

## America

### 1. Introduction

For those of you who were born and live in America, it may be difficult to see; but from the eyes of those of us who lived in and visited other countries, we can see and feel the meaning of America as a microcosm of the world – a multi-racial nation.

### 2. Why Is America this way?

America is not only a big nation, but is also a beautiful country, where all kinds of races are living together – black, white, yellow, red, and brown. Five colors of skin are living together.

The forefathers of America brought Christianity to this country. Without Christianity, there was no America as we know it. “In God we trust” is the spirit of America. Without Jesus – no Christianity. Without God – no Jesus. Without God, there could be no America. God built America. It was His plan and His country.

### 3. What is God’s Will?

God’s will is to build the Kingdom of God on earth as it is in heaven.

The Kingdom of God means the world under God – one family under God. God is the parent and we are the children. The parents and children should be living together. Therefore, America is the model of the coming ideal world. This is the reason why America is the multi-racial nation that it is. God brought the pious puritans to America from Europe (the white race). The Indians were already living here for many centuries, and the yellow race came here from Asia. We recognize that the way in which the black race were brought here was not the will of God, but it was God’s will for the black people to come to this country and live together with other races. All brothers must come back and live together with the parents. If even one brother is missing, or forsaken, or mistreated, how painful the Father will feel. This is the reason why we are here, to make this nation a model of the coming ideal world.

### 4. America’s pains

After thousands of years of separation, a family reunion is taking place. The different races should have embraced each other in tears of joy. Unfortunately, however, the forefathers brought Christianity but could not bring and sustain the love of Jesus. This created a great deal of suffering and difficulty in this country, in spite of the sacrifices of Abraham Lincoln and Dr. Martin Luther King.

We can see clearly today that the suffering is still continuing. Family breakdown, immorality, empty seats in the big cathedrals, etc.

5. Course of suffering

When Adam fell, he left God in tears. God is the parent, and man is the child of God. When man lost God, man was no longer a child of God. Man lost himself, his value, and his identity, when he lost God. Man lost his parents, his brothers and sisters, becoming alienated and indifferent towards one another. The more alone and alienated man became, the more self-centered and selfish. Struggle, bloodshed, and all sufferings of mankind is to come back to God. America is the leading nation of the world. History is the history of salvation. History is heading towards God and the ideal world.

6. America must come back to God

If America is the model of the coming ideal world, the leading nation of the world, then America needs no one else but God! The offices need God, the factories need God, the shops, the homes, and the churches need God. The Government needs God, the Congress, the Senate, the governors, and even the President needs God.

America needs God! America must come back to God! America needs a new revival. America needs the man of God, because history must be led by the man who is led by God Himself. Then America will be the real model of the ideal world. America will be the true leading nation of the world.
