1,481st Cheon Shim Won

Greeting time

Prepare song

Arirang

Most Honorable Heavenly Parent

Beloved True Parents HEH

We sincerely TY for allowing us this 1,481st Cheon Shim Won devotion and calling us to this place where we lay down the thoughts of the world and all the humanly selfish thoughts, so that our mind and body can be unified. Although we are lacking, we are growing step by step as we offer more than 1,480 devotions, we are coming to resonate with Heavenly Parent in our lives, our spirits and bodies learning the way to victory through patience and gratitude, just as one takes more powerful steps when the wind blows more fiercely, we establish an unchanging, iron-like faith, deep in our spirits as we learned and shout Oeg Monsei.

Please joyfully receive this devotion. And recalling the noble, sacrifice of the OBD Who appears for the first time in 6,000 plus years, we are experiencing little by little the sorrow of Heavenly Parent. No matter what trials or hardships may come, we will become those who proudly say, 'I am a son or daughter of Heavenly Parent and True Parents, and we will become TFs who establish a realm of Heaven King Mother and King Father realm, that no person and no era can take away.

Therefore, Heavenly Parent, please receive this devotion, may it move the SW and bring about a miracle work in us to change to be what we need to be in this time. And we pray for the health and well-being of all the members offering devotion at the DC despite the cold weather for the health and longevity of our HMH True Mother...

Gratitude

Until coming to this Workshop, no faith at all, only going to church on special events... At that time didn't believe in Heavenly Parent and True Parents and knew nothing of Divine Principle but only some Life of True Parents last Workshop... After returning from the Philippines, I forgot what I learned and doing slightly bad things and scolded by my teacher and hanging out with friends... did feel bad in my heart

My mother told me to go to a Workshop with a heart of repentance of my conscience pricked... that my life wasn't as it should,... I didn't know what hyeongseong spirituality meant but from the Chinese characters thought it meant the personality of the SW... after reading group chat and talking to an older brother I knew, I realized it was different from a general Workshop, but couldn't believe in Heavenly Parent until the 2nd day while talking to another trainee at the accommodation, I heard a big voice calling me loudly saying, 'Chin Song-ah' Even when I looked toward the sound, there was no one with that voice. So, I thought I must have misheard it and I let it go.

But then on my way to the snack bar, alone, I heard someone calling my name again, and there was no one around who knew my name and since then 5 times more, the voice calling my name. Then at Hoon Dok Hae I heard the testimony of a Cheon Shim Won Director about hearing Father's Voice at Cheon Shim Won. Then, I realized that what I heard could have been the Voice of Heavenly Parent. Realizing

that, I felt amazed, and my heart became warm, feeling that Heavenly Parent was with me. I began to think that perhaps Heavenly Parent seeing me come here with the attitude to repent, calling to tell me that Heavenly Parent is near.

Until then I didn't know the Existence of Heavenly Parent with me and then I began to really listen to all the Hoon Dok Hae Words and lectures and prayers. I used to only focus on the things I found interesting, but then all that was said found my interest, including ansu and the Principles of Creation, which I knew nothing about, began to click in my head...

Then on the fourth day, we had the cheonshim resonance HD time. Hearing the Director say to read the HD while thinking of someone I love, I first thought of my maternal grandfather, who had passed away 8 years. Recalling the emotions of losing someone I loved, the Heart of Heavenly Parent Who had lost a Parent's children began to enter into me. At that time, my heart was sadder than every before, starting to know Heavenly Parent's sorrow, and how difficult must it have been for Heavenly Parent's Heart.

Also, feeling sorry that I couldn't express much love when my grandfather passed. The things I had done before coming here came to mind, and I repented for how much I must have saddened Heavenly Parent, realizing how lacking I was not to feel Heavenly Parent's Heart even once during the 15 years of my life. And the next afternoon I had time to choose from what was offered by the Directors and offer devotion, and I was happy that I could choose for a purpose I thought of my own.

