Good morning to you

I hope you're doing well

1368th Tianxin Garden is honest all night

Summary

Miracles happen when you become one with Holy Mother Han. Miracles happen when you become one with the true parents in Tenshinki prayer. Tenshinki prayer does not fall to the ground, it performs miracles. I understand this in mind, but the number of prayer must be increased in order to feel it in the church on site. You must pray passionately and participate with all sincerity.

The special patrol officer suffered from an incurable disease, but saw a miracle of being cured after 40 days. I didn't receive a hand from anyone, but I worked with all my heart and soul, climbed the holy place and gave my all to my heart. 40 days later, I saw myself running with an axe and saw the miracle of healing. Parents who have been dormant for 20 years are attending church again and blessed. She gave herself four healthy children. With 40 days of sincerity, he has the ability to speak and heal.

40 days of training is the critical period in which Heaven becomes a relatively officer after establishing a condition for the separation of Satan for 40 days. According to the history of regulation, if a 40-day condition was lost, a 40-year decrease would be paid. Don't think about the 40-day period. Since the downfall of man is a misnumber, the order of return is proceeded as the order of searching for the number thoroughly. When every individual and every church is searching for the number of Tenshinki Seijin, heaven will be moved and separate Satan, so they will experience what heaven will do wonders.

Among the schedule of HJ Tenshin-ken training, the most important part is to participate in Tenshin-sen all-night seishin. I'm here to experience what I was thinking with just my mind. That Heavenly Parents live and work, that Tenshinni is your father's office, that all spirits can communicate with them are Tenshinni, that you have to work hard so that you can get into that position, that you will never distrust your true father and mother, no matter what trials come your way. In that sense, it is very important for public officials to participate in spirituality training sessions.

Proof of Enigmatic Practice 1

When he came to the Shuren School, he realized the serious situation of his mother that he had not felt in Japan, and he repented because he felt sorry for coming without knowing it before. On July 18th, he realized what sincerity is by praying all day in the midst of a storm with a feeling that he doesn't care if he

falls throat or falls down. I met Noshin-sama and Koshin in prayer, and I decided to become a daughter who wipes away her mother's tears like both of them.

Proof of Enigmatic Practice 2

Even in public office, there were always troubles and difficulties. The day after I decided to attend a training session, there was a murder case downstairs in the apartment building where I live, but I was able to participate with the help of my wife and parents. On the eighth day, I received a direct instruction from my father, "Be a pillar of the kingdom of heaven," and on the thirtieth day, I found myself dry, and prayed a earnest prayer. When I saw the image of my mother who was told that she couldn't sleep at night without taking medicine, I cried and resonated with her mother's feelings, and decided to become a spiritual leader not only with the head but also with the divine spirit and truth.

There is only a phrase that 'the future will come when only a spiritual leader who has the spirit and truth will be able to stand.' Not only those who pray should hear heaven alone, politics and economics must advance to hear heaven alone. When you learn to know the underworld, heaven and hell, then you will see the age of competition with true love.

Today's reading of the word "From the true father and mother, the ideal history starts, and new culture, love, life, home, nation, and world starts, and love for the kingdom of heaven and God." The term "true parenthood" isn't something I've ever known. This is the place where several million sacrificial festivals are complaining." "I am now ten years old," says the patrol guardian. With the grace of his true parents, he was cured of his incurable disease, and a new and ideal life began again. You all have to make a day that I am totally born again.

Father's message to our leaders

"If you can't believe in the spirit world yet, you should ask for help to have faith in the spirit world." How to overcome this difficult thing, especially if it is important matters related to the providence, the Aboji can serve through the condition by praying more carefully with Tenshin-ni. It's not that Aboji doesn't want to play, he doesn't play. The central characters in charge of it should pray, and no matter how carefully the leaders pray, if they do not know the power of Tenshinkai Seishin and do not give all their devotion, then they need twice as much as they can to change them from leaders. Only when leaders are directed with sincerity and prayer, they can do

greater offices. Mother always tells what father is accomplishing, but do you understand my feelings when I'm in a position where I can't lift my face. Since the munchies are praying carefully, the leaders are not asking for our help, they will eventually demand twice as much sacrifice as the munchies. He says to command your father, and Aboji is preparing to go, but the one who is set up as the central person does not command it, but it is dismayed. No matter how much revelation you give them, they cannot listen, they are moving on with old habits. How painful it is that the blood and tears of the devourers should be used to lead those who do not know their true fathers, but they are used to lead the hearts of the leaders towards heaven. However, it is through the sincerity of our mouths that we have come this far. The more you are centered, the more you have to appreciate the sacrifice of those below, their elation, and their love of those underneath. You are all there now, not because you did better, but because of the love, devotion, and sacrifice of the numerous people who have your back. So when you are in higher positions, you must be more humble and able to ask questions with heaven in love with those below. That is the true leader. You say you admire your mother, but you have to look back to see how Holy Mother Han really is 120% satisfied household. This message is not addressing one person. This is what I want to appeal to all leaders and all those who will lead. "

The history of the return of the order is being ordained by thoroughly establishing a central person. Everything has a center. Each individual also has a center, and we must follow the path of synthesizing and unifying by the mind and body with Heavenly Parents as the center. Only today must be remembered and made a new beginning. Dear Heavenly Father who is alive, I pray that you all will experience the work of amazing grace by empty your hearts and sincerely prayers.
