CATASTROPHE vs ABUNDANCE

*Woe to those who call evil good and good evil,
who put darkness for light and light for darkness,
who put bitter for sweet and sweet for bitter!
Woe to those who are wise in their own eyes,
and shrewd in their own sight! Isaiah 5:20-21*

We may also expect the progress of science to solve mysteries of the physical universe. Together, they will bring human society to the stage just prior to the realization of the [God's Kingdom]. Thus, we can understand that the Industrial Revolution which began in England arose out of God's providence to restore the living environment to one suitable for the ideal world. Exposition of the Divine

Principle, p. 289

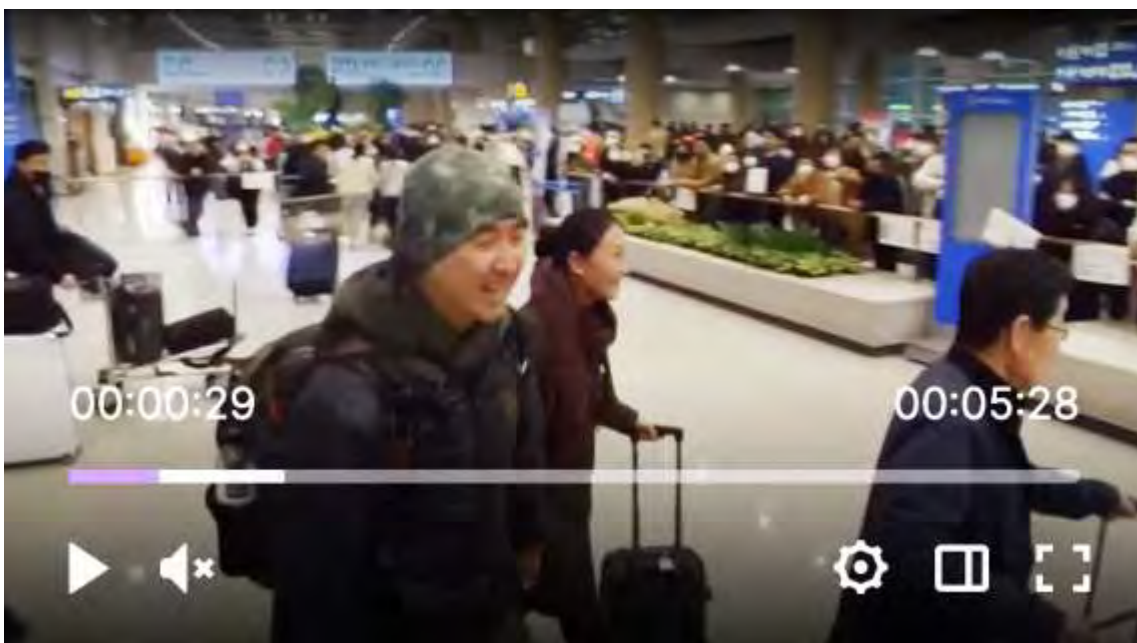

Hello,

The Sunday Service started by showing a video Hyung Jin Nim's and Yeonah Nim's arrival at Incheon airport, with a beautiful welcome by the Korean Sanctuary community. In his spoken message he sent greetings from the Fatherland where the 2nd coming of Christ took place during our lifetimes. True Father's anointing of his kingship line was decided by him, not Hyung Jin Nim, who prophesied that among the thousands of religions in the world there would be a judgment of one specific religious group

whose leader had rebelled against her husband's will after his passing. This judgment took place last summer, with the tragic assassination of Prime Minister Abe, 10 years after Father's passing in 2012.

Hung Jin Nim expressed his appreciation for many prayers, "which are a great comfort to us. Despite the challenges we face, God's Kingdom is coming. As more come back to True Father's authority, those who are losing power may become vengeful but we know that God causes confusion in the camps of the enemy. We are grateful that God is leading the way. True Father in heaven is initiating many miracles for all to come back, including Christians who never knew him."

"Our brothers and sisters are bearing fruit with the return of lost sheep, including folks from all denominations who are learning the Principle, including the Fall and the realization that Jesus did not come to die, since his original message was the establishment of the Kingdom of God intended from the beginning of creation. Stay strong! We will keep you updated each week."