For me who had no faith, I felt proud because it was the first time I was offering proper devotion, and I feel Heavenly Parent was also pleased... But I still do not fully understand why Heavenly Parent was sad and how sad... The Heart I felt was only a fraction and if I understand why Heavenly Parent's pain I was, I feel I will more be able to know what I can do to comfort Heavenly Parent.

I believe I will come to know more gifts of this spirituality Workshop. TY Heavenly Parent and True Parents... big applause

'Running Heart'

Testimony

Hong Jon Jing

Korean Training Team

Son of 30,000 Blessing family... Serving as a Training Team member now, but in the past I was very far

from a life of faith. I had a very strong repulsion toward my parents actions of forcing blind faith in the church and having to have Blessing to a woman I didn't even know or speak to before. The thought that the Unification Church was a cult became settled in my mind.

Although I had only shown a shameful appearance before Heaven, I participated in the 276th 40-day Workshop due to my parents' continued suggestion. After a week, I heard the lecture of True Parents's Life Course by Lecturer Kim Dong Yong. I learned about True Parents walking the path of the Will despite pain and risk of life and giving up desires in Their 20s and 30s in order to complete the mission They received at a young age.

Especially True Mother amidst hardship and persecution, I realized I had only thought about myself, and I realized the love of my parents also like that, always working hard for the family and always offering love and intense devotion so that the children, my siblings can grow tall and proud, and a great change occurred in my heart, and I chose to walk the path of faith by my own accord.

I received the role as a student leader, and after that went to a consecutive 40-day and a spirituality Workshop. After 120 days, I chose to volunteer at the Korean Training Team with the goal of achieving internal growth and receive the Blessing, and increase devotion I offered for True Mother, rather than remaining at the level I was.

Later, while helping with the 11th Mind/Body Unity Workshop and spirituality Workshop and seeing them shed tears with a pure heart for True Mother, the thought came to me that they are thinking of True Mother at every moment, and I began to reflect more on myself. I thought I had a high level of faith and heart after the Ws, but I realized such a thought was mere vanity.

I felt that True Parents wanted me to lower myself through this position and become a child who treats everyone from a place of humility.

However, lowering myself and being humble and only thinking of others was so difficult, since my past life was far from service. It was more comfortable to just take care of myself than concern for others. And I was a person with this selfish thought, 'If I help someone, I should receive a greater reward in return.'

One day during my service, a member whose immunity system was weakened due to cancer, and who found it difficult to even walk and who lost his sleeping bag, came to the Korean office very angry due to the poor accommodations... Seeing this person angry, at first, made me angry as well. However, then the contents of Director Chun Yu San's lecture, 'Please let me see through Heavenly Parent's Perspective' came to mind. Then I saw in the member's eyes, not anger, but sadness that no one would listen to them.

For that member, I personally went to the sleeping bag storage and brought a new sleeping bag to the lodging area where he could stay more comfortably. Then he said thanks for listening to his story, and even with a body difficult to move, he went to the snack bar and bought me some bread to express his gratitude. At that moment, I realized that this is true love, sacrificing for others and I realized why True Mother never lost Her Smile while sacrificing and serving.

This realization changed my heart, and from my position as a volunteer, I once again took on the role of student leader for the 280th 40-day Workshop. During the first heart-sharing time, when everyone was offering individual prayer, in the past when I was a trainee serving as a student leader, I had never prayed for other trainees, but during this time a prayer began to flow out naturally every single day, asking that each trainee at the 280th Workshop could achieve their purpose for coming, and not just that but gain even more, and experience, even just for a moment, the Heart of Heavenly Parent and of True Mother,

Who is sitting in a DC praying to comfort the Heart of Heavenly Parent.

With this turning point, I began to think, 'Why has True Mother worked so hard to find a single needle in the vast desert in the midst of a sandstorm where She could not even open Her eyes to see?' And isn't this the reason I also offer this prayer to return the 2nd gen members so that they can be of help?

