### Opening prayer of gratitude

Most Honorable Heavenly Parent

Belove True Parents HEH

Today the 113th Day and our burning heart and loyalty we aim at True Mother while remembering the path of sacrifice of Her and we are here to continue the prayer for Her safety and well-being, True Mother's Life pure and beautiful only for Heavenly Parent and in the Bosom of Heavenly Parent's Love and Blessing... Please allow us to follow and resemble and lay down our own lives for this...

Please work so that the Love and Will of Heavenly Parent can be bestowed upon this nation... True Mother walking the path of the cross alone, that will fulfill the Will of Heaven.. finding a faith where there is no faith and love and in a position impossible to forgive, True Mother forgave... Let us be reborn through resembling these and like a big light many small candles gather, please allow our prayers to be an ocean for the foundation of Heaven to be settles and all the SW mobilized and allow True Mother to be released...

True Mother is victorious and the path of persecution and pain that True Mother waled, please convert it to flowers and joy... True Mother in a dark, lonely place, let our prayers be warmth and comfort to Her and open the Gates to H unified Korea and world and let it be such a devotion with Your guidance we beg

Testimony

second two brothers

grew in quiet rural area and no one my age at the church, just my brother and me and sometimes angry that I had to do devotion first... but the reason I had to hold on to my image was clearly because of my father and mother always offering devotion at my side and not wanting to disappoint them... Looking back that obligation was really love, my parents always worried about me and wanting to sustain my life...

Then two Seonghwa teachers came to the church wanting to offer service for the youth even though they were in the military and for the first time I felt the warmth of that service... learned that the fact that I'm not alone could be such a comfort and best of my memories... Many tasks as studies, sports and the Blessing approached me at once then and I felt that instead I needed to become more calm now rather than that confusion and felt that would be possible through a Workshop and went to the 18th Spirituality Workshop to recapture my

standards and center and the word shimjeong, heart, remains deeply within me, and the words of the Director that it is the original heart that can resonate with Heavenly Parent and True Parents and what cannot become practiced cannot become true.

I was very lacking, easy to receive but difficult to give and follow with practice, so that this Workshop is not about faith for fun but a path of disciplining myself while conversing with HPs... but conviction wavering wondering if my prayers were being delivered... but with the resonance prayer I gained the conviction that I can have conversations with Heaven even times doing well or not and fearful or not, the SW sustains my life and I want this discipline and as continued, my heart began to gather in one place, rather than my personal greed and devotion, I was praying devotion only for Mother and saw that if I pray for Providential problems, personal problems can be resolve, and what can I offer for Heaven to rejoice rather than what I can gain...

The goal was not to be a changed person only but how to think with Heaven, love not as an emotion by a responsibility, a person not who prays well but tries not to let go of Heaven and recognizing my life not as mine but something entrusted to me. I am not a perfected person, but want to become a testimony not just through words when times are okay but when they are difficult.

I thank Heavenly Parent for guiding me here and my family always watching over me and offering devotion by my side and my older brother for walking with me and friends, older brothers and sister I met at church and my maternal grandfather and mother and I will not forget the tears and determination I made and live a life that is not shameful before Heavenly Parent but that can inspire other and as a nurse and channel...

Today is my mother's birthday, and I'm regretful that I don't visit her and give her a gift, but in this way I celebrate and thank you for always waiting for me and praying for me... TY

## HJ Report

Director of Cheon Shim Won Kim Ju Won

HyoJinJong Workshop that began last week... HyoJinJong was a leader of Samseong and where HyoJN used to study and create songs

It hurt my heart to see it had been taken over by society people and was very tunned down like the ruins

In 2024 when I first came here, looked like ghosts would come out...

I was wondering and worrying whether this building could regain its beauty.

Pres. Lee Gi-seong, although he was busy, kept coming her and offering devotion, and he said future generations will come here and inherit HyoJN heart and cause a great revival, and I at the time couldn't imagine what he was saying...

The Seongwon Construction Company took responsibility and came and started renovation, and PL came and visited and observed the recovery process, and slowly it regained its beauty.

