

## **WT Activities, CARP Czech Republic**

Dear European brothers and sisters, we would like to share with you about our regular WT activities.

First of all, witnessing - we have currently four different approaches. These are street WT, public university lectures, monthly social (cultural) evenings and WT with tent. For example to organize "tent WT", we have to receive permission from Prague City Hall and to rent a proper public space for the tent. We use information banners and for those who come to our tent we have True Father's autobiographies ready for sale. Simultaneously, we approach people and invite them to our tent. We present them our activities and offer them to participate so they can give us their contact. To be realistic, most of our guests, who really join our activities, came based on personal invitation, based on friendship rather than invitation from the street, but still we have few concrete experiences that people came to our lecture after being approached on the street and many people gave us their contact.

Recently, during last tent WT, we also co-incidentally met Czech ex-prime minister Mr. Paroubek, who is known for his failed marriage affair and harsh treatment. Surprisingly, Mr. Paroubek reacted quite openly. He rejected autobiography but took an invitation leaflet to our up-coming university lecture about current North-South Korean situation.

Through this we would like to express, that we stand for our True Mother and we keep trying to find ways how to restore more and more brothers and sisters.
