### Christianity, Atheism and AMERICA'S FUTURE

America is now facing various serious problems, such as those of race, youth immorality, the collapse of Christianity and Communism. Among these problems, the danger of Communism centering on atheism is the most serious problem. Even now their ideology is spreading throughout the world. This is not only America's problem but the problem of all the religious people, God, and the free world. This is a desperately serious problem.

What does God hate the most? I know three points. First, the Communist party. People are wondering why the Unification Church has established the International Federation for Victory Over Communism [IFVOC], and is actively working against communism. I, as a religious leader, know definitely that God exists and acts, and that is the reason why Unification Church is doing

IFVOC activities for the sake of God. God's biggest headache is the Communist party. God surely is alive and considers all mankind as his children. Communism denies God's existence, just like people who deny their parents when the parents are alive but not with them. Therefore, we cannot be quiet. If we are quiet, then we cannot be God's filial children; instead, we become rebellious children. In this sense the activity of VOC is inevitable, to defend God, who stands as our Father. Second, the corruption of religion. Third, the decline of moral standards.

America as a Christian nation is on the path of corruption. Christianity, which developed from 2000 years of persecution and sacrifice, has been in decline for several decades due to the Communist strategy of God-denial. Communism always denies God's existence. The Communist party is using denial to push Christianity into decline.

SMM, *The Emergence of Communism and the World Today*, Way of Unification (Part 1)

Hello,

Thousands of patriots from across the East Coast gathered at the **Rod of Iron Freedom Festival** this weekend to uphold God-given freedoms and America as a nation chosen to defend and spread those freedoms in the face of a broad alliance of global enemies seeking its demise.

**Frankfurt School is formed in 1923**

Georg Lukács was a founding member of the Frankfurt School, aka Institute of Social Research. The Frankfurt School was comprised primarily of European Marxists, who introduced and developed the ideology of Critical Theory.

As Critical Theorists, they argued that social problems stemmed from social structures and cultural assumptions rather than from individuals. They argued that ideology was the principal obstacle to human liberation in all forms of human endeavor.
