

Establish an archery organisation for World Peace

Ian Currie
March 11, 2017

To all archers,

As many of us have found, through archery, purity of heart and mind is important for the unity of mind and body. Which in turn lead to the perfect shot which we strive for with every arrow. We long for that inner peace that comes from making the perfect shot.

Possibly 70,000 years ago, the bow and arrow came to humankind to help ones' family in hunting and providing food for the table. Over the years evil intentions made this gift a weapon of war. Recently archery has become a sport in which nations and individuals compete with each other. As a sport, it embraces young and old, men and women. There is an archery world record achieved by a person with no arms. Today archery has become a tool once again of peace.

There are many archery organisations and archery clubs. It is important to find ways to encourage archery in the younger generation not just as a sport and pastime but as a way of life. There are so many parallels in how to shoot a perfect shot and how to manage our internal lives. With these concepts, I would like to propose a meeting to establish an archery organisation for World Peace.