Little by little I was able to feel hope. True Mother before the completion contacted us and we visited it together at a time when it was negative 12 degrees, but Mother with a Mother Who wanted to see Her son visited corner to corner of this place and said, 'Ah, we had such a great place.' and She was so happy and we name it 'Hyo Jin Jong' and Mother Blessed the Place with such a name...

With Pastor Hanjoyol and Deputy Oh Jo Il, our Spirituality Academy worked diligently to clean the environment around it. And PL came frequently to offer devotion. For HyoJN to work with our pure water adolescents and young adults, for about a year, we conducted many WSs to grow its spirituality. And with the devotions of PL and the Blessing of True Mother, Hyo Jin Jong was able to be born anew with a beautiful appearance applause to True Mother and HyoJN

To Pastor Handoyol also so much devotion and the mobile team, gratitude... And about the HongJinJong Workshop, especially along with the others, I acted as staff, and HyoJN happy because 2nd gen taking initiative in this Workshop... I was dozing a little at my desk and saw HyoJN walking in front with a guitar and he was talking to me and saying, 'Hey, Hyo Jong is mine' and He said to repeat it and then to repeat it louder and then he said, 'Hyo Ja is yours' and all of you ought to be able to shout, 'Hyo Ja is mine' and I wrote in red ink 'Hyo Ja is mine' and on top a little bigger.

So, HyoJN wants us to be children who can all say 'Hyo Ja is mine' and I was able to feel that heart, to inherit the heart of HyoJN and be reborn as true children of Cheon Il Guk who can attend HMH.... through musicci and nature grow our spirituality and with the heart of Hyo Jeong create the future... Due to my shortcomings this Workshop was delayed from when PL said to begin it... and could only advertise it 3 days before the Workshop and only 33 were able to participate.

But from now I believe the applications will be more competitive than Cheonshim International High School. And like the red letters in the slide, this album was supposed to be released a few months ago, but we read 'Be One with HJM' and they took some time to think about this song and I believe it was a message from HeungJN... These are words from Unification Thought: Normally, the meaning of culture is politics, economics, education, science and philosophy, all the things of human endeavor, but at the center of that is arts.

So, at the new culture, there must be activities of true arts for the growth of new culture.

True Mother's Words: In front of Heavenly Parent and True Parents, like HeungJN and HyoJN, you must be loyal and become filial sons and daughters. The happiness, freedom, peace and unity that humans pursue, in there must be an artistic field, and it is most important to express beauty in painting and music, and music is a conveyor of prayer. What would you do if I asked you to draw out Heaven on earth? First you must express through your body the happiness you feel in your heart. Expressing, you can do it with dance and with music, and you can also express it with drawing.

And True Mother at the Workshop Center said this: 'Chung Pyung must be of service to our members' growth, resurrection and must be more advanced than IT Companies, come and improve many WSs.'

True Mother is telling us to develop many WSs, and recently I was able to feel that we are actually fulfilling True Mother's Words little by little... And here is a sketch video:

We had the opening ceremony with the history and meaning and value of it. The fireplace in the picture, Pastor Handoyol, while wanting our trainees to better resonate with HyoJN's heart, HyoJN wrote songs with a fireplace in the background and the fire sounded like a rhythm and we had the very nice background music during PL's main message...

And HJJ Workshop fundamentally, if you have the purple jacket, you could register... So, everyone attending had spirituality above average and 'It was no joke' and starting out, they were tears... In the living room there are book where you can encounter HyoJN's Words and here and there, rare photos of HyoJN... and you could feel this was really HyoJN's House...

The photos were on a table he actually used in the past and an old Divine Principle Book that HJN signed himself, like a HJN photo zone... and I took a photo with me as such... I hope many participants in the future...and while PL made the Cheonshim Choir, we also framed a piece of paper that PL wrote lyrics on for a song for the CS Choir and we put that as well...

So, Coordinator Kim Guy Yong, we have this nature resonance art devotion...

Testimony: able to feel the greatness of nature and all things Heavenly Parent created and reflect and feel comforted... While singing Planting the Love in this World, could feel love planted...