As these prayers repeated, I changed myself before Heaven that I would not prioritize the happiness of others over my own. Therefore, after my service period ends, I will offer devotion so that my long-time friend who is currently away from the church can come to the 40-day Workshop. I will change things so that Heavenly Parent can shed tears of joy seeing the returned children. Thank you

Until now I saw my service as a painful position, having to listen to the complaints and dissatisfactions of the members and sacrifice myself. But looking back now, it became a time of reflecting on my past self. I saw the sacrifice no more as painful, but as a time of reflecting on myself and gaining a new life.

I will complete 5 months of offering volunteer activity and in 2026 will continue to offer devotion for True Mother and put down the roots of my faith, not to return to the selfish life I lived... but living as taught by True Parents, become a child who can hold my head high before Heaven, no longer bowing my head in shame.

Now, following the Words of True Parents that the Blessing is living for the sake of those who are less Blessed than myself, I will surely find the person that I must make happy and ensure that they can feel the happiness of life through me. Also, following the example of the seniors who received the Blessing before me, who devote themselves to their families and devote themselves in any situation and protect their families, even risking their life for a sick spouse or child, my future Blessed family will also be a family that practices true love, giving settled in our heart rather than receiving.

I will grow into a Blessed family that will always defend and protect True Mother. And I want to express my gratitude to all the staff and volunteers at the Korean Training Team, who always treat me with true love, and to the 280th 40-day participants who trusted me and followed me despite my shortcomings as a student leader, and the members of Nami Church who always cheer for me from afar, and to my physical parents who are always proud of me. TYSM... Heavenly Parent and True Parents TYSM, I love You... applause

'Happiness'

HJ Report

Pak Jin Min Korean Workshop Coordinator

Last year from Wed to Fri, I like to offer the report about the grace of the 3-day Mind and Body Workshop... and he bows

True Parents's once gave us the Words: 'Is your mind and body unified?' Starting with the first Workshop in 2023, we have moved forward centering on these Words.

True Parents Words: 'Are you truly the sons and daughters of God? You yourself know that if you are, beyond all circumstance, you will say it, and it is something everyone comes to know as an individual human being to form a relationship that dwells with Heaven.'

Right now the reason for our devotion is probably for the safety and longevity of True Mother. It is not to get attention, but to really comfort True Mother's and Heavenly Parent's Heart.

We listened to the trainees and did a survey and they said they were better able to control their emotions and their life of faith improved, more profoundly experiencing Heavenly Parent and True Parents's Love. And we asked how much they put into practice after the Workshop. 34% said they offer vigil devotion every day and reflecting on their life during that time. But there were those who did not put it into practice because they were busy or exhausted.

In this lecturing and teaching, we realize ourselves and receive many comments about self realization. This time 82 members joined. They said this year I will unite my mind and body and become a child of strength for True Mother, and some came with children...

Attending PL we had a graceful opening and here is a video:

Are we truly walking the right path. Do I have to live only enduring? Why can't my family understanding my heart? Is Heavenly Parent really listening to my prayers? When can I smile without worry? But even so, I had faith in God and took a next step.

Heavenly breathing training...

In Mother's Womb, we realize how we're living in love... Mother we love You... The heartistic cafe... talking and praying together in pairs or groups... starting the Workshop with one heart

I with Heavenly Parent

relation with partner

living a life fulfilling the Will

Kim Guy On... gave Heaven breathing, feeling the love of Heaven on this ground, and you can feel whether you are with your breathing.... If enraged or sad your breathing is disturbed... And I can feel myself getting exhausted right now... So, what is the breathing of love, we can experience it...

reflection: I wasn't able to be grateful for the knee injury, not being able to love my own knee, and if I hadn't injured it, I wouldn't have been able to experience that my mind is the subject and after realizing this, my knee hurt less...

