

Let Us Create Our Tribes!

Chamarande Training Centre, France, 25. March 2017

By David Perry

On Saturday March 25 twenty-two members came together at the French training centre for a “Ensemble, créons notre tribu!” (Together, let us create our tribes!) workshop.

Rather than focusing on the recent ‘Europe can do it’ workshop, which would mean squeezing two days of content into one day, we decided to speak of the main points of that workshop and to add reports and testimonies of other tribal messiahs that have had success (Mrs Hiraki from Los Angeles, David & Patricia Earle in England, etc.)

Kathrin Plane, Hanna Lotterie and David Perry, who participated in the ‘Europe can do it’ workshop, spoke of the trinity system as a means for

couples to work together. An individual couple has often gone as far as they can with their family and friends and feels blocked, not knowing how to take things further. But a trinity of couples working together brings in different ideas, a new way of looking at things and opens a channel for more spiritual support.

A report was also shared on David and Patricia Earle’s testimony during the recent European Assembly in Prague. A key point David raised was seeing our relationship with our family and friends as a long voyage that we are embarking on together. Getting them to the Blessing is just one step on the voyage. We need to continue this

voyage together helping them, educating them and encouraging them. The Blessing is a big step but we must take care of them after.

Hisako Moulinet presented the method Mrs Hiraki developed in Los Angeles (“One to one”, like in Brazil).

We also touched on the point that with Foundation Day we have entered a new era. First generation members need to realize that our difficult path of the past is finished. In this new era, we need to begin taking care of ourselves on the individual and family levels. The time

has come to deal with the problems that we have been dragging along for many years. Some members might have decided, “I’ve always had this problem and I will always have it.”

For our success as tribal messiahs we need to deal with those problems and liberate ourselves. Becoming a tribal messiah means having a parental heart so I can take care of others. If I am burdened by problems individually or in my family, how can I take care of others?

The time has come for us to liberate ourselves. The first step is admitting I have a problem and then to look for help.

This will make tribal messiahship more of a challenge. We can only live to this standard of tribal messiahship:

1. Citizens of Cheon Il Guk are required protect the pure lineage of Heaven.

2. Citizens of Cheon Il Guk must not violate one another’s hearts and rights as human beings.

3. Citizens of Cheon Il Guk must not misuse public funds.

4. Citizens of Cheon Il Guk should read, practice, disseminate and teach True Parents’ words.

5. Citizens of Cheon Il Guk should serve as hoondok family leaders and tribal messiahs for the substantial settlement and completion of Cheon Il Guk,

when we liberate our hearts and minds from the things weighing us down.

We hope to see trinities forming soon and we will also organize other similar workshops for other communities soon.