At first didn't know about HyoJN's music, but could feel the filial heart in the words, 'HyoJa is mine' and imagine the lonely and dark environment he was in but still staying strong. HJN walked unspeakable path but was victorious at the end and felt the sorrow in that...

In Cheon Shim Won we sang songs created through revelations at Cheon Shim Won and Mrs. Myomi led this and offering at Cheon Shim Won and prayers I received an answer from HJN and HeungJN... establishing entertainment with the desire of True Mother and make the culture of Cheon Il Guk and

HyoJN gave us strength that we are walking the path that I couldn't alongside brothers and sisters and I will try to expand the culture of Cheon Il Guk that Mother dreamed of and allow us to walk alongside our b and s...and through the overall programs in this Workshop, while feeling this heart, we had HyoJN's words and calligraphy that we framed...

In time of planning the future, I found my big goals for the future and shared it with all the trainees and not sure if I can complete these in ten years but have the desire... and after my academy service is over, I want to go to my area and revive it... when it was on Friday we did online, and how loud and earnest it was more than at the HQ... We were able to hear that...

And the One-Love Cafe, able to convey Mother's Love through sandwich's and tea with taste unlike anywhere else, so rich and deep... and there is a Cheonshim won prayer room and through the Workshop, a drum and staff here and we have reflection by many members, they could pray and feel close and conversing with Hyo and HeungJN... those are my first words coming here in prayer. and can resonate ten-fold stronger than usual...

Kim Hun Yo reflection... grace of resonating with Heaven and then attended this Workshop...

and HyoJong future planning time, I could connect my goal of being a soprano and singing songs with Heaven. At first I wanted to sing a song I wrote with my mother, but received that I must not sing that song but one with True Mother and thought of Sang Yu Wa and then saw a picture of HyoJN and Mother on the screen and thought about Mother singing Son Yu Hwa at the Holy Marriage and then someone said that looking at me they were able to think and resonate with True Mother...

video of her singing... and I listening to this right next to her, kept thinking about Mother singing Sang Yu Hwa... so I hope we can have a time to sing with True Mother when She is released, and I hope She can fulfill (this sister) of being a soprano...

There was no rain and snow for awhile but when we finished the Workshop, it snowed and then rained thinking first of HeungJN and then HyoJN... and could more resonate with their hearts...

HyoJN said to an Academy trainee: Message at Pajuwon Jon and heard that HyoJN wants to drink Resbe mild coffee, so they bought one big and one smaller coffee can, the big for HyoJN and smaller for HeungJN...

reflection... thought I should go to the HyoJN Workshop as soon as I heard and thought it was a sign from HyoJN... and good for youth and people interested in music and was able to participate with my husband and felt more clear difference in the air... transparent... and at the moment I received HyoJN's picture I thought more about HeungJN and felt both in my heart especially in one-heart prayer and devotion... and able to find myself shouting, 'Omma, Omma' and for the first time deep resonance with HeungJN and looking up the character 'Heung' and with the excitement I hugged the portrait of True Mother and saw this myself and then after the reflection could understand... Like the name HyoJinNim and Hyo and Jin, with both is the place they reside...

chance for more sharing... she spread grace to many members and like this she participated with her husband and after returning home could see the attitude and way of speech of her husband changed...

reflection: great gift to me, struggling artistically and emotionally and thinking of things I shouldn't and losing the way and participating in this grateful and because it's my birthday I wanted a new start not to live as before... and 'I will not betray Heavenly Parent' and made determination and heard through PL's

Words that there would be a Workshop at Hyo Jin Jong and thought I had to go and I have to protect True Mother, and we received a lot of love and grace and I want to move forward and the other 2nd and 3rd gen were attending another Workshop and PL said there will be a variety of WSs around me and wondering it HyoJin Jong, is it a place where he worked, but this feels like the embrace of HyoJN and even the transportation to here and also the nature... 'Ah, HyoJN wrote in this nature'... applause

Pak Jon Min's wife from the True Father Counseling Center: Before coming here I confessed my dream about drawing to my husband and he was in support.. He always every month on the 1st would offer HJ papers with words of support for my dream and perhaps because of that, my father promised financial support for the equipment and education and then the notice for this Workshop came up and I was able to register. applause