When our body is the subject, our mind is dragged by the body, but with gratitude, the mind is the subject of the body, not fighting each other... When you realize you are made from True Parents love and you guys are too, experiencing the healing of heart too

While meditating and entering the True Parents's Room, I thought of my parents who strongly opposed my faith, but realizing True Parents's are my Parents, I had more heart of embracing my parents despite pain and able to hug them... and this was true love of True Mother's Womb...

Until the last Workshop, there wasn't these type of expressions like, 'Ah..' and gratitude to Heavenly Parent and True Parents always with us...

Next, our famous Hong Yo Won... with him we had resonance prayer... We have learning prayer, but not easy to be conscious of God and live by God every moment... but we need to... not praying thinking when I have to pray I have to pray but pray naturally...

While eating breakfast I realized I was eating habitually and what does it mean to eat while seeing through the eyes of the mind.... I was eating this without thinking of the farmers and all the devotion it took for this to come here... able to see that the fruits of the Providence of Restoration are actually being born here, but why couldn't I shed tears, but with gratitude for the food before me, I could shed tears, and while feeling the grace of Heaven, this too is the season of the red horse and I will go out to witness even of my personal righteousness and this person could make a determination of witnessing through that small thing, when you experience Heavenly Parent with you every moment, that becomes your prayer in daily life.

Meditation prayer (cheonshimhwa) We all have the conscience, and even before we think 'I should pray' the conscience is directing us toward the way of good and how God's Goodness is with us... and sometimes we look at the clouds and can't see the sky above it, but we should know unchangingly there is the sky as there is the conscience in us.

Returning to point zero, we are able to feel through the conscience that God can be the true owner of us. Taking out the career, thoughts and actions of us, left is the original me that God had made.

I never knew the omnipresent God. Through that realization, when I looked at people, I was so happy. And I smiled unconsciously, that Heavenly Parent wanted to love, and I want to live by that original Mind in my original Heart.

When True Mother gave the Words to put down our fallen nature, I believe She said 'Live for the sake of others'. If we knew the profound meaning of these Words, I believe things would have been different. With the heart of repentance and comforting Mother, let us offer applause...

The Heart Cafe by Dr. Kim Jong jun... Many trainees came because of their immense pain, but coming here we can see them resurrected, regarding their pain as Blessing and Heavenly Parent did not only protect us in the past but a time to feel that Heavenly Parent is still with us and protecting us during this day (tears)

That time when you sleep, do you know how many times Heavenly Parent visited you, looking to find one being 'me' for which the Heavens worked so much... applause to Heavenly Parent with us right now...

testimony... That moment I thought was pain, I realized that I had Heavenly Parent's Love. It was because I lived a life unconscious of God, that my family could not feel God in my daily life and I would like to make a family with the warm love of Heavenly Parent.

family having a failed business... I feel very good when there is an advertisement of True Mother and on YouTube it's very detailed and to PL whose going to the hospital I gave a pamphlet... Here to read and in

the taxi and able to meet the righteous people by this heart wanting to approach anyone anywhere in passing... with pamphlet

Becoming yourself always with Heavenly Parent, this is making that relation with those around you seeing through the Eyes of Heavenly Parent (maybe the most difficult program because we see through our own standards and emotions and sometimes hurt those around us, but if I am their parent, the heart changes and you feel change of love and forgiveness and warmth and I hope that love and perspective can change this world more toward Heavenly Parent and True Parents, and I will not waver no matter what environment...

True Mother is bearing the cross because of the fault of the children and I will try to do all things hearing with the Ears of Heavenly Parent and seeing with the Eyes of Heavenly Parent, with the Mind and Heart and Perspective of Heavenly Parent and True Parents, not wavering no matter what environment trying my best... When resentment or anger comes, I will not feed complaints... TY for this realization to experience Heavenly Parent on a deeper level...

