FOUNDATIONS

2022 - season 2

"Today, people do not pay enough attention toward each other. Regardless of sex and age, everyone has the attitude that dealing with people is annoying. If you view people as a nuisance, then you can never walk the heavenly way. If you can surpass everyone in loving people, then you can come to possess the power of life which will allow you to persevere through the most difficult crises - crises that are like autumn and winter. I hope that you can come to understand that that kind of power of life will assert itself strongly and head toward the spring, eventually becoming the mother-body of the new world and new life."

(True Father, The Way of the Spiritual Leader 2)

"We all need to go together as precious children of the providence centred on true love. What I mean is that all of you born through the Blessing of True Parents should move forward together, without anyone falling behind. Education centred on true love is important. We should treat other members with the heart of a parent, the heart of living for their sake."

(True Mother, 2013.07.05)