To a pure water youth who will lead the future the culture of art is very important and we were reminded the history of HyoJN and a pastor from Busan said to me that there would be a time of praise and won't I come... And I went while also hearing the words and a song of HyoJN, hearing him sing, don't really remember what he said, but I have the clear memory of him singing Kidokuri the songs of miracles... I heard many pop songs from the secular songs but watching him praying and singing with tears... and he sings

and that night on my SMS, I wrote down the lyrics and wrote it everywhere, and now that I think about it, until the third year of university I would write the lyrics of a song on SMS and when in dangerous spiritual state, the lyrics of HyoJN's songs saved me and I was reminded of that...

The most effective way to spread the worked of Heavenly Parent and True Parents is through music, and through these WSs I believe many trainees will receive a lot of grace, convinced of that... Here is a picture of them... and able to see that these are actually the righteous pure waters and already achieved the goal they are pursuing and that we will have more from the WSs here... And today the first Seonghwa Spirituality Workshop start and I actually was joking to staff saying there might be snow, but watching snow come down, we were able to feel Heaven and HyoJN is watching over us... and we can be reborn here... as filial sons and daughters and I hope this report can be warmth and comfort to True Mother in the DC...

### **Hoon Dok Hae**

Beautiful Cheon Shim Won contains new thoughts and new dreams... Why is Cheon Shim Won important? It is to enable Father in the SW to mobilize the environment needed for the sake of Heavenly Parent and True Parents. That is Father's Wish and also the wish of humankind.

Therefore, you must earnestly report to Father in Cheon Shim Won. You must offer a prayer saying, 'Today, I'm going to visit such a place. Father, please go with me.'

Knowing that the topography of Cheonpyeong was good, I began to buy land. Centering on Chung Pyung

Lake, I prepared the location to build our Workshop Center. Originally, the site had no foundation at all to even build a house. There was only one grave and about 15 mulberry trees. As I traveled throughout the mountains and fields of CP, I saw that it was the central area. So, having no choice, I pitched a tent and began to buy land to build the Workshop Center.

The reason I bought a lot of land until now is that I had a plan to make an international Workshop Center for the future, a place like a world HQ that the youth could come and receive training. I am dedicating these valleys as American, British, German Valley and so on. Created that way, I believe it will also become a tourist attraction that people will boast about all around the world.

When looking out from the front yard of the Workshop Center, you cannot see or feel the flow of the water or where it goes. You cannot see the path of the water where it enters or leaves, and it feels almost like a lake. And looking down from the Workshop Center, the scenery is extremely, extremely exquisite. This is a beautiful place where the lake and the mountain and the fields harmonize, where it is worthy of boasting on a world level.

Only the trainees come to such a scenic place to receive training, and they can have noble thoughts whether they look at the mountains or the yard, whether it is the sun setting over the highest mountain peaks at dusk, and the sun rising over the high peaks in the morning, a bird flying between the trees or the scenery of people working. When all these achieve harmony, one becomes dazed without realizing it and enters the realm of reverence.

This place provides all the materials that allow crafting the Atlantic, riding this water in the future, or crossing the mountains to pass through the Himalayas in India. A place like this allows people to paint new thoughts and dreams. Even if a flying crane flies like a painting or a small blue boat on a lake, one comes to recite poetry and joyfully stands up to dance to the rhythm.

The CP Workshop Center is a place equipped with all these qualities to allow that...

### **Pres. Lee Gi-seong**

1,476th devotion... Today snowing a lot and despite difficulty coming here, you came... grateful to have such precious people coming...

Tu Son Yun, because of his back, he is not in the front but is in the back attending standing up, and we offer gratitude to him being here, despite his pain, and our Director Chun Dok Gun, offers his devotion without missing a single one. applause

From global foundation, Kim Sa Jong, came although very busy, even people tell him to go to the hospital from working so hard, but I believe Heaven will receive it greatly...

About 44,000 total members here gathered...

Our youth perhaps took a boat to Korea, had a Pilgrimage to Pusan and also had devotion at the DC, and still came here, and I believe it all will reach Heavenly Parent...

