

High Noon Team on Ukraine Visit Stresses Sexual Integrity

Mykhailo Ilin - May 20-25, 2019

From May 20 to 25, the High Noon team visited Kyiv, Ukraine, as part of their two-month tour of Europe to give an important message to our members.

The team of six people from the United States held two meetings in Ukraine. The first meeting was with about 20 single young people, both First and Second Generation. The second meeting was with about 40 blessed members.

The name “High Noon” comes from True Father, who often told us to live our lives in such a way that we cast no shadow, like someone standing under the noon sun – absolutely free from sinful behavior.

The High Noon team members, who include two blessed couples, spoke frankly about the widespread problem of pornography, even among our Second Generation. Pornography is so easily accessible through the Internet that almost every child in the world is exposed to it. Many Second Generation children are suffering because they become addicted to porn.

The best way to prevent children from becoming addicted to pornography is for parents to have honest talks with their children about sex, emphasizing that sex is a beautiful gift from Heavenly Parent. Children are naturally curious, but they are meant to learn about sexual love from their parents, not from pornography.

The two meetings were greatly appreciated by the Ukrainian members, and families continued to discuss the contents at their night vigils.