Meditation Program and able to feel the Heart of True Father in Heungnam Prison and Mother at DC, and could smell the chemicals at the HN Prison... many shed tears during this time uniting with True Parents' Heart... and regret not being able to film everyone...

This program of smiling and laughter, finding your natural smile... and even those who feel that if I put a camera in their face they would not smile, would still smile, because we have the essence of God's happiness in all of us... When I try to give energy to Heavenly Parent with laughter, I started to cry... When I thought of Heavenly Parent right before me, I wanted to put down everything saddening in my heart, and through this program closer to my original mind...

And I recorded myself laughing and thought my faith is old and broken, but when I accepted myself, my heart was warmed and moved... And mind/body unity resting time or tea time, which is a Q and A along with tea, and with preselected questions, our lecturers gave many flavorful answers... Dr. Chun Yu Son and Kim Guy Yon about meditation and lectures...

reflection... I want to learn how to shout like you do to awaken spirits around me. Through you I was able to abruptly feel spirituality with me...

I followed my mother and father to church but I don't know why I should believe in the church... You have all these responsibilities and right now your child is in puberty and I want you to tell me what your priorities are...

Life of fulfilling the will: First is lifestyle HD... Rather than just reading a lot, even reading a short sentence, we try to connect our lives through each and every word... Reminded of the hard times and why is Heavenly Parent more harsh on 2nd gen, but heard Heavenly Parent say, 'Am I not supposed to pity Heavenly Parent going through so much more?' To overcome my heart of resentment, I want to meet the fundamental Heavenly Parent and with difficulty tune my frequency to gratitude to remember Heavenly Parent's Love.

And when you read for the frequency of Heavenly Parent, tears come and unconsciously you realize Heavenly Parent's Word... Reading about the Word of True Parents' Nature and it is like breathing in the nature, and when I'm happy, it feels the greatest happiness and when I see it with sad heart, that is intensified.

Today I went to the Holy Ground, and I thought, 'The ground is very slippery' and walking on this path of ice, how much icy path did Heavenly Parent have to walk to bring me here to resonate with Heavenly Parent, and realizing Heavenly Parent is with me, inside me, it was very moving.. So, that is why this passage touched me the most today...

Many members had realizations through what they read and so profound that I thought they were actually religious leaders... And the heart of spiritual heart and devotion to resonate with Heavenly Parent's sorrowful heart, and singing, 'All Living Things Shout Out' and then True Father stepped out and embraced me... and I thought True Parents's are recognizing my pain and want to comfort me and I will not give up on my life...

During the vigil, as I resonated Heavenly Parent's pain with my own, tears and a precious time to understand the Heart of Heavenly Parent and True Mother and Heavenly Parent having no choice but to recognize True Mother in the DC... Our lives being so busy, we fail to recognize Heavenly Parent and True Parents... and align our hearts with True Mother's Life and Heart... Next time I plan to attend as a couple...

At the Workshop able to be reborn as true children... Truly remembering what they learned here, I believe we can establish Cheon Il Guk... with gratitude to Heavenly Parent and True Parents...

There were 9 couples of parent and child of faith, and through each other, they could feel the heart of Heaven, and we will open the true family healing Workshop in March..

In the midst of True Mother's hardship, She offers devotion for us, and we reflect on our lives and to not be a burden more to True Mother, we will grow and from now on become children who inherit the path of True Mother...

applause

Break

Hoon Dok Hae

Heavenly Parent helps us in times of difficulty. This is true. Missionaries were sent in 1976 to 127 countries, but with deportations 123 nations... They prayed on the frontline and received teaching for everything. Do you also receive teaching? If you do not have these experiences, you are not members of the Unification Church. It is destined that you will be taught 100%.

Those who do not believe in the Unification Church, do not understand. The more Father makes you suffer, the more God helps you. It means that the SW helps you. When foreign missionaries go to prison, God teaches them. That is the truth and fact I know well. Every time I encountered difficulties throughout My Life, God appeared and helped Me. Those were proud times for Me and My golden years, the most sacred time for Me. Only I know that.