'We hope that the health of True Mother is protected and She released soon' There are prayer and chanting and bowing and praise continuing... and team 24 hours offering devotion solely for release of True Mother... When you offer chanting 210 times, I'm not sure that we don't have it too long, and posting that it's so boring... and our young 2nd and 3rd gen and spirituality trainees, we cannot say that it the case... We must have a heart of piling devotion even more...

Pres. Cheon Won Eung, with their age surpassing 80 go to the DC every day, and how earnestly elder Pastor he prays is astonishing and inspiring... To think about his devotion, we can reflect ours lacking. It is supposed to mobilize True Father and SW, and we need to try to do more and offer more.

GPP is about 12... for Gapyeong's love...

Through Cheon Shim Won devotion must move forward with greater certainty... Trainees from elementary school 12 to 13... 15 to 17... 18 to 19 about 67 SeongHwa trainees in total, many pure-hearted youth here and please keep faith that the world Heavenly Parent desires is coming closer.

Pastor Pak Su Ho Testimony... having no friends, only his brother to go to church with but because of the relentless devotion of his parents... and a precious military soldier came to his church, despite military service, and because of that, the youth were inspired... Many after going to the military lose their faith and come to the Workshop to regain it and if you do not have the desire to regain it, you fall off. Need that mindset...

Military nowadays is pretty good to allow you on Sundays to go to church, and those with good faith, they will be able to witness even in the military, and you must all become like this soldier.

But third semester in high school many complexities of concern, he wanted to restore his faith... And because the SW exists, he was able to sustain. And he will prove through action, no matter what difficulty or exhaustion comes his way. And no greater gift than a filial child... True Mother how many times talks about the one needle, the child who knows True Mother's Heart, staying awake at night shedding tears, longing for HyoJN more... and he remembers the words HyoJa is mine. applause for his mother...

Sending your children to the HyoJa Workshop and HyoJN will make your children filial children...

Kin Ju Han's specialty is seeing dreams and visions and he saw HyoJN with the guitar... Mr. Yut San Oh, please resonate because you are good with the guitar, and HyoJN wants everyone to say 'HyoJa is mine' and I believe HyoJN appeared because he is governing this Workshop spiritually.

These spirituality WSs will grow even more for a new era. We must not walk the path of unfilial piety... We must not ignore our Mother.. a path attending M even risking our lives... Then HeungJN and HyoJN will be really happy...

Father had such a plan as what is here now at CP... designating as nation Valleys that will attract world boast... True Mother said there are many precious places here and go and explore them and the house that HyoJN was in, which is under the possession of our foundation not our TC... so this was a house of a

Seongseong leader but came into the hands of the FF and was sort of a lab for HyoJN's artistic creations... but if we took care of it and cleaned it frequently, it would have been better than today...

Places where famous people resided are maintained in the state it was when they lived there... before renovation people would not have slept there even if you paid them and it is because we are not conscious about how valuable the place where True Parents were and that is why we left it to ruin...

At the CP river, we must research where he fished and caught a fish a meter long and shared the fish with the members... and we must know where True Mother and F drank tea and had their pumpkin with duck, where They ate frequently, we must record, and what food They ate at the time and enjoyed... This is what's important, not rocks and trees, but the places more worth than gold and any money, if we preserve them, how precious would they be.

And hearing that there is this house the HyoJungJeong and we weren't able to house all our trainees and talked that if it was under some foundation with the TC, we will be able to renovate it and when Cheonwon Construction went bankrupt, they still made obligation to renovate that building and True Mother on a very cold day went to visit... and contacted where was the location and address and True Mother made Her way there, and it was very tough. True Mother said, 'Ah we have such a great place' and Dec. 20 2024 the next morning True Mother Blessed it with the name. We came up with many names and asked True Mother to come up with one... JoJinJeong with meaning of justice or meaning of residing and True Mother gave order Jeong Chinese character to be where one resides...and Japanese say they never put that character for a house... That is the culture of the secular world... When they say I'm the President of the Cheon Shim Won, they would say the Chinese character is wrong, that you must use the one for house... so Cheonshim Won Zeong, the CC is not like the secular world would use to mean 'house' but we're using it to mean 'Garden'

So please do not laugh at the CCs we are using. Those who are doing that do not know the culture of Cheon Il Guk. It is 'The Place Where HyoJN Resides'... And during the Workshop, it is the important Workshop to check if HyoJN is actually there. And now the 2nd HyoJeong Workshop, and it's good if you just go to sleep there. But we don't just let anyone go there, because of all the equipment that is there. We don't want just anyone touching that equipment, so we opened the Workshop.

