapidly. However, we cannot even energize the culture of witnessing among the seonghwa students. This also applies to the CARP. However, the environment of witnessing children of this society by the seonghwa students and the university students by the CARP is much clearer than before. Do you know why? Because we have the 2nd and 3rd generation.

What did you feel when you saw the blessing ceremony held at the Foundation Day? It was held at the CheongShim Peace World Center but how many pairs were unmarried then? When that World Center is filled with unmarried people, this church grow and develop. The youth give birth to children and to 2nd generation, 3rd generation and the 4th generation which makes this church grow.

The 1st generation must help so that the 2nd generation could work and be active and establish a culture of educating the 2nd generation.

The 2nd generation of the world must be aware of God's Will and have many debates for the development of God's Will

There are so many 2nd generation in the world. For the culture where the 2nd generation could develop the Will to be established the 1st generation must give interest and love to the 2nd generation and do education together with them. The 2nd generation must inherit the foundation of faith and foundation of substance and their mindset of overcoming whatever is thrown at them to overcome and develop the providence. And attend the 40-day workshop with a mindset, 'centering on God's Will I must have responsibility for the Will.'

You have to start worrying about the principle. This summer we will have many students from Korea, Japan, Europe, and America. True Mother said that we live in a one second realm. In this era of 1 second as we establish a relationship with others we must have a time to debate during the 40-day workshop, 'How can we develop God's Will?'

Only just doing the Chanyang Yeoksa is not the important thing. The Chanyang Yeoksa is a time for you so that you could remove evil so that you could live a rightful life. So therefore, after you remove evil spirits, you must worry for God's Will, think about how to live rightfully. Centering on True Parents and the words of the principle the 2nd generation should have a time to think and debate about this topic.

You cannot leave the mission 2020 to the 1st generation but the 2nd generation must have a strong resolution and determination that they would become victors before 2020. With that in mind I hope that you can focus on your 40-day workshop. So at this difficult time we all should have one heart and one aspiration and while True Parents are still on this earth have a mindset of completing the Will. Never forget that Chung Pyung Heaven and Earth Training Center is here for you and I promise that we will do our best for you.