True Father is always with us in the SW. He only exists in incorporeal form, but He does not leave our side even for a single moment. What would True Father want for us now? He would surely desire

unceasingly for us to march forward. God's Providence must continue until love and peace overflow centering on True Parents throughout the entire world, and the culture of heart is established to bring about a new order.

Furthermore, based on the victory of the FD, we must push forward even more to offer great victory for Heaven and True Parents and provide great hope for the world and history. You eat and dress and do every thing as you want to do, but that becomes a condition of accusation. If older couples do not have young people who can be loyal to God, they should be ashamed. Even now, they must raise such young people.

The great thing is that in the Unification Church there is something called, 'Children of faith'. It is the sons and daughters of faith who can save the older people. For this I am telling you to truly run as if your bones will melt away. Then when you shed tears of hope before the young people, the Messiah will visit upon that foundation of hope.

Tonight 43,000 offering devotion

names churches

Pastor Song In Yong's Message at the DC

With a very low temperature 120th day of Mother's detention... today, names churches... Elder Members' Team and Marshal Arts... about 70 members have gathered... Our Mother, True Mother is in the path of pain, but I hope this pain will help advance the will of Heaven Parent. Through today's devotion let our faith grow stronger and let us make the determination that helps us reveal the truth in our daily lives. big applause for those representing us at the DC in the cold...

With true life, love and lineage... all on Mother and in Her struggle, I believe all our members are walking along that path... True Father in prison 6 times and True Mother 120 days, not knowing when it will end, like a Lamb of offering, and we too, all that's left for us is to cling to Heaven.

After Jesus' crucifixion, the disciples saying that they would walk the path themselves, and when we think about those disciples we think about their struggles as well, but following their Lord Who walked the path of the crosses and all 13 walking the path of the cross and Peter being ashamed of his denial of Jesus and not properly bearing the cross, endured the cross upside down... and we can't help but think of the early days of Christianity and can only think about their struggles as well and as historical... and let us have to heart of struggling with Mother and move forward with Father and Mother's Heart.

The Christians to get closer to their crucified Lord, walking a path becoming one, and this is a time when we need to be one and take action and put our focus on that.

Our long-term Workshop trainees... names various WSs all together we have 458 trainees and with today's praise we can see them with tears of our hope. Today a few people came to me and a Christian pastor, and they don't have many young people, but we have all together 800 trainees that are youth... and they were truly shocked...

Today, 'Rise Again' was the song they sang in perfect Korean and how much did they train for this... And Pak Chi Sang (also a famous soccer player's name) 74th Seonghwa student gave his testimony...

Kim Ju Han's testimony... environment of the world is so unsupportive... Even people at 80 never heard the voice of Heave... I heard such voice and felt Heavenly Parent embracing me, 'Oh my child'... like a new-born baby, we must enter into Heavenly Parent's Love... How distant are we from Heavenly Parent because of original and ancestor's sin... If we see our ancestors, we see many sins, and if we say we are the child of them, how distant are we. By cleansing all this and entering the position of the a true child

and saying, 'Heavenly Parent I exist' and being able to call out Aboji and Omoni, True Father wailed for 17 hours until His Eyes burst out...

As a first gen not feeling Heavenly Parent's Love even once, and then in SW what will you do? If you are dragged by bad spirits to hell, what will happen. Each and every day is so precious... This young boy heard the voice calling his name...

At the Holy Wine Ceremony and people saying you must come and not going.. Look how a 15-year old is doing better than you and we must all be children who walk the path of Heaven, and he said he will try to go deeper in understanding. And I believe we will have figures recorded in history...

Today Hak Jong Jin volunteer of Korean Training Team gave a deep testimony... We pushed things because Heaven pushed us, but this time many participants and even 5 times and feel they have to come with their husband and children...