And there is a fireplace that burns all night, so you can feel joy from that. And it is a place to resonate with HyoJN and start our heartistic art revolution, heart of culture... You all know the 19th Holy Song, right? We used to sing it a lot in the past, but we don't sing it so much because someone changed the lyrics... The heartistic culture is the culture of parent and child, and the culture of siblings, brothers and sisters...

True Parents Words: The Parents need children and the children need parents and we must have siblings. Right now the culture of humankind is not such a culture, is where countries next to each other build up walls and barbed wire, with history of living like enemies to neighboring countries... Almost no brother/sister countries, but enemies. The world we try to make is one siblinghood under Heavenly Parent. And to make such a world, it must be a nation to fulfill the Mission of Mother, H Japan. And the Mission of Korea takes on the mission of the Father. These are the missions that Korea and Japan have.

And there are two foundations for these missions, first is the Unification Church and One Family Under God is to be conducted while being Blessed through the Unification Church, politicians being Blessed, Presidents being Blessed. And doing this work we were able to have a tremendous victory... And the UPF have mission to establish one siblinghood of Heavenly Parent, they are both having heavy responsibilities. So, we are a religion that will not disappear, even if we are dissolved in this or that country. This is the Will of the Creator, and no matter how much difficulty or trials come our way, not to give up because God and True Parents didn't give up, rather it is the history of Heaven, thinking that the trials you face will make the future wail.

All the churches with 2nd and 3rd gen need come to the Spirituality Workshop united to write the future of the history. HyoJN is not someone who came and went composing and singing. He did his work like he was in a war, making ten thousand songs... Do you think he did that like a hobby? No, with life and death determination, full investment.

We went to HyoJN's concerts a few times. With all he had, he would sing, and completely exhausted afterward. That's how he did everything he did. At the time, our members couldn't really resonate with the songs he would sing and would ask, 'Why would he sing like that? Why would he sing such songs?' But nowadays, the way youth resonates with his songs is quite different from the adults.

Like Dr. Kim Ju Won reciting the lyrics of HyoJN's song while going home, our spirituality trainees must go with the mindset of HyoJN, with life and death determination. So, whether you do business or selling, with that total investment you can succeed because Heaven will work or if not you can fail. But right now Heaven requires that from us. So the words that Heaven bestows, we fulfill it. HyoJeong song, we fulfill

it.

So, if you go and have a Workshop there and are educated there and sing there, you can feel That HyoJN is there. You must go yourself. So, U Chi Dah church leader, I believe you are thinking, 'Oh, I must go there myself' (He smiles) Aju? Every name Blessed by True Mother/True Parents is Blessed. It's already been a year since we've been emphasizing to have a Workshop there. In the eyes of Heaven, how would that be?

So the FF, with that name, we had continental Blessings in Africa where Presidents came and were Blessed. How many miracles happened and for Pres. Trump to even give a welcoming address... and for the names we were Blessed with, we must be grateful for that and take action. Cheon Shim Won High School, the applications for that are 18 to 1. And now people around Korea, even from the secular world, are wanting to send their children to Cheonshim International High School. This is because it was a name with Heavenly fortune. Everyone interested in art wants to be sent to this school. You can only enter there through fierce competition.

Say, 'Monsei' and make all the names we were bestowed with like that, and with devotion. Without devotion, dark spirit will take it... and with that manifest all the glory to True Parents. Who else is glorious like True Parents? Who else are Beings with children that shout to Them, 'Aboji and Omoni' Because we do not treat True Parents like ours as Their true child, we are facing these trials.

So, if we pray with 100% earnest and conviction that True Parents, the SHS and True Parents of HEH, are my True Parents, I believe miracles will happen. Let us make this such a night.
