

What a Precious Blessing True Parents on Earth Are!

Excerpts of Hyung Jin Nim's Testimony
at Cheon Jeong Gung Museum on February 8, 2007

Philologists say that our communication by languages is only 10% of our whole communication. 90% of the communication is done by other methods except languages. I have listened True Father's words a lot from my childhood. At that time, I thought that True Father was a formidable person. However, after Young Jin elder brother has passed away, I had a time with Father, and realized that Father was very different from what I thought. For example, when Father and I talked with each other, once we spoke to each other at the same time. At that time, Father made me talk. I am younger than him, but he tried to listen to me. I was surprised at it. When I talk with my younger brother and sisters, or my wife, or my children, I have not done like that. Rather than listening to them, I have tried to speak and dominate them in my family. However, Father was completely different. I seemed to learn from him thinking, "I have not done like this."

One day, when the whole family gathered for dinner, Father was tickling the sole of True Mother's foot. (laughter) What an attractive and beautiful scene it was! When I saw it, I thought that it was a precious teaching from True Father. At that time, I felt that I had a glimpse of the "world of freedom, peace, unity, and happiness" not through the words but through True Father's action. It was a tiny moment, but it was a joyful time for children. I thought, "I have to express my love through tickling the sole of my wife even though I would become 88 years old." I thought it was an important training. A few days later, my wife tickled the sole of my foot. I asked her, "Why do you do this?". Then, my wife answered, "I want to resemble True Father." I was also glad that my wife tickled me.

True Father always talks at Hoon Dok Hae. Therefore, you might think, "Father is always talking," but he is really quiet in his daily life. He always prays, meditates, and thinks. He listens more than he talks. I deeply felt that we needed to learn not only from his words but also from True Father's life.

For example, when Father holds hands with Mother, he was touching and rubbing her hand by his fingers. He was not just holding hands, but also fingering her hand. (laughter) When I saw that, I was inspired with that, thinking, "This is a secret method to express true love!". Until then, I just held hands with my wife. However, after seeing the "secret method," when I held hands with my wife, I tried to finger her hand. Then, how happy my wife was! This is the secret method to express true love! (laughter)

I learn a lot how the ideal family is when I see True Parents. Not only True Father's words, but also how Father lives, how Father and Mother are relating, or how True Parents relates with their children are very important theological teaching.

When I was young, True Parents always go around the world to do God's Will. They were very busy, but they always gave us telephone calls. Moreover, whenever it was a birthday of one of us, they have written a letter to him/her directly. Before Young Jin elder brother passed away, I could not understand True Parents' heart, and just received their letters without the heart of gratitude. However, after Young Jin elder brother passed away, I realized what Father has done. Therefore, I also tried to write to my children on their birthdays. I have not written to them, or called to them for a long time. I realized how hard it is to write to my 5 children. But, True Parents have written to 13 children! How hard it was!

True Parents are continuously making efforts to love not only by words but also by their actions. Seeing that, I thought that I also need to make an effort to love my children.

Here are also people who received the blessing this time. I need to say, "The life of husband and wife is not always joyful." It is not like a drama such like: "Husband and wife dance together on the sea." In reality, after dancing for a few hours, we feel pain in our feet. (laughter) Husband and wife sometimes misunderstand each other, and fight with each other. When I see the couples who live together for a long time, they live for a long time not just because they get along very well with each other. They live together for a long time because they try to be thankful for each moment in every aspect of life. I realized how important the life of gratitude is after Young Jin elder brother passed away. True Parents always make an effort to increase and express their love. They devote themselves to raise their love. It is as if they are continuously making an effort to save their love in a moneybox of love. Because of it, their love seems to grow and become big.

When we see the Principle, human beings have intellect, emotion, will, and a physical self. Seen close up, True Parents express their love by heart, express their love by emotion, express their love by intellect, express their love by will, and express their love by their physical selves. Father express his true love to Mother with heart, emotion, will, intellect, and physical self. It is not just in one way. Therefore, True Mother feels his love very much. I think Father is practicing the Principle. Seeing Father, I thought that I also have to express my love in various ways.

Thinking these things, it is a precious blessing for us that True Parents are on earth with us. We can learn not only from True Parents' thought but also from their life style. We can directly feel their love because they live on earth. Those who will live on earth 200 or 300 years later cannot enjoy such a big blessing even though they may see the videos. Therefore, I think we need to resemble True Parents during the time they are on earth. (from the Peace TV)

真の父母様が地上に生きていらっしゃることがどれほどの祝福か

2007年2月8日、天正宮での亨進様の証し(抜粋)

言語学者たちは、「言語によるコミュニケーションは10%に過ぎない。90%は言語以外によるコミュニケーションだ」と言います。私はお父様の御言を幼いときからたくさん聞きました。そのときはお父様を恐ろしいお父様だと考えました。しかし、栄進お兄さんが亡くなって後、直接お父様と時間を過ごしましたが、想像とはとても違いました。たとえば、人と話をするとき、両方が話し始めようと詰まるときがありますが、その時、お父様

が待たれました。私は20歳の子どもなのに、お父様が私の話を聞こうとされるのです。本当に驚きました。私が弟と話すときや、妻や子どもたちと話す時には、私はそのようにしませんでした。家庭では私が何か支配しようとしていたのです。しかし、お父様は完全に違いました。「あっ、私はこんなふうにしていなかった」と感じるものがありました。

ある時、食事で集まったとき、お父様がお母様の足の裏をくすぐり始めたのです。どん