Oh Say Gone Minister and another minister, I saw them receiving so much grace from the contents of the lectures... diligent and hard working people so that there is the expression, 'Ah...' this is true love, this is the love of True Parents came out a lot... deep and profound realizations of seeing through Heavenly Parent's Eyes, and wiping tears off each other... and how much of our lives do we live without seeing through True Parents's Eyes...

True Father's said we became fortresses of dark spirits in our eyes, ears, mouth and covering our body... yes, in the church too, long-time members... Those who see through the eyes of the angel ilk of Lucifer Satan... how happy and grateful to begin to see through Heavenly Parent's Eyes and offer praise through that heart brings such true happiness... It is amazing that we have lecturers who can teach this, and they are even youth 2nd gen...

Kim Guy Yon, the moderator is such a lecturer, teacher, and the day will come when each can have their own Workshop Center and their own 3-day Workshop... and there's another called 'True family healing spirituality Workshop' and more new ones will come, and even if we have to borrow buildings, we have to conduct these WSs... In Cheonwon Church main hall sanctuary, because it's not full every day, maybe we should clean the floor and sleep there and conduct Workshop there... We can do that to take care for all the trainees coming here...

The time when Heavenly Parent's Love will fill the Complex is here... True Mother proclaimed the Gates of Heaven are wide open, and it's the 13th year of Cheon Il Guk open, and the year of Heavenly Parent's Direct Governance, and we must receive that love, not just with your head, but realize this is the love given to humans by Heavenly Parent... In this amazing era living day by day, how precious, becoming one with True Mother and cleanse all the blemishes and stain in us and all the dark atmosphere in us and our churches.

Before accusing or blaming others, first we need to ask if we are one with Heavenly Parent and True Parents... and are you a child that can receive the education of True Parents

Hoon Dok Hae today, Heavenly Parent comes to us when in times of difficulty, and our missionaries here said they all received teachings directly from Heaven in their time of difficulty... If not a Unification Church member, they don't understand, not have this experience...

And our youth wailing and understanding Who Heavenly Parent and True Parents are, and because of this the faith of our youth is set ablaze... and today we have 3 Places on this earth excluding here having spirituality WSs, so all the Workshop happening here going out to the Branch Regions can bring the Ideal World of Heavenly Parent to this earth closer, with us wailing and repenting and resonating worldwide... If there is a warrior of this, Heaven attends such a warrior... Otherwise, the war heroes of one countries interests will not end world problems. The only hope is One True Parents, knowing and attending them... and a Unification Church that does that...

We need earnestly pray for Heaven to come down and True Father to work... Since Father is in incorporeal Form, True Mother said He can work even more... and with the faith that everyone can hear that Voice for a H unified Korean and world... Let this be such a night...

Calling out / Fight Song

Chanting

Prayer and Praise

Heavenly Parent please forgive us for not taking absolutely seriously our responsibilities and how must Heavenly Parent be looking upon OBD HMH in the DC, although She repeated how important to fulfill, and were we only listening to the words and not the practice for the H tribal messiahs and failing to fulfill... Oh Heaven please forgive the sin of testifying to the Words from Her Life like spitting Blood, although She told us to love Heaven and become one, but we only held onto our own pain and circumstances... Please forgive us, failing to correctly testify to True Parents with loyalty and filial piety, sin of failing to carry the cross on behalf of True Mother... With what can we wash these sins... failing to protect our True Mother, due to our incompetence and laziness...

Just as Mother offered 1,095 in our place because we fail to have that heart... the sin of failing to pray like war before the Call, even you gave us the Gift of Cheon Shim Won and told us to pray like a war... Please forgive this sin. Victorious Heavenly Parent and True Parents of HEH, now the BFs will pray like a war with action, risking our lives, and pray like we are in a war... In the New Year of the red horse, let us prepare for death as we determine our path and being the bodies of HyoJN, HeungJN who gave their lives and blood and physical bodies for us...