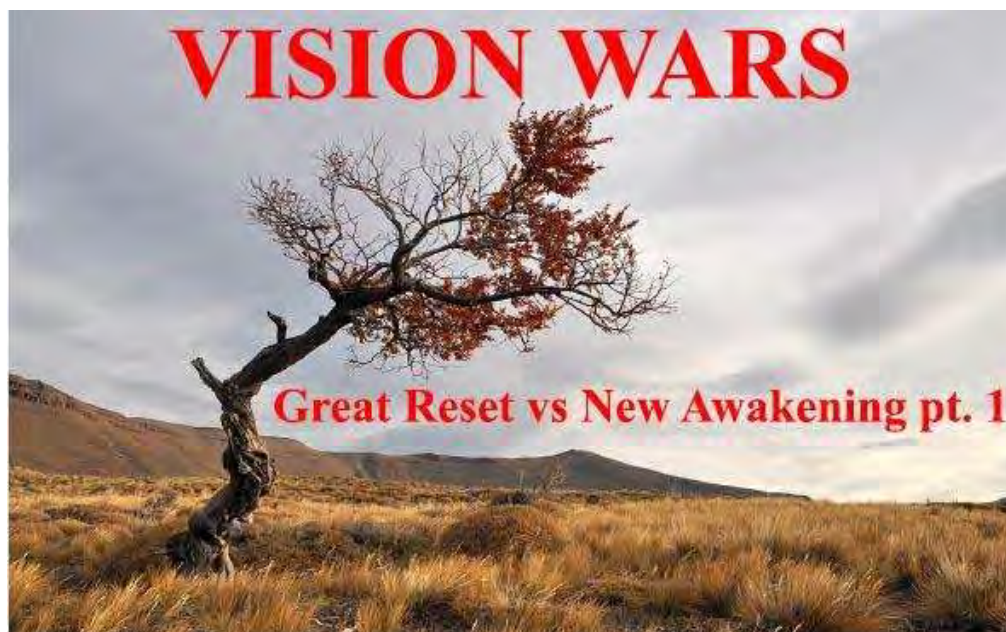

The Great Reset's War on Freedom

Since Hyung Jin Nim asked for me (Richard Panzer) to share some of the *Vision Wars: New Awakening*

vs the Great Reset. Just as God's providence has been unfolding, the Satanic providence is as well. Traditional Marxism was not attractive enough to inspire workers in the industrialized nations who wanted refrigerators, not revolution. So Leftists like Antonio Gramsci advocated "Cultural Marxism," a demoralization of the institutions of society in the West.

The "Climate Catastrophe" message of environmentalists like Greta Thunberg and Al Gore has been effective in persuading the majority of Millennials and Gen Z that the use of fossil fuels is an existential threat to the survival of the human race and that therefore America and Europe must implement a "Net Zero" Carbon policy to reduce their use of fossil fuels to zero. The fact that the use of fossil fuel energy and the free market have brought billions of people out of poverty is ignored by them.

Also ignored is the increasing abundance in the world that came with the industrial revolutions that started in England and other European nations in the past three centuries with the invention and adoption of steam engines and other mechanical devices in the 18th century, the utilization of coal power in the 19th century, of oil and gas energy and electrical devices in the 20th century, and the digital revolution in the late 20th century. These would not have been possible without the political and economic freedoms rooted in the ideals of God-given rights asserted and adopted in Christian nations, and then spread to the rest of the world.

The World Economic Forum and investment management firms like Black Rock, Main Street and Vanguard are using their vast economic power to enforce "woke" anti-fossil-fuels, systemic racism, transgender, biosecurity state agendas aka ESG (Environmental-Social-Governance) on the nations of the world. In the background, leftwing "alchemists" like George Soros implement a dialectical strategy to promote chaos and racial division in America and Europe while ignoring the crimes of the authoritarian/totalitarian nations like Communist China, Iran, etc. which stand to gain from the decline of the U.S. and its allies.

Censorship and Defamation: Weapons of Control

The Great Reset's attack on free market capitalism and the prosperity it has brought to the world is rooted in an anti-Christian, anti-human agenda. Its advocates openly talk about reducing the world's population by 85- 95%. The silver lining is that patriots and people of faith are waking up and beginning to stand against this power grab by elitists who have contempt for the ideal of God-given rights. Even lifelong leftists like NYU professor Mark Crispin Miller are speaking out about the need to preserve our freedoms as well as the value of faith and family.

Humanity is faced with a juncture between two possible futures. In one is a regression to tyrannical rule by a Davos "Overlord" elite class using the power of advanced technology to track, surveil, and control the populations of the world. In the other future is a distribution of responsibility and decision-making power among human beings who are created in the image of God. While the power grab of the global corporate/government oligarchy can seem unstoppable, with courage and faith we will be able to fulfill God's original purpose for the human race, a world of freedom and responsibility.

May God bless you and your families!

Sincerely,

Richard
