April 20, 2018

Decline of North Korea (???)

<1948 + 70 = 2018>

Father said that the Biblical basis for saying that Adam and Eve fell from the top of the growth stage can be found in Abraham's three symbolic offerings. There were two doves, two rams but only one heifer. This means that in the formation and growth stages Adam and Eve grew as partners. In the completion stage represented by the single heifer, however there was no horizontal partnership but only a vertical relationship, and this means that they did not grow. He said that this is the only place in the Bible that provides evidence of the point of their fall.

Thus, he said that although Satan can invade up to the top of the growth stage, he cannot invade the completion stage. (Testimony p. 104)

We can also see this by observing the way Father advanced the providence. In 1967, when communism was expanding at its peak, he spoke in Japan, saying "Communism will now go down. It will end." If the growing period is 100%, each of the three stages represents 33.3%. The portion up to the top of the growth stage, where Adam and Eve fell is roughly 70%. That is why Father said communism would begin to decline 70 years after the Bolshevik Revolution. Signs of its demise slowly began to appear 60 years after the Bolshevik Revolution. By the time 70 years had passed, it was clearly in decline. (Testimony p. 105)
