Insights into Korea's Sudden Rise

Global Peace Convention Panel on Cooperation in Energy, Transportation and Environment fields in Northeast Asia (Hyun Jin Moon)

Emanuel Pastreich
December 7, 2011

The recent Global Peace Convention in Seoul (November 28-29, 2011) brought together a remarkably diverse group of individuals from NGOs, business and academics to discuss the future of North-South relations. The concept of addressing the North-South division by inviting the input of youth from around the world was particularly striking. See the introductory video for Global Peace Convention for a sense of the approach to North-South relations:

I served as the head of the panel on Energy, the Environment and Transportation. we had a very diverse group of scholars and practitioners speak about concrete approaches to cooperation. The papers will soon be available.

(November, 29, 2011 14:00~ 15:30)
