Beloved True Mother,

On this Parents' Day in Korea, my heart is filled with gratitude as I think of True Mother.

Since the beginning of the world, the sun has given light to the day, and the moon has comforted the night. No matter how harsh the winter, spring always comes again. Creation itself continues to testify to God's enduring hope and love for humanity. Once God creates something, it endures with promise.

As I reflect on this, I think of our beloved True Mother. True Mother was God's promise to the world.

Because God's Daughter came, loved, endured, and fulfilled Heaven's providence, humanity now lives in a completely different world than before. History can never return to what it was. Even if difficulties come, even when people become confused or shaken by challenges, one eternal truth can never be erased: humanity now lives in an age where Heavenly Mother can embrace this world through True Mother's victory and love.

Heavenly Parent was born thanks to our beloved True Mother.

True Mother has already changed the course of human history forever.

I know there is still so much that True Mother wishes to give to the world and so much that remains to be fulfilled. But please know that you have faithful sons and daughters all over the world who will not forget Heaven's dream, and who continue forward with gratitude, love, and determination to bring joy to God and comfort to humanity.

Thank you, True Mother. Because of you, we have a victorious Heavenly Parent now.

Thank you so much for creating the environment whereby we can attend Heavenly Parent with joy. We will expand this blessed work you have accomplished with love and care. The light of your love will never end. Your embrace will be felt by every corner of the universe.

We love True Mother very much. Longing for the day we can drink coffee and eat rice cakes together again.

With love and gratitude,

Demian and Yumiko
